In geometry, a Steiner chain  
is a set of  $n$  circles, all of  
which are tangent to two  
given non-intersecting  
circles (blue and red in  
Figure 1), where  $n$  is finite  
and each circle in the chain  
is tangent to the previous  
and next circles in the chain.

---

In the usual closed Steiner chains, the first and last ( $n$ th) circles are also tangent to each other; by contrast, in open Steiner chains, they need ...

### Steiner Solution

Manufactured with high definition, aspherical telescopic lens technology, the DBAL-D2 features a  $2^\circ$  to  $30^\circ$  adjustable illumination beam.

This highly collimated beam significantly enhances night vision performance and offers an eye-safe means of illuminating distances greater than 1000 m.

Military and law enforcement models

also features an enhanced end cap, taking full advantage of the added ...

### Steiner chain - Wikipedia

Popper's solution to this problem is simply to reject the bucket view of science. His main argument is basically that he accepts Hume's argument, which shows that the bucket view fails to explain the growth of objective knowledge. Popper said that the processes in the bucket are better seen as physical processes and the laws that govern these ...

In semiotic analysis (the studies of signs or symbols), an open text is a text that allows multiple or mediated interpretation by the readers. In contrast, a closed text leads the reader to one intended interpretation. The concept of the open text comes from Umberto Eco's collection of essays *The Role of the Reader*, but it is also derivative of Roland Barthes's distinction between 'readerly

The Stable Marriage

Problem states that given  $N$  men and  $N$  women, where each person has ranked all members of the opposite sex in order of preference, marry the men and women together such that there are no two people of opposite sex who would both rather have each other than their current partners.
