Following on from the hugely successful previous editions, the third edition of Spacecraft Systems Engineering incorporates the most recent technological advances in spacecraft and satellite engineering. With emphasis on recent developments in space activities, this new edition has been completely revised. Every chapter has been updated and rewritten by an expert engineer in the field, with emphasis on the bus rather than the payload. Encompassing the fundamentals of spacecraft engineering, the book begins with front-end system-level

issues, such as environment, mission analysis and system engineering, and progresses to a detailed examination of subsystem elements which represent the core of spacecraft design - mechanical, electrical, propulsion, thermal, control etc. This quantitative treatment is supplemented by an appreciation of the interactions between the elements, which deeply influence the process of spacecraft systems design. In particular the revised text includes * A new chapter on small satellites engineering and applications which has been contributed by two internationally-recognised experts, with insights into small satellite systems engineering. * Additions to the mission analysis chapter, treating issues of aero-manoeuvring, constellation design and small body missions. In summary, this is an outstanding textbook for aerospace engineering and design students, and offers essential reading for spacecraft engineers, designers and research scientists. The comprehensive approach provides an invaluable resource to spacecraft manufacturers and agencies across the world.

Ask a Manager Penguin

The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people

won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

This new edition of the bestselling Responding to Domestic Violence explores the response to domestic violence today, not only by the criminal justice system, but also by public and non-profit social service and health care agencies. After providing a brief theoretical overview of the causes of domestic violence and its prevalence in our society, the authors cover such key topics as barriers to intervention, variations in arrest practices, the role of state and federal legislation, and case prosecution. Focusing on both victims and offenders, the book includes unique chapters on models for judicial intervention, domestic violence and health, and children and domestic violence. In addition, this edition provides an in-depth discussion of the concept of coercive control in domestic violence and its importance in understanding victim needs. Finally, this volume includes international perspectives in order to broaden the reader's

understanding of alternative responses to the problem of domestic violence.

Learn how to communicate inside and out with calm, confidence, and self-love no matter the circumstances. Calm and confidence are qualities that everyone—not just presenters and performers—wants and needs in their everyday lives. Confidence is important. But calm and confidence together are a magical and powerful combination. After years of struggling with communication in school, business, and public, Patricia Stark achieved this state of “calmfidence” not through some single moment of revelation, but through years of small insights, “aha” moments, and constant practice. Today, after helping thousands of students and clients find their own voices and abilities, Stark makes her methods available in Calmfidence—a comprehensive guide to improving your self-talk and communication skills in any social interaction. Inspired by her coaching workshops of the same name, Calmfidence gathers a unique set of mental tools, experiential practices, and natural remedies for quelling the

self-sabotaging habits of the Inner Critic. With warmth and compassion, Stark guides you in how to identify and overcome your blockages to communication, how to react skillfully to strong emotions as they arise, and how to deal with setbacks in your Calmfidence journey without self-judgment. You don't need some rare talent to communicate well. When you engage with the exercises and encouragement in Calmfidence, you'll learn how to stop surrendering to fear and become the calm and confident communicator who has always been waiting within.
