British Murder Mystery: Ultimate Collection (Over 350 Detective Novels, Thriller Tales & True Crime Stories) Sterling

When the car driven by insurance tycoon Neil Barraclough swerves off the road, killing both him and his much younger wife Ellen, it is written off as yet another unfortunate road accident. But when temperamental Yorkshire detective Steven Norfolk takes a closer look, a more sinister cause is discovered. As he digs deeper into the business and social activities of the dead businessman, Norfolk unwraps an intricate web of companies in which the Barracloughs have primary but conflicting roles. Norfolk's enquiries lead him to the London headquarters of the couple's separate companies where he and his long-suffering offsider, Hannah Barbury, encounter a closely-knit team of young actuaries juggling with data and statistics to squeeze maximum profits from insurance premiums charged by the couple's companies. But the friendships and liaisons among these ambitious executives gradually unravel to reveal far more devious and deceitful agendas. When the head actuary falls victim to another suspicious road accident, Norfolk plunges into a world where mortality rates take on an entirely new meaning, data is distorted and murder is the only solution ... P J Sweeting has created a slow-burn murder mystery that takes readers into a world of statistics and data - and how they can be distorted and misused. P.J. Sweeting has worked as an actuary in London for over 20 years. As well as being a Fellow of the Institute and Faculty of Actuaries, he is a Professor of Actuarial Science. He is regularly invited to speak by universities and professional bodies around the world on risk, investment and demographics. He is also a Fellow of the Chartered Institute for Securities and Investment, the Royal Statistical Society and the Royal Society of Arts. He has published a number of academic papers and one text book, Financial Enterprise Risk Management , which is used in to teach risk management in over 20 countries. Figures of Death is his first novel. Endeavour

Why Some Men Kill; Or, Murder Mysteries

Revealed John Wiley & Sons

A body appeared mysteriously in the trash can...Excerpt Henry Columbus, khaki clad, his ebon face gray with ashes and dust, and driver of one of those two-wheeled abominations maintained by the municipality of New York for the reception of rubbish and the dispersal of dust over passengers, was industriously emptying the ash cans on the north side of West 85th Street. It was a charming spring morning, and Henry, well content with the world and himself, was whistling cheerily while he worked. As he rolled the battered iron containers to the curb, and raising them, dumped their contents into his vehicle, he glanced at the miscellaneous odds and ends that poured from them, ever on the watch for some discarded but still serviceable article which he might salvage. Farther down the street, and working east from Amsterdam Avenue on the opposite side of the thoroughfare, was Tony Celentano with his wagon. Like Henry, the Italian was also on the alert for chance treasure-trove among the rubbish. As the dusky namesake of the famous discoverer reached the group of cans before a block of brown-stone front houses, he noticed that one of the receptacles was filled to overflowing with a bulging, patched, burlap bag. Whatever the contents were they were heavy, and wondering vaguely what the can contained, Henry heaved it over the edge of his cart. The bag however, was tightly jammed into the can, and, in order to dislodge it, he was forced to clamber onto the half-filled wagon. Grumbling a bit at the extra labor involved, he grasped the sacking with a huge black paw and tugged at the bundle.

We may regard ourselves as the most advanced species on the planet, but have we really reached our optimum design? Isn't there always room for improvements? Before you answer, let noted evolutionary biologist George C. Williams remind you of both the exquisite adaptations and absurd maladaptations nature has bestowed upon us, the self-proclaimed "pinnacle of evolution." Picking up where Darwin left off, Williams combines philosophical perspective and scientific method to provide a foundation for the answers to some fascinating questions. He explains why our bodies have to deteriorate so disastrously with old age. He gives us logical reasons to explain why we crave foods like sugar and fat that have been proven time and again to be detrimental to our health. And Williams single-handedly deflates our Homo sapiens sapiens ego with such insights as: Our eyesight—it may seem superior, but not when compared to that of the invertebrate squid, whose eye has developed over time to prove more efficient than ours. And wouldn't it make more sense to have a third eye, located on the back of the head? We could have stereoscopic vision in front and rear-vision warning us of danger sneaking up behind. Rear-view mirrors would become a thing of the past. And why stop at three eyes? This fascinating new book is markedly different from all previous work on evolutionary biology. Using the pony fish and its luminescent abdomen as the perfect evolutionary mystery, Williams explores the intricacies of nature's designs. Rather than telling us how or why the pony fish got its light, Williams explains the functional reasons why the pony fish keeps its light. He also

