BIOLOGY TWO DISSECTION THE STARFISH PHYLUM ECHINODERMATA ...
Echinoderms usually have five appendages (arms or rays), but there are some exceptions. Radial

symmetry means that the body is a hub, like a bicycle wheel, and tentacles are spokes coming out of it (think of a starfish). As larvae, echinoderms are bilaterally symmetrical. As they mature, they become radially symmetrical.

Starfish Dissection Answers

Observe the starfish and determine its symmetry. Locate the central disc in the center of the starfish. Count and record the number of arms or rays the starfish has. Locate the small, round hard plate called the madreporite on top of the central disc. Water enters through this into the water vascular system.
