This book provides practitioners with the foundations onto which they can build their own understanding and practice within housing. It is based on two fundamental principles: the importance of homes becoming enabling environments, and promoting user-centred services. The authors argues that occupational therapists working in the distinct context of housing require additional background knowledge and professional skills to those used within healthcare settings. Explores a broad range of theory bases and developing practice within the area of occupational therapy in housing Presents a

vast array of knowledge, research and experience Written by occupational therapists working as practitioners, educators and managers, alongside academics in the social policy and disability issues *STAIR (structural Analysis Interpretive Routine) Instruction Manual* John Wiley & Sons This fourth edition of *Community Care Practice and the Law* has been fully updated to reflect the rapid and continuing legal, policy and practice changes affecting community care. It provides comprehensive and jargon-free explanations of community care legislation, as well as other areas of law directly relevant to practitioners, including the NHS, disabled facilities grants and housing adaptations, asylum and immigration, mental capacity, human rights, disability discrimination, health and safety at work and negligence – and a range of legal provisions relevant to the protection and safeguarding of adults. Apart from the burgeoning legal case law and ombudsman investigations, changes from the last edition include coverage of the Mental Capacity Act 2005, legal implications of 'self directed care' and 'individual budgets', changes to direct payments and 'ordinary residence' determinations. In particular, new guidance applies to the high profile issue of NHS continuing health care. The book is an essential guide for practitioners and managers in both the statutory and voluntary sectors, policy makers in local authorities and the NHS, advocates, lawyers and social work students.

The #1 New York Times bestseller from “America’s historian-in-chief” (New York magazine) *An Unfinished Love Story: A Personal History of the 1960s* by Doris Kearns Goodwin, one of America’s most beloved historians, artfully weaves together biography, memoir, and history. She takes you along on the emotional journey she and her husband, Richard (Dick) Goodwin embarked upon in the last years of his life. Dick and Doris Goodwin were married for forty-two years and married to American history even longer. In his twenties, Dick was one of the brilliant young men of John F. Kennedy’s New Frontier. In his thirties he both named and helped design Lyndon Johnson’s Great Society and was a speechwriter and close advisor to Robert Kennedy. Doris Kearns was a twenty-four-year-old graduate student when selected as a White House Fellow. She worked directly for Lyndon Johnson and later assisted on his memoir. Over the years, with humor, anger, frustration, and in the end, a growing understanding, Dick and Doris had argued over the achievements and failings of the leaders they served and observed, debating the progress and unfinished promises of the country they both loved. The Goodwins’ last great adventure involved finally opening the more than three hundred boxes of letters, diaries, documents, and memorabilia that Dick had saved for more than fifty years. They soon realized they had before them an unparalleled personal time capsule of the 1960s, illuminating public and private moments of a decade when individuals were powered by the conviction they could make a difference; a time, like today, marked by struggles for racial and economic justice, a time when lines were drawn and loyalties tested. Their expedition gave Dick’s last years renewed purpose and determination. It gave Doris the opportunity to connect and reconnect with participants and witnesses of pivotal moments of the 1960s. And it gave them

both an opportunity to make fresh assessments of the central figures of the time—John F. Kennedy, Jacqueline Kennedy, Martin Luther King Jr., Robert Kennedy, Eugene McCarthy, and especially Lyndon Johnson, who greatly impacted both their lives. The voyage of remembrance brought unexpected discoveries, forgiveness, and the renewal of old dreams, reviving the hope that the youth of today will carry forward this unfinished love story with America.

STAIR (structural Analysis Interpretive Routine) Instruction Manual Rowman & Littlefield

One of the world's great cities, Florence is visited by over six million tourists each year, yet, despite some recent improvements in accessibility, the Cradle of the Renaissance still presents significant barriers. Imagine lunch in an outdoor caf, soaking up the warm September sun, where do you find an accessible restroom? Where to eat in a country whose main staples are bread, pizza, and pasta if you have an intolerance to wheat gluten? In which museums can you touch a Renaissance sculpture if you are visually impaired? Need to rent a wheelchair or find which museums have them on loan? Locate an accessible hotel with a roll-in shower? Find out if your power wheelchair will fit in the elevator of the Uffizi? Or discover the wheelchair-accessible paths in the Boboli Gardens? Reading *A Guide to Accessible Florence*, an indispensable resource written especially, but not only, for wheelchair or scooter users and slow walkers, will give you the answers to all these questions and to many more.

As the nation reels from the impact of the Great Recession, many families are finding new ways to live together, including creating multigenerational households to save money and consolidate resources. Indeed, as the authors point out, the concept of nuclear family living is an aberration in our history that stemmed from post-World War II prosperity, mobility, and the associated baby boom. However, the threatened failure of American social security and healthcare systems is forcing us all to rethink how we live and care for one another. This book covers the financial and emotional benefits of living together, proximity and privacy, designing and remodeling your home to accommodate adult children or elderly parents, overcoming cultural stigmas about interdependent living, financial and legal planning, and making cohabitation agreements.

This book for architects, interior designers, building managers, students, conference organisers looks at first principles to provide the user with the 'tools' to make their own decisions rather than a 'cookbook' approach. It is intended that designs and product information can be taken straight from the manual and inserted into ongoing projects. For the first time the book considers the needs of people with visual, hearing and mental disabilities, who make up the majority of disabled people in the population, alongside those of people with physical mobility disabilities. Practical low cost solutions to retro-fitting existing buildings are discussed, as well as the methods used to assess the suitability of an existing building, and assembling a project to improve access for disabled people. Specific products and designs are illustrated and discussed - with full working technical drawings, and full specification details. These will reduce considerably the research time needed to produce a cost-effective solution that will improve access for disabled people. A perspective of the standards and legislation dealing with access issues in the UK is compared with those in other countries, and the standards mentioned are compared with the realities of practical implementation carried out in 4 years of design in this area.

Manual Handling in Health and Social Care is written for all those involved in the manual handling of adults or children - including those carrying it out, assessors, managers and commissioners. It lays out the current legal requirements in a non-technical way and includes case studies illustrating the law applied in practice, across health, social care and sometimes educational settings. The book applies to England, Scotland, Wales and Northern Ireland. An extended introduction sets out challenges, past, present and future, including safety, balancing risk with duties to meet people's needs, human rights, avoidance of blanket policies, mental capacity, safeguarding, the limited resources of statutory services and single-handed care. It also considers some of the legal implications of increased use of technology (including remote assessment), as well as

the "mechanisation" of care and its application to manual handling. The main part of the book is in the form of an A-Z guide, providing quick access to relevant legislation and common law (negligence) rules applying to personal injury cases. It covers also, extensively, judicial review legal challenges to decisions, when people and their families disagree with manual handling decisions that have been made. In addition, relevant ombudsman cases are included. The book will be essential reference for staff and managers in health and social care settings, students, legal professionals and all those working to ensure good practice and compliance with the law.
