ASSOCIATION OF TISSUE
BANKS STANDARDS FOR
TISSUE BANKING

INTRODUCTION Progress
in medical science and cell
biology has resulted in the
transplantation of human
cells and. tissue from one
human into another,
enhancing the quality of life
by restoring form and
function and facilitating
reproduction.

files.ctctcdn.com

A “ tissue bank ” is any
place, establishment, or
institution that collects,
processes, stores, or
distributes tissue for
purposes of
transplantation into
human beings. You will
need to apply for a
tissue bank license if you
perform any or all of the
four functions, namely

collection, processing,
storage, or distribution of
human tissue for ...

Standards ...**

Median AF volumes were
70 mL (range 10–815 mL; n
= 17). Fluid chemistries
were similar, but some
differences were noted in
HA levels and cytokine
profiles. Cytokine arrays
revealed that an average of
 304 ± 20 of 400 proteins
tested were present in AF
with a majority of cytokines
associated with host
defense.

Exceptional quality standards are

maintained by LifeLink Tissue Bank to provide for the safety and clinical effectiveness of musculoskeletal allografts and to ensure patient protection. All phases of processing adhere to the guidelines and standards of the American Association of Tissue Banks (AATB) and the U.S. Food and Drug Administration (FDA).

Standards for Tissue

Banking : Aatb : 9780000497024

Cellular and birth tissues have no FDA-established standards, and as such the temperatures are established by the tissue bank. 1. Lyophilized tissue, commonly referred to as "freeze dried tissue," is tissue that has been dehydrated for storage by converting the water to gas under a vacuum that extracts moisture.

Overview and Updates - 13th Edition of Standards - AATB

DEVELOPMENT OF TISSUE BANK. Research in the field of tissue

preservation at low temperature and high clinical success of transplanted tissue led to increase in the use of stored tissue in major burn and trauma patients. Increased demand of allografts resulted in the establishment of in house tissue banking activity at major burns center(s).
