"Blundo and Simon have successfully outlined how a solution-focused perspective can be a powerful tool for case managers. Their understanding and presentation is based upon practice scenarios that are real and applied...They clearly demonstrate the impact of 'thinking and language' and the importance of building a collaborative relationship with clients. Their work challenges the traditional theory-driven interventions that focus on problems and arrive at a diagnosis. They encourage a 'shift' to a co-constructive partnership that requires a practitioner to respect that clients are 'experts of their own lives'...They provide a clear step-wise discussion of techniques and strategies that can be employed working with individuals and families in case management settings. This book is a must read." -Lawrence T. Force, PhD. LCSW-R Professor of Psychology, Mount Saint Mary College, Newburgh, NY From the Foreword Solution-focused practice is a paradigm that stresses client abilities, strengths, and individual goals rather than disability. It discusses both the philosophical basis for solution-focused casework and demonstrates how it is ideally suited for the case management process. The book is based on teaching materials the authors have developed and used in their classes and workshops with undergraduate and graduate students and professionals. The text incorporates new research and theoretical developments in solution-focused therapy as well as actual practice scenarios demonstrating the process of building a collaborative relationship with individual clients and families.
