

# Statistics Test 11b

As recognized, adventure as well as experience more or less lesson, amusement, as capably as understanding can be gotten by just checking out a books Statistics Test 11b in addition to it is not directly done, you could resign yourself to even more roughly this life, on the subject of the world.

We present you this proper as without difficulty as easy habit to get those all. We come up with the money for Statistics Test 11b and numerous book collections from fictions to scientific research in any way. in the course of them is this Statistics Test 11b that can be your partner.

## THE ANALYSIS OF CATEGORICAL DATA AND GOODNESS-OF-FIT TESTS

Test 11D AP Statistics Name: Directions: Work on these sheets. Tables and formulas appear on a separate sheet. Part 1: Multiple Choice. Circle the letter corresponding to the best answer 1. The average growth of a certain variety of pine tree is 10.1 inches in three years. A biologist claims that a new variety will have a greater three-year growth.

Test 11A ANSWERS - Test 11A AP Statistics Name Directions ... test statistics of  $z = 8.474$ , which yields a P-value of 0.0758. Using a significance level of  $\alpha = 0.05$ , which of the following is the appropriate conclusion for this test?

[mathshark.webs.com](http://mathshark.webs.com)

A significance test was performed to test the null hypothesis:  $\mu = 2$  versus the alternative  $H_a: \mu > 2$ . The test statistic is  $z = 1.40$ . The P-value for this test is approximately (a) 0.16 (b) 0.08 (c) 0.003 (d) 0.92 (e) 0.70 (f) None of the above. The answer is . D3. In a test of  $H_0: \mu = 100$  against  $H$
