John Vigor turns the spotlight on twenty seaworthy sailboats that are at home on the ocean in all weather. These are old fiberglass boats, mostly of traditional design and strong construction. All are small, from 20 feet to 32 feet overall, but all have crossed oceans, and all are cheap. Choosing the right boat to take you across an ocean or around the world can be confusing and exasperating, particularly with a tight budget. Vigor sets out to remedy that in this book. He compares the designs and handling characteristics of 20 different boats whose secondhand market prices start at about \$3,000. Interviews with experienced owners (featuring valuable tips about handling each boat in heavy weather) are interspersed with line drawings of hulls, sail plans, and accommodations. Vigor has unearthed the known weaknesses of each boat and explains how to deal with them. He rates their comparative seaworthiness, their speed, and the number of people they can carry in comfort. If you have ever dreamed the dream this book can help you turn it into reality.

The philosophical and political development that converted Georg Lukács from a distinguished representative of Central European aesthetic vitalism into a major Marxist theorist and Communist militant has long remained an enigma. In this absorbing scholarly study, Michael Löwy for the first time traces and explains the extraordinary mutation that occurred in Lukács's thought between 1909 and 1929. Utilizing many as yet unpublished sources, Löwy meticulously reconstructs the complex itinerary of Lukács's thinking as he gradually moved towards his decisive encounter with Bolshevism. The religious convictions of the early Lukács, the peculiar spell exercised on him and on Max Weber by Dostoyevskyan images of pre-revolutionary Russia, the nature of his friendships with Ernst Bloch and Thomas Mann, are amongst the discoveries of the book. Then, in a fascinating case-study in the sociology of ideas, Löwy shows how the same philosophical problematic of Lebensphilosophie dominated the intelligentsias of both Germany and Hungary in the pre-war period, yet how the different configurations of social forces in each country bent its political destiny into opposite directions. The famous works produced by Lukács during and after the Hungarian Commune—Tactics and Ethics, History and Class Consciousness and Lenin—are analysed and assessed. A concluding chapter discusses Lukács's eventual ambiguous settlement with Stalinism in the thirties, and its coda of renewed radicalism in the final years of his life.

'Blind Chart Analysis' is a procedure in which an astrologer predicts the past events and present condition of a native only by looking into the horoscope, without having a prior knowledge about the native. Astrologers practice this method for many reasons: for birth-time rectification, to bring faith in the client about the efficacy of astrology, to test the astrological techniques, to find out which method suits best for the given case, and to demonstrate his/her predictive abilities. To do blind chart analysis successfully an astrologer should have very sound knowledge of the subject, vast experience, good intuition and a bit of luck also. This book presents 100 cases of Blind Chart Analysis of people who approached the author for astrological consultation. This is a book, first of its kind, where the author demonstrates the method of Blind Chart Analysis by explaining the astrological reasons for the queries he asked the natives and for the responses he got. This work impresses the reader about the power and utility of Jyotisha in general and Nandi Naadi methods in particular. A must for anyone who wishes to gain command over the art of prediction.
