Move Over 1024 × 768: The Most Popular Screen Resolution On ...  
The guidelines we use, which seem to be fairly widely used and are backed up by the figures that we get from Google Analytics, are to design the site so that it will work on a screen that is 1024 pixels wide and 768 pixels high (1024x768 and 1280x800 are the most common resolutions we see, accounting for at least 70% of all traffic).

*Screen Resolution Stats Worldwide | StatCounter Global Stats*

To save you doing the math, 77,636 visitors had screen resolutions over 1024×768, with 9,425 of visitors using 1024×768 screen resolution. 87% of visitors accounted for with no sign of anything lower. On to ranks 10 – 20. The 72 PPI Web And Screen Resolution Myth  
W3Schools' statistics may not be relevant to your web site. Different sites attract different audiences. Some web sites

attract developers using professional hardware, while other sites attract hobbyists using older computers. Anyway, data collected from W3Schools' log-files over many years clearly shows the long term trends.  
browser - Recommended website resolution (width and height ...  
Our design studio clients often ask as what is the ideal image resolution for web or for print. Images on screen are made of colored squares called pixels. Ideal screen image resolution (detail an image holds) is 72 pixels per inch. If an image is less than 72ppi, it will appear fuzzy (what we call pixelated).

Standard Resolution For Web Design

The ultimate guide to image resolution

| Creative Blog

Two different displays, each with two different screen resolutions (109 ppi and 133 ppi), both considerably higher than 72 ppi which, according to many people today, remains the industry standard resolution for viewing images on

the web and on screen.

Browser Display Statistics

This was most definitely one of the first questions I had as a young(ish) web designer with an interest in web accessibility almost 20 years ago. Based on the Worldwide Screen Resolution Stats (Nov 2018 - Nov 2019) chart above and the charts below, these are the resolutions you need to be aware of in 2020. 360x640 - 14.49%

*Website Dimensions - The Resource for New Webdesigners.*

In this case, anything larger than 7 inches is usually displayed at desktop resolution

---

or- Use breakpoints (defined pixel widths that the display will adjust layout based on screen size) dependent upon the design and layout. Sometimes, a developer might choose to combine both methods if they deem it necessary.

What Is The Best Screen Size to Design Websites in 2020

To effectively use Windows 8's Metro user interface, for example, 1366x768 is the minimum resolution, though it will run on 1024x768 screens as well.

According to Microsoft's own statistics, only...

**Designing for the Web: Resolution and Size – SitePoint**

The prevailing wisdom in web has been to design for the most common

screen resolution that most people use and at the time of writing, it has been 1024 x 768 for quite a few years now. However,...
