Learn how to communicate inside and out with calm, confidence, and self-love no matter the circumstances. Calm and confidence are qualities that everyone—not just presenters and performers—wants and needs in their everyday lives. Confidence is important. But calm and confidence together are a magical and powerful combination. After years of struggling with communication in school, business, and public, Patricia Stark achieved this state of “calmfidence” not through some single moment of revelation, but through years of small insights, “aha” moments, and constant practice. Today, after helping thousands of students and clients find their own voices and abilities, Stark makes her methods available in Calmfidence—a comprehensive guide to improving your self-talk and communication

skills in any social interaction. Inspired by her coaching workshops of the same name, Calmfidence gathers a unique set of mental tools, experiential practices, and natural remedies for quelling the self-sabotaging habits of the Inner Critic. With warmth and compassion, Stark guides you in how to identify and overcome your blockages to communication, how to react skillfully to strong emotions as they arise, and how to deal with setbacks in your Calmfidence journey without self-judgment. You don’t need some rare talent to communicate well. When you engage with the exercises and encouragement in Calmfidence, you’ll learn how to stop surrendering to fear and become the calm and confident communicator who has always been waiting within.

The ultimate cheat sheet that sets out a  
workable and flexible plan for successful  
weight loss to fit every lifestyle and diet  
choice. In this “worst-case diet survival  
handbook”, nutritionist and founder of  
Foodtrainers™, Lauren Slayton offers  
strategies and tips to avoid the most

disastrous diet booby traps. Along with her  
no-nonsense nutrition and exercise advice,  
readers will discover that the missing  
component of most weight-loss schemes is  
planning. Planning to succeed and planning  
for the obstacles on the way to slim are as  
vital as what and when to eat and how to  
incorporate fat-burning activity into your  
day. All too many dieters give up when  
they hit a few road bumps created by  
work, family, socializing, travel, fatigue or  
indifference. Slayton comes to the rescue  
with:

- The Big 10 “Do-Not-Pass-Go” Basics, from high protein breakfast to “closing the kitchen” after dinner!
- Top Ten Things to Avoid to Get Healthy and Slim Down Fast

Spacecraft Systems Engineering Wolters Kluwer Law & Business

This new edition of the bestselling *Responding to Domestic Violence* explores the response to domestic violence today, not only by the criminal justice system, but also by public and non-profit social service and health care agencies. After providing a brief theoretical overview of the causes of domestic violence and its prevalence in our society, the authors cover such key topics as barriers to intervention, variations in arrest practices, the role of state and federal legislation, and case prosecution. Focusing on both victims and offenders, the book includes unique chapters on models for judicial intervention, domestic violence and health, and children and domestic violence. In addition, this edition provides an in-depth discussion of the concept of coercive control in domestic violence and its importance in understanding victim needs. Finally, this volume includes international perspectives in order to

broaden the reader's understanding of alternative responses to the problem of domestic violence.

5th International Conference on Digital Enterprise Technology Pearson Education

Following on from the hugely successful previous editions, the third edition of *Spacecraft Systems Engineering* incorporates the most recent technological advances in spacecraft and satellite engineering. With emphasis on recent developments in space activities, this new edition has been completely revised. Every chapter has been updated and rewritten by an expert engineer in the field, with emphasis on the bus rather than the payload. Encompassing the fundamentals of spacecraft engineering, the book begins with front-end system-level issues, such as environment, mission analysis and system engineering, and progresses to a detailed examination of subsystem elements which represent the core of spacecraft design - mechanical, electrical, propulsion, thermal, control etc. This quantitative treatment is supplemented by an appreciation of the

---

interactions between the elements, which deeply influence the process of spacecraft systems design. In particular the revised text includes \* A new chapter on small satellites engineering and applications which has been contributed by two internationally-recognised experts, with insights into small satellite systems engineering. \* Additions to the mission analysis chapter, treating issues of aero-manoeuvring, constellation design and small body missions. In summary, this is an outstanding textbook for aerospace engineering and design students, and offers essential reading for spacecraft engineers, designers and research scientists. The comprehensive approach provides an invaluable resource to spacecraft manufacturers and agencies across the world.