explains why our species keeps arbitrary or malfunctioned features like the reproductive and excretory systems' sharing of parts. George C. Williams, one of today's most qualified evolutionary biologists, has written an important, entertaining, and thought-provoking addition to a science that has captivated the world for almost 150 years.

Murder Most Puzzling Bloomsbury Publishing

Excerpt It has long been a source of wonder to me why the leading criminological writers--men like Edmund Lester Pearson, H. B. Irving, Filson Young, Canon Brookes, William Bolitho, and Harold Eaton--have not devoted more space to the Greene tragedy; for here, surely, is one of the outstanding murder mysteries of modern times--a case practically unique in the annals of latter-day crime. And yet I realize, as I read over my own voluminous notes on the case, and inspect the various documents relating to it, how little of its inner history ever came to light, and how impossible it would be for even the most imaginative chronicler to fill in the hiatuses. The world, of course, knows the external facts. For over a month the press of two continents was filled with accounts of this appalling tragedy; and even the bare outline was sufficient to gratify the public's craving for the abnormal and the spectacular. But the inside story of the catastrophe surpassed even the wildest flights of public fancy; and, as I now sit down to divulge those facts for the first time, I am oppressed with a feeling akin to unreality, although I was a witness to most of them and hold in my possession the incontestable records of their actuality. Of the fiendish ingenuity which lay behind this terrible crime, of the warped psychological motives that inspired it, and of the strange hidden sources of its technic, the world is completely ignorant. Moreover, no explanation has ever been given of the analytic steps that led to its solution. Nor have the events attending the mechanism of that solution--events in themselves highly dramatic and unusual--ever been recounted. The public believes that the termination of the case was a result of the usual police methods of investigation; but this is because the public is

unaware of many of the vital factors of the crime itself, and because both the Police Department and the District Attorney's office have, as if by tacit agreement, refused to make known the entire truth--whether for fear of being disbelieved or merely because there are certain things so terrible that no man wishes to talk of them, I do not know. The record, therefore, which I am about to set down is the first complete and unedited history of the Greene holocaust. I feel that now the truth should be known, for it is history, and one should not shrink from historical facts. Also, I believe that the credit for the solution of this case should go where it belongs. The man who elucidated the mystery and brought to a close that palimpsest of horror was, curiously enough, in no way officially connected with the police; and in all the published accounts of the murder his name was not once mentioned. And yet, had it not been for him and his novel methods of criminal deduction, the heinous plot against the Greene family would have been conclusively successful. The police in their researches were dealing dogmatically with the evidential appearances of the crime, whereas the operations of the criminal were being conducted on a plane quite beyond the comprehension of the ordinary investigator. This man who, after weeks of sedulous and disheartening analysis, eventually ferreted out the source of the horror, was a young social aristocrat, an intimate friend of John F.-X. Markham, the District Attorney. His name I am not at liberty to divulge, but for the purposes of these chronicles I have chosen to call him Philo Vance. He is no longer in this country, having transferred his residence several years ago to a villa outside of Florence; and, since he has no intention of returning to America, he has acceded to my request to publish the history of the criminal cases in which he participated as a sort of amicus curiæ. Markham also has retired to private life; and Sergeant Ernest Heath, that doughty and honest officer of the Homicide Bureau who officially handled the Greene case for the Police Department, has, through an unexpected legacy, been able to gratify h...

