Fairmont Press, Inc. America's favorite self-taught cook opens up about the most memorable moments of her life to date in this candid memoir-inspired cookbook featuring 125 recipes.

"Working in hospitality is hard on the body. But, if it's in you, if it's in your blood, kitchens are your happy place and food is as good for your soul as it is for feeding any appetite. Every nick of the knife, every burn and every ache and pain can go almost unnoticed and ultimately is more than worth it. At fifty, I could be better looking but I couldn't be more fulfilled." As her fiftieth birthday approached, the woman who taught America how to get

dinner on the table, fast, started thinking, not just about what to make for dinner, but how her passion for food and feeding people developed over a lifetime. Where did it come from? How did it grow? Where will it take her next? Now, Rachael Ray reveals how her mother and Italian grandfather instilled in her a strong work ethic, problem solving skills, and overall love of cooking, and how her time as a dish washer and soda fountain girl shaped her work philosophy; why muggings at gunpoint (two!) eventually led to her career in television, and how competing (and winning) on Iron Chef turned out to be one of the hardest days of her life; plus tales of the friends

she's made along the way, like Oprah, Michelle Obama, Jacques Pepin, and many others. Peppered throughout is her kitchen and life wisdom, along with her philosophy on how we can better serve the world and each other. The accompanying recipes range from all-time favorite recipes and meals to unexpected dishes like French cuisine, her endeavors into baking, and some of her husband John's tasty cocktails. They include- Bavette with Green Peppercorn Sauce Verte, Smoked Oysters with Lemon-Horseradish Mignonette, Mushroom and Chard Crostata, Brown Butter Balsamic Ravioli, Beet Arancini, Nduja Deviled Eggs, Stone

---

Fruit Galette, Negroni Freeze, and a serious Porchetta. Plus favorite recipes for your pets! Complete with gorgeous food shots, personal collection photos, and Rachael's own hand-drawn illustrations, this is a revealing and intimate glimpse into Rachael's world and her every day inspiration.

"Dawn, Tobin, and Bismark awaken one evening to a disaster: all of the forest's pomelos have been mysteriously poisoned! As the Nocturnal Brigade sets

out to investigate, they encounter Iris, a mysterious aye-aye, who claims monsters from the moon are to blame. While the three heroes suspect a more earthly explanation, the animals of the valley are all falling ill. And then Tobin gets sick, too! The Nocturnal Brigade must race to find answers, and the cure, before the pomelo blight

threatens to harm them all."

The Go-between Harper Collins Since the time of Galileo, astronomy has been driven by technological innovation. With each major advance has come the opportunity and enthusiasm to survey the sky in a way that was not possible before. It

is these surveys of discovery that are the subject of this book. In the first few chapters the author discusses what astronomers learned from visible-light surveys, first with the naked eye, then using telescopes in the seventeenth century, and photography in the nineteenth century. He then moves to the second half of the twentieth century when the skies started to be swept by radio, infrared, ultraviolet, x-ray and gamma ray telescopes, many of which had to be flown in satellites above the Earth’s atmosphere. These surveys led to the discovery of pulsars, quasars,

---

molecular clouds, protostars, bursters, and black holes. He then returns to Earth to describe several currently active large-scale projects that methodically collect images, photometry and spectra that are then stored in vast publicly-accessible databases. Dr. Wynn-Williams also describes several recent “microsurveys” – detailed studies of small patches of sky that have led to major advances in our understanding of cosmology and exoplanets.

has been an interesting life -

one that took him to Oxford, movie and political journalism, television and magazines - and he depicts it with the silky polish his readers expect of him. In *A Rude Life*, he turns his dispassionate observer's gaze on himself, and in taut prose tells us about all that he's experienced, and nothing more for he's still a private man. He unhurriedly recounts memories from his childhood and college years, moving on

to give us an understanding of how he wrote his biggest stories, while giving us an insider's view into the politics and glamour of that time. This is an explosively entertaining memoir that details one of the most eventful careers in Indian journalism. Studded with a cast of unforgettable characters like Morarji Desai, Giani Zail Singh, Amitabh Bachchan, Dhirubhai Ambani and a host of other prominent

But how did the conflict begin? Why did it move from its initial origins in Postwar Europe to encompass

virtually every corner of the globe? And why, after lasting so long, did the war end so suddenly and unexpectedly? Robert McMahon considers these questions and more, as well as looking at the legacy of the Cold War and its impact on international relations today. *The Cold War: A Very Short Introduction* is a truly international history, not just of the Soviet-American struggle at its heart, but also of the waves of decolonization, revolutionary nationalism, and state formation

that swept the non-Western world in the wake of World War II. McMahon places the 'Hot Wars' that cost millions of lives in Korea, Vietnam, and elsewhere within the larger framework of global superpower competition. He shows how the United States and the Soviet Union both became empires over the course of the Cold War, and argues that perceived security needs and fears shaped U.S. and Soviet decisions from the beginning—far more, in fact, than did their economic and territorial ambitions. He

---

unpacks how these needs and fears were conditioned by the divergent cultures, ideologies, and historical experiences of the two principal contestants and their allies. Covering the years 1945-1990, this second edition uses recent scholarship and newly available documents to offer a fuller analysis of the Vietnam War, the changing global politics of the 1970s, and the end of the Cold War. In these inviting pages, "Night Sky Guy" Andrew Fazekas takes an expert but easygoing approach that will delight would-be astronomers of all levels. Essential information, organized logically, brings the solar system, stars, and planets to life in

your own backyard. Start with the easiest constellations and then "star-hop" across the night sky to find others nearby. Learn about the dark side of the moon, how to pick Mars out of a planetary lineup, and which kinds of stars twinkle in your favorite constellations. Hands-on tips and techniques for observing with the naked eye, binoculars, or a telescope help make the most out of sightings and astronomical

phenomena such as eclipses and meteor showers. Photographs and graphics present key facts in an easy-to-understand format, explaining heavenly phenomena such as black holes, solar flares, and supernovas. Revised to make skywatching even easier for the whole family, this indispensable guide shines light on the night sky--truly one of the greatest shows on Earth! *'Moralia' Themes in the 'Lives'*,
