Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Reader's Choice W H Freeman & Company
This title is one in a series presenting four masterpieces by four immortal nineteenth-century French painters. Each miniature book faithfully reproduces its title painting on the front cover, and is packaged in a handsome slipcase that doubles as a picture frame. The frame can stand up on a desk or tabletop or be hung on the wall to display the book cover's striking painting. Each book's interior discusses its title painting, describing the artist's approach to his work, analyzing the picture's fine points, and showing close-up details from the painting. A final two-page spread presents a timeline capsule biography that lists significant events in the painter's life. Van Gogh--*Starry Night* shows and discusses Vincent Van Gogh's masterpiece, which is a mystically glowing nighttime landscape, and ranks today as one of the artist's most popular and beloved paintings.

[My List of Sins - I. Lust](#) Cambridge University Press
A New York Times Bestseller A National Book Award Finalist An IndieBound Bestseller This breathtaking, full-color illustrated fantasy is inspired by Chinese folklore, and is a companion to the Newbery Honor winner *Where the Mountain Meets the Moon*. Pinmei's gentle, loving grandmother always has the most thrilling tales for her granddaughter and the other villagers. However, the peace is shattered one night when soldiers of the Emperor arrive and kidnap the storyteller. Everyone knows that the Emperor wants something called the Luminous Stone That Lights the Night. Determined to have her grandmother returned, Pinmei embarks on a journey to find the Luminous Stone alongside her friend Yishan, a mysterious boy who seems to have his own secrets to hide. Together, the two must face obstacles usually found only in legends to find the Luminous Stone and save Pinmei's grandmother--before it's too late. A fast-paced adventure that is extraordinarily written and beautifully

illustrated, *When the Sea Turned to Silver* is a masterpiece companion novel to *Where the Mountain Meets the Moon* and *Starry River of the Sky*.

Available in Split Volumes *Universe: Stars and Galaxies, Fourth Edition, 1-4292-4015-6* *Universe: The Solar System, Fourth Edition, 1-4292-4016-4*

[Universe: The Solar System](#) W H Freeman & Company

It felt like I was part of a freak show, starring me as the witch, werewolf girl. Everybody looked at you, but they really don't see your pain or frustration. They don't really see my longing to be a part of them . . . the humans . . . the normal, and while all of that is going on I'm sitting in my little cage, hoping someone could come and save me, wishing that I can somehow break free from my pain and frustration and no longer have the longing to be one of them.

The *Starry Night* software is accessible via a download code accompanying the text.

[Starry Night Workbook with Starry Night College Software](#) Prentice Hall
Book has become an established text for teaching and reading to advanced ESL/EFL students.

The Connecticut School Journal Macmillan

Discovering the Universe: From the Stars to the Planets engages students with an inquiry-based exploration of the universe and the scientific process. Developed with a "big picture" approach, the text first explains how the stars, the galaxies, and the entire universe formed, and then discusses planets and other components of our solar system. Students follow this natural conceptual progression within a proven learning method designed to address misconceptions and build a deep understanding of science and the world around us.

Discovering the Universe Cambridge University Press

Photographs and simple text introduce early readers to the sun, moon, solar system, Milky Way, and other objects in space.

[Starry Night Workbook with Starry Night College Software](#) W. W. Norton

This is the only collection of its kind to focus on one of the most important aspects of the cultural history of the Romantic period, its sources, and its afterlives. Multidisciplinary in approach, the volume examines the variety of areas of enquiry and genres of cultural productivity in which the sublime played a substantial role during the late eighteenth and early nineteenth centuries. With impressive international scope, this Companion considers the Romantic sublime in both European and American contexts and features essays by leading scholars from a range of national backgrounds and subject specialisms, including state-of-the-art perspectives in digital and environmental humanities. An accessible, wide-ranging, and thorough introduction, aimed at researchers, students, and general readers alike, and including extensive suggestions for further reading, *The Cambridge Companion to the Romantic Sublime* is the go-to book on the subject.

[When the Sea Turned to Silver](#) University of Michigan Press ELT

Are we alone in the Universe? Was there anything before the Big Bang? Are there other universes? What makes stars shine? Where does Earth's water come from? Why is the night sky dark? Was there ever life on Mars? How do telescopes work? This engaging guide book answers all these questions and hundreds more, making it a practical reference for anyone who has ever wondered what is out in the cosmos, where it all comes from, and how it all works. Richly illustrated in color throughout, it gives simple yet rigorous explanations in non-technical language, summarizing current astronomical knowledge, without overlooking the important underlying scientific principles. This second edition includes substantial new material throughout, including the latest findings from the New Horizons, Rosetta, and Dawn space missions, and images from professional telescopes such as the Hubble Space Telescope and the Atacama Large Millimeter Array.
