One of the worlds great cities, Florence is visited by over six million tourists each year, yet, despite some recent improvements in accessibility, the Cradle of the Renaissance still presents significant barriers. Imagine lunch in an outdoor caf, soaking up the warm September sun, where do you find an accessible restroom? Where to eat in a country whose main staples are bread, pizza, and pasta if you have an intolerance to wheat gluten? In which museums can you touch a Renaissance sculpture if you are visually impaired? Need to rent a wheelchair or find which museums have them on loan? Locate an accessible hotel with a roll-in shower? Find out if your power wheelchair will fit in the elevator of the Uffizi? Or discover the wheelchair-accessible paths in the Boboli Gardens? Reading A Guide to Accessible Florence, an indispensable resource written especially, but not only, for wheelchair or scooter users and slow walkers, will give you the answers to all these questions and to many more.
All in the Family Jessica Kingsley Publishers
This book for architects, interior designers, building managers, students, conference organisers looks at first principles to provide the user with the 'tools' to make their own decisions rather than a 'cookbook' approach. It is intended that designs and product information can be taken straight from the manual and inserted into ongoing projects. For the first time the book considers the needs of people with visual, hearing and mental disabilities, who make up the majority of disabled people in the population, alongside those of people with physical mobility disabilities. Practical low cost solutions to retro-fitting existing buildings are discussed, as well as the methods used to assess the suitability of an existing building, and assembling a project to improve access for disabled people. Specific products and designs are illustrated and discussed - with full working technical drawings, and full specification details. These will reduce considerably the research time needed to produce a cost-effective solution that will improve access for disabled people. A perspective of the standards and legislation dealing with access issues in the UK is compared with those in other countries, and the standards mentioned are compared with the realities of practical implementation carried out in 4 years of design in this area.

Manual Handling in Health and Social Care is written for all those involved in the manual handling of adults or children - including those carrying it out, assessors, managers and commissioners. It lays out the current legal requirements in a non-technical way and includes case studies illustrating the law applied in practice, across health, social care and sometimes educational settings. The book applies to England, Scotland, Wales and Northern Ireland. An extended introduction sets out challenges, past, present and future, including safety, balancing risk with duties to meet people's needs, human rights, avoidance of blanket policies, mental capacity, safeguarding, the limited resources of statutory services and single-handed care. It also considers some of the legal implications of increased use of technology (including remote assessment), as well as the "mechanisation" of care and its application to manual handling. The main part of the book is in the form of an A-Z guide, providing quick access to relevant legislation and common law (negligence) rules applying to personal injury cases. It covers also, extensively, judicial review legal challenges to decisions, when people and their families disagree with manual handing decisions that have been made. In addition, relevant ombudsman cases are included. The book will be essential reference for staff and managers in health and social care settings, students, legal professionals and all those working to ensure good practice and compliance with the law.

Key Skills for Housing Adaptations delves into the crucial role occupational therapists play in helping people with additional needs adapt their homes in order to give them a better quality of life. Highlighting the long-term benefits environmental adjustments can afford, this accessible and practical book combines key skills needed to carry out home adaptations, from professional reasoning skills and cultural considerations to relevant legislation and the roles and remits of people working in the field. Supplemented with knowledge checks preceding every chapter, practical exercises, and case studies as well as digital resources including examples of architectural plans and videos that bring the theory to life, this is a comprehensive and essential tool for both new and seasoned occupational therapists looking to make a positive impact on clients' home lives.
The Rotarian [London] : Royal Institute of British Architects, Technical Information Service
This book provides a practically orientated resource that details the use a range of imaging techniques across major specialties plus those that are less well represented in standard textbooks (e.g. cardiothoracic surgery, palliative care, geriatric medicine, skin conditions from diverse ethnic groups). Emphasis is placed on enabling the reader to interpret images and clinical data, while avoiding mistakes and pitfalls in their day-to-day practice. Detailed question and answer sections along with insightful videos reinforce key messages (e.g. visualizing heart murmurs). Grading of questions aids navigation, with more difficult questions to benefit the high-flying students/junior doctors preparing for postgraduate exams/physician associates and advanced nurse practitioners working in a specialist area. Practical Guide to Visualizing Medicine: A Self-Assessment Manual concisely covers how to use imaging techniques in medicine, surgery, pediatrics, obstetrics and gynecology. It emphasizes the value of being able to accurately visualize signs and symptoms to make accurate diagnoses and provide patient-centered care. The added insight given from experienced medical educators on how to select an appropriate medical specialty makes this work critical for all trainee and early-

