Secara umum, akuntansi didefinisikan sebagai sebuah sistem informasi yang memberikan laporan kepada para pengguna atau pihak-pihak yang memiliki kepentingan terhadap hasil kinerja dan kondisi keuangan perusahaan. Pemerintah (selaku pengguna eksternal laporan akuntansi), khususnya Direktorat Jenderal Pajak juga membutuhkan informasi akuntansi tersebut sebagai dasar dalam penetapan besarnya pajak terutang. Oleh sebab itu, laporan akuntansi komersial yang dihasilkan dari serangkaian aktivitas pencatatan, pengikhtisaran, dan pengklasifikasian masih perlu disesuaikan lagi dengan ketentuan perundang-undangan perpajakan yang berlaku di Indonesia, sehingga diperlukan adanya akuntansi khusus yang mengacu pada ketentuan perundang-undangan tersebut. Akuntansi khusus yang dimaksud adalah akuntansi perpajakan. Buku ini sangat tepat untuk dibaca (dimiliki) sebagai bahan referensi, khususnya bagi para mahasiswa yang ada di program studi S1 Akuntansi maupun S2 Akuntansi. Buku ini juga dapat digunakan sebagai acuan praktik bagi para eksekutif akuntansi yang terlibat dalam proses penyusunan laporan keuangan fiskal. Pembahasan yang diberikan dalam buku ini menggunakan bahasa yang sangat sederhana, sehingga memungkinkan bagi para pembaca (khususnya pemula) untuk

dapat memahaminya secara lebih mudah dan praktis.

Principles of Cost Accounting South-Western Pub

Depression is a widespread condition affecting approximately 7.5 million parents in the U.S. each year and may be putting at least 15 million children at risk for adverse health outcomes. Based on evidentiary studies, major depression in either parent can interfere with parenting quality and increase the risk of children developing mental, behavioral and social problems. **Depression in Parents, Parenting, and Children** highlights disparities in the prevalence, identification, treatment, and prevention of parental depression among different sociodemographic populations. It also outlines strategies for effective intervention and identifies the need for a more interdisciplinary approach that takes biological, psychological, behavioral, interpersonal, and social contexts into consideration. A major challenge to the effective management of parental depression is developing a treatment and prevention strategy that can be introduced within a two-generation framework, conducive for parents and their children. Thus far, both the federal and state response to the problem has been fragmented, poorly funded, and lacking proper oversight. This study examines options for widespread implementation of best practices as well as strategies that can be effective in diverse service settings for diverse populations of children and their families. The delivery of adequate screening and successful detection and treatment of a depressive illness and prevention of its effects on parenting and the health of children is a formidable challenge to modern health care systems. This study offers seven solid recommendations designed to increase awareness about and remove barriers to care for both the depressed adult and prevention of effects in the child. The report will be of particular interest to federal health officers, mental and behavioral health providers in diverse parts of health care delivery systems, health policy staff, state legislators, and the general public.
