From the author of *Guns, Germs and Steel*, Jared Diamond's *Collapse: How Societies Choose to Fail or Survive* is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's work' - Sunday Times

A military Sci-Fi political thriller set a short decade from now. In 2031, holding to the concept of Individual Liberty can get you killed. Western Civilization is in collapse, a process led and driven by the world's leading supposed democracies, our own included. What was once the western world's guiding light of Liberty is quickly being replaced by state sponsored serfdom under the guise of a global economic re-set done in the name 'the workers.' The people of The Program have seen the unfettered growth of government power coming for decades and they've worked in secret since the 1950's on engineering their way around and through the multiverse established by Quantum theory. They aren't perfect and they've lost the political fight to the left's government power and to the right's corporate statism. The world's people have been force fed a political chasm between left and right for so long they don't recognize that the governments themselves drive this supposed battle while ensnaring everyone. Those that see the truth, people from nearly every country on the planet, have banded together in secret knowing they can't win. Not on this world. They're leaving... .. but new destinations rarely mirror the guide book. The thing about a new empty world is that they may not be the only ones willing to fight for it. A debut novel, the first in a series from a former CIA operations officer who has decided that his lifelong writing habit/hobby/obsession is more fun than "real" work. "Finally an author that doesn't pull punches..." - Amazon reviewer "It's 4 am, and I'm not going to work - just finished one of the best books I've read in years..." - Amazon reviewer

During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. Why Evolution is True weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

A different kind of politics for a new kind of society--beyond work, scarcity and capitalism In the twenty-first century, new technologies should liberate us from work. Automation, rather than undermining an economy built on full employment, is instead the path to a world of liberty, luxury and happiness—for everyone.

Technological advance will reduce the value of commodities—food, healthcare and housing—towards zero. Improvements in renewable energies will make fossil fuels a thing of the past. Asteroids will be mined for essential minerals. Genetic editing and synthetic biology will prolong life, virtually eliminate disease and provide meat without animals. New horizons beckon. In Fully Automated Luxury Communism, Aaron Bastani conjures a vision of extraordinary hope, showing how we move to energy abundance, feed a world of 9 billion, overcome work, transcend the limits of biology, and establish meaningful freedom for everyone. Rather than a final destination, such a society merely heralds the real beginning of history.

In this provocative bestseller, Farley Mowat challenges the conventional notion that the Vikings were the first Europeans to reach northern Canada. Mowat offers instead an unforgettable portrait of the Albans, a race originating from the island now known as Britain. Battered by repeated invasions from their aggressive neighbours—Celt, Roman and Norse—the Albans boarded seaworthy, skin-covered boats and fled west. Their search for safety, and for the massive walrus herds on which their survival depended, took them first to Iceland, then to Greenland, and, finally, to the land now known as Newfoundland and Labrador. Skillfully weaving together clues gathered from forty years of research, Mowat presents a fascinating account of a forgotten history. The Farfarers affirms Mowat's status as one of Canada's most powerful chroniclers.
