Factory Azure Synapse Analytics (SQL DW) In this lesson, you create a simple ETL package that extracts data from a single flat file source, transforms the data using two lookup transformations, and writes the transformed data ...

Ssis User Guide

There are two types of variables in an SSIS package: system and user-defined. SSIS automatically generates the system variables when you create your package. Components can then reference the

system variables as necessary, usually for debugging and auditing purposes. You create user-defined variables as needed when you configure your package.
