American Elections in a Divided Landscape West Academic Publishing
The 8th Edition continues earlier editions's focus on the critical roles played by states and local governments and the complex structure of our state-local system. It challenges students to understand the competing models of local government that frame the field. It then takes that theoretical analysis to the hands-on questions

of local government formation and boundary change; home rule and state-local disputes; interlocal conflict and regional governance; spending, tax and debt limits; and service delivery. This Edition contains a new treatment of fiscal distress and municipal bankruptcy, and examines the state and local roles in such cutting edge issues as fracking, school finance, promoting social and economic equity, and economic development.

The material contained in this publication is the outcome of the 8th International Conference on Human Rights "Right to Knowledge and Information in Heterogenic Society", organized by the Faculty of Law and Administration in the University of Warmia and Mazury in Olsztyn (Poland), in cooperation with the Faculty of Law in the University of Bari (Italy), which took place on 30-31 May 2008 in Olsztyn. The selection of issues in no respect can be called accidental. The summit of the European Council in Lisbon in March 2000 created foundations for creating society based on knowledge

Individual actions of countries should aim at creating a human-friendly "information society" which allows creation of new working places and developing information and telecommunication technologies. This broad spectrum of problems which were the subject of the conference, interests not only Polish researchers but also scientists from countries like Italy, Spain, Ukraine, the United States of America, United Kingdom, and South Korea. They represent various cultures, which implies differences of opinion on many issues related to human rights. Publications included in this collective work are the reflection of freedom to express thoughts on difficult topics, which are important for all though.

sufficiently disclose information to interested stakeholders, whether standards will be uniform across state lines, and whether disclosure systems will be integrated nationally.
