We know how to prepare our homes for each seasonal change, but do we know how to prepare for climate change? Violent weather events like floods, tornadoes, ice storms and hurricanes only tell part of the story. Climate change is frequently more subtle but its effects on our homes and properties can still be devastating. As the climate changes and moisture levels adjust, there are a number of proactive steps that can be taken to prevent or lessen expensive repairs. Extreme Weather is the only book of its kind that shows how to protect your home or business from climate change, by focusing on the following areas: Risk and causal assessment, due to region and soil. Extreme weather's rapid and slow effects. Site, foundation, wall, and roof considerations and modifications. Insurance options. Anticipated changes for the United States,
