While leaders may desire or have been told that they must put certain structures into place in order to enhance their leadership capabilities, they may not know exactly what structures are needed, or the skills that are required for implementation. Authors Michael Fullan and Lyle Kirtman go beyond simply telling you what you need to put in place to enhance leadership—they detail the route to successful leadership. Coherent School Leadership will show you how to combine the components of Fullan's Coherence Framework (the Framework) with Kirtman's 7 Competencies for Highly Effective Leaders (the Competencies) to drive coherence—the shared depth of understanding about the nature of the work and how it impacts the results desired for student achievement—to change the culture in schools from reactive to proactive. Fullan and Kirtman, whose work is based in practice, will:

- Show you how to use specific competencies to drive coherence
- Provide examples that show how other leaders have successfully created coherence
- Guide you through the day-to-day distractions/stresses so that you can stay on course
- Show you how to use the Competencies in relation to the Framework

Taking a world view of the forces that could destabilize education and the work of coherence, Coherent School Leadership will show how proven frameworks such as the Framework and the Competencies can help you cope with even the most complex scenarios.

Practical, effective, evidence-based reading interventions that change students' lives Essentials of Understanding and Assessing Reading Difficulties is a practical, accessible, in-depth guide to reading assessment and intervention. It provides a detailed discussion of the nature and causes of reading difficulties, which will help develop the knowledge and confidence needed to accurately assess why a student is struggling. Readers will learn a framework for organizing testing results from current assessment batteries such as the WJ-IV, KTEA-3, and CTOPP-2. Case studies illustrate each of the concepts covered. A thorough discussion is provided on the assessment of phonics skills, phonological awareness, word recognition, reading fluency, and reading comprehension. Formatted for easy reading as well as quick reference, the text

includes bullet points, icons, callout boxes, and other design elements to call attention to important information. Although a substantial amount of research has shown that most reading difficulties can be prevented or corrected, standard reading remediation efforts have proven largely ineffective. School psychologists are routinely called upon to evaluate students with reading difficulties and to make recommendations to address such difficulties. This book provides an overview of the best assessment and intervention techniques, backed by the most current research findings. Bridge the gap between research and practice Accurately assess the reason(s) why a student struggles in reading Improve reading skills using the most highly effective evidence-based techniques Reading may well be the most important thing students are taught during their school careers. It is a skill they will use every day of their lives; one that will dictate, in part, later life success. Struggling students need help now, and Essentials of Understanding and Assessing Reading Difficulties shows how to get these students on track.

The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources. It is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in agriculture as well as in other sectors. SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food security and poverty, and climate change. This is the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions.
