Measuring History complements the cases presented in Wise Social Studies Practices (Yeager & Davis, 2005). Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state-level testing. In this book, the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them. At the heart of Measuring History are cases of classroom teachers in seven states (Florida, Kentucky, Michigan, New York, Texas, Mississippi, and Virginia) where new social studies standards and new, and generally high-stakes, state-level history tests are prominent. In these chapters, the authors describe and analyze the state’s testing efforts and how those efforts are being interpreted in the

context of classroom practice. The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform. Catherine Horn (University of Houston) and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment, the research literature, and the technical qualities of history tests.

Classroom Motivation is a comprehensive introduction to the practical applications of research on academic motivation to teaching and learning. Though grounded in theory, the book is uniquely structured around instructional practices that teachers use daily in schools, such as rewards, group activities, academic tasks, student assessment, and parent interaction. This thoroughly revised third edition includes new content on interventions, mindsets, technologies, engagement, and social-emotional learning. Each chapter’s case studies, application exercises, and updated empirical findings will further connect preservice teachers with motivation in practice.
