Geschwindner's 2nd edition of Unified Design of Steel Structures provides an understanding that structural analysis and design are two integrated processes as well as the necessary skills and knowledge in investigating, designing, and detailing steel structures utilizing the latest design methods according to the AISC Code. The goal is to prepare readers to work in design offices as designers and in the field as inspectors. This new edition is compatible with the 2011

AISC code as well as marginal references to the AISC manual for design examples and illustrations, which was seen as a real advantage by the survey respondents. Furthermore, new sections have been added on: Direct Analysis, Torsional and flexural-torsional buckling of columns, Filled HSS columns, and Composite column interaction. More real-world examples are included in addition to new use of three-dimensional illustrations in the book and in the image gallery; an increased number of homework problems; and a media approach Solutions Manual, Image Gallery.

Steel Design covers the fundamentals of structural steel design with an emphasis on the design of members and their connections, rather than the integrated design of buildings. Not only is Steel Design a revision of LRFD Steel Design, it also encompasses the 2005 unification of LRFD and ASD as is covered in the Steel Construction Manual. The book is designed so that instructors can easily teach either LRFD or ASD, or both, time-permitting, as the differences in the two approaches are mostly conceptual. The application of fundamental principles is encouraged for design procedures as well as for practical design, but so is a theoretical approach, enhancing the students' development. While the book is intended for junior- and senior-level engineering students, some of the later chapters can be used in graduate courses. Due to the changes that were made to many provisions of the Steel Construction Manual, practicing engineers will find this text useful in reviewing current practices and it will be an essential reference tool.