career medical practitioners and allied healthcare professionals.
Designing for the Disabled Jessica Kingsley Publishers
This book provides practitioners with the foundations onto which they can build their own understanding and practice within housing. It is based on two fundamental principles: the importance of homes becoming enabling environments, and promoting user-centred services. The authors argues that occupational therapists working in the distinct context of housing require additional background knowledge and professional skills to those used within healthcare settings. Explores a broad range of theory bases and developing practice within the area of occupational therapy in housing Presents a vast array of knowledge, research and experience Written by occupational therapists working as practitioners, educators and managers, alongside academics in the social policy and disability issues
Community Care Practice and the Law Jessica Kingsley Publishers
A practical understanding of the law is essential for all those involved in the manual handling of adults and children (as patients, clients or pupils), whether in 'hands-on', managing, commissioning or advisory roles. To this end, Manual Handling in Health and Social Care presents an accessible overview of manual handling legislation, legal case law, national guidance, policy and practice. Applicable primarily to England, Scotland and Wales, it covers both employee safety under the Manual Handling Operations Regulations and wider health and safety at work legislation, and also patient and client entitlement under community care, NHS and human rights legislation. A stand-alone overview of manual handling law and practice is followed by more in-depth material, in A-Z format and fully cross-referenced, which allows the reader to look up issues for quick access to further information. In particular, it contains an extensive collection of case law relevant to health and social care and digested in summary form. Topics include rehabilitation, risk assessment, care plans, equipment provision, documentation of decisions and cumulative strain injury. Addressing the tensions sometimes existing between the health and safety of employees, the needs and wishes of service users and limited resources, this book provides professionals, managers, front-line staff and legal advisers with an understanding of law as a useful and practical tool to assist in solutions to manual handling problems.

Shortlisted for the 2017 Carnegie Medal and selected for the Tom Fletcher Book Club, Sputnik's Guide to Life on Earth by Frank Cottrell-Boyce is an adventure about the Blythes: a big, warm, rambunctious family who live on a small farm and sometimes foster children. Now Prez has come to live with them. But, though he seems cheerful and helpful, he never says a word. Then one day Prez answers the door to someone claiming to be his relative. This small, loud stranger carries a backpack, walks with a swagger and goes by the name of Sputnik. The family all think Sputnik is a dog and chaos is unleashed as suddenly household items come to life — like a TV remote that fast-forwards people and a toy lightsaber that entertains guests at a children's party, until one of them is nearly decapitated by it — and Prez is going to have to use his voice to explain himself. As Sputnik takes Prez on a journey to finish writing his guidebook to Earth called Ten Things Worth Doing on Earth, each adventure seems to take Prez nearer to the heart of the family he is being fostered by, but they also take him closer to the day that he is due to leave them forever . . . This edition features fantastic cover artwork and black and white inside illustrations from the incredible Steven Lenton.
House Adaptations for People with Physical Disabilities Jessica Kingsley Publishers
Education about multiple sclerosis has traditionally been medically oriented and related to disease and dysfunction. In contrast, this brand-new second edition of the Guide continues to focus on staying well in the presence of MS, a disease that - while incurable - can be managed. The book covers a broad spectrum of topics related to MS and its effects, focusing especially on the needs of those who have been living with the disease for some time. Practical tips on self-care are designed to promote maximum independence, well-being, and productivity. The theme of the book - wellness - can be described by the acronym: Weighing options; Eating well; Living to your fullest; Learning new skills; Needing others; Evaluating situations realistically; Surviving stress; and Staying responsible. Contributors to the book are professionals who have a specialty or a special interest in MS. Their suggestions, advice, and strategies come from years of experience in the field. It is their hope that readers will come away with fresh ideas on how to cope with the ever-changing challenges of MS.

The popular press has taken notice of two current trends in housing arrangements: three-generation households, and twenty-somethings staying at home longer. These are not separate trends, but part of a larger nationwide cultural shift to extended families reuniting. Together Again: A Creative Guide for Successful Multigenerational Living is intended to make this cultural shift go smoothly. Topics covered include the financial and emotional benefits of living together; proximity and privacy; designing and remodeling your home to accommodate adult children or elderly parents; overcoming cultural stigmas about independent living; financial and legal planning; and making co-habitation agreements.

This third edition of Community Care Practice and the Law has been substantially rewritten and restructured to reflect the rapid legal and policy changes affecting the community care field. It

provides comprehensive and jargon-free explanations of both community care legislation and other areas of the law directly relevant to practitioners. Topics covered include:

- assessment and eligibility criteria ('fair access to care') and waiting times
- placing people in care homes
- non-residential, domiciliary and home care services
- carers' assessments and services
- home adaptations and disabled facilities grants
- * direct payments
- * continuing health care and health services generally, including community equipment services
- * joint working between local authorities and the NHS
- * single assessment process, intermediate care
- * decision making capacity and incapacity
- * information sharing
- * adult protection
- * human rights and disability discrimination
- * health and safety at work legislation including manual handling people subject to immigration control, including asylum seekers care standards.

Numerous examples of legal cases and ombudsman investigations clearly illustrate the practical impact of legislation on community care. A separate chapter provides an at-a-glance view of the whole range of legislation underpinning the everyday work of practitioners. The author also identifies the underlying mechanisms, tensions and problems affecting community care law and practice. Primarily covering England in detail, much of the legal case law covered and the legal principles involved are of general relevance across the United Kingdom, and where material is not directly applicable to Wales, Scotland and Northern Ireland, short summaries offer general pointers for the position in these three countries. This book is an essential guide for practitioners and managers in both the statutory and voluntary sectors, policy makers in local and central government, advocates, lawyers and social work students.