Powerfully posing questions of ethics, ideology, authorship and form, documentary film has never been more popular than it is today. Edited by one of the leading British authorities in the field, The Documentary Film Book is an essential guide to current thinking on documentary film. In a series of fascinating essays, key international experts discuss the theory of documentary, outline current understandings of its history (from pre-Flaherty to the post-Griersonian world of digital 'i-Docs'), survey documentary production (from Africa to Europe, and from the Americas to Asia), consider documentaries by marginalised minority communities, and assess its contribution to other disciplines and arts. Brought together here in one volume, these scholars offer compelling evidence as to why, over the last few decades, documentary has come to the centre of screen studies.

This text focuses on the analysis of data and the interpretation of results rather than the computational methods of statistics. Its examples are taken from a broad range of disciplines and screen shots from the more popular software packages are included to display data and graphics. Mathematical derivations are minimized, so encouraging the student to use a calculator or computer to perform the computations. Various technology options give the student a range of methods for performing the statistical computations. The section on uses and misuses of statistics shows how statistics are presented by graphs and charts.

THE GREATEST BRITISH DETECTIVES - Ultimate Collection: 270+ Murder Mysteries, Suspense Thrillers & Crime Stories (Illustrated Edition) Arihant Publications India limited
"What issues, of both form and content, shape the documentary film? What role does visual evidence play in relation to a documentary's arguments about the world in which we live? Can a documentary be believed, and why or why not? How do documentaries abide by or subvert ethical expectations? Are mockumentaries a form of subversion? In what ways can the documentary be an aesthetic experience and at the same time have political or social impact? And how can such impacts be empirically measured? Pioneering film scholar Bill Nichols investigates the ways in which documentaries strive for accuracy and truthfulness, but simultaneously fabricate a form that shapes

reality. Such films may rely on re-enactment to re-create the past, storytelling to provide satisfying narratives, and rhetorical figures such as metaphor and expressive forms such as irony to make a point. In many ways documentaries are a fiction unlike any other. With clarity and passion, Nichols offers close readings of several provocative documentaries including *Land without Bread*, *Restrepo*, *The Thin Blue Line*, *The Act of Killing*, and *Steve Jobs: The Man in the Machine* as part of an authoritative examination of the layered approaches and delicate ethical balance demanded of documentary filmmakers"--Provided by publisher.

Solve-It-Yourself Mysteries McGraw-Hill Education (UK)

This book offers an in-depth examination of the historical perspective on the death penalty, discusses the process involved in the sentencing and administration of justice, and clarifies facets of an issue which is riddled with inequities and ambiguities that reflect gender bias, and racial and economic disparity. For example, of the 3028 people on 'death row' as of August 1995, only 15% were women. Of those who are on 'death row' today, virtually all are poor, a significant number are mentally retarded or otherwise mentally disabled, more than 40% are African-American, and a disproportionate number are Native American, Latino and Asian. These facts need to be carefully weighed against the grief, pain, and anguish caused by the untimely death of a murder victim with regard to the family members, as well as the related legal costs to society.

Essential Statistics, Regression, and Econometrics, Second Edition, is innovative in its focus on preparing students for regression/econometrics, and in its extended emphasis on statistical reasoning, real data,

pitfalls in data analysis, and modeling issues. This book is uncommonly approachable and easy to use, with extensive word problems that emphasize intuition and understanding. Too many students mistakenly believe that statistics courses are too abstract, mathematical, and tedious to be useful or interesting. To demonstrate the power, elegance, and even beauty of statistical reasoning, this book provides hundreds of new and updated interesting and relevant examples, and discusses not only the uses but also the abuses of statistics. The examples are drawn from many areas to show that statistical reasoning is not an irrelevant abstraction, but an important part of everyday life. Includes hundreds of updated and new, real-world examples to engage students in the meaning and impact of statistics Focuses on essential information to enable students to develop their own statistical reasoning Ideal for one-quarter or one-semester courses taught in economics, business, finance, politics, sociology, and psychology departments, as well as in law and medical schools Accompanied by an ancillary website with an instructors solutions manual, student solutions manual and supplementing chapters
