While most TVs are physically quite large (40 to 65 inches is common) and have high resolutions (HD or 4k), designing for a 1080P TV that you view from 10 feet away is different from designing for a 1080p monitor sitting a foot away on your desk.

Website Dimensions - The Resource for New Webdesigners.

---

Our design studio clients often ask as what is the ideal image resolution for web or for print. Images on screen are made of colored squares called pixels. Ideal screen image resolution (detail an image holds) is 72 pixels per inch. If an image is less than 72ppi, it will appear fuzzy (what we call pixelated).
