TransForm Solutions is a leading ecommerce store management, ecommerce support outsourcing and data processing outsourcing company in India with 18+ years of experience.

In geometry, a Steiner chain is a set of n circles, all of which are tangent to two given non-intersecting circles (blue and red in Figure 1), where n is finite and each circle in the chain is tangent to the previous and next circles in the chain. In the usual closed Steiner chains, the first and last (n th) circles are also tangent to each other; by contrast, in open Steiner chains, they need

In semiotic analysis (the studies of signs or symbols), an open text is a text that allows multiple or mediated interpretation by the readers. In contrast, a closed text leads the reader to one intended interpretation. The concept of the open text comes from Umberto Eco's collection of essays *The Role of the Reader*, but it is also derivative of Roland Barthes's distinction between 'readerly ...

Popper's solution to this problem is simply to reject the bucket view of science. His main argument is basically that he accepts Hume's argument, which shows that the bucket view fails to explain the growth of objective knowledge. Popper said that the processes in the bucket are better seen as physical processes and the laws that govern these ...
