Autoguider - Colour The
Lodestar X2 - Colour is an
upgraded version of the very
popular Lodestar autoguider.
The original Lodestar uses the
ICX429 Exview chip from Sony
and offers excellent sensitivity.
However, Sony have now
upgraded the ICX429 to the
ICX829, with considerably
improved QE and read noise.

Starlight Xpress Lodestar Autoguider

Product information

The Lodestar X2 is the latest and most sensitive compact guide camera from Starlight Xpress - the successor to the standard Lodestar. It offers twice the sensitivity of the original Lodestar (hence X2 designation) making guide stars even easier to find. Autoguider output socket has been changed to an RJ12 connector.

Starlight Xpress Lodestar X2 Autoguider - Colour

For years, the Lodestar has been held in the highest regard as being the best autoguider on the market. The innovative minds at Starlight Xpress have been trying to improve on the iconic Lodestar since it's conception; however, this has proved to be very difficult to achieve - until now that is.

Starlightxpress Lodestar Autoguider

Starlight Xpress Lodestar X2 Autoguider

The Starlight Xpress Lodestar X2 is a very compact guider which is powered

and operated via a single USB2.0 computer connection. The Lodestar X2 also provides an opto-isolated output connection for direct control of most mounts via their Autoguider sockets.
