Many people have experienced great success making their own beer or wine at home. In recent years a number of hobbyists have become interested in making distilled spirits. However, distilled spirits are more complicated to produce, and the process presents unique safety issues. In addition, alcohol distillation without a license is illegal in most countries, including the United States and Canada. From mashing and fermenting to building a small column still, *Craft Distilling* is a complete guide to creating high-quality whiskey, rum and more at home. Experienced brewer, distiller, and self-reliance expert Victoria Redhed Miller shares a wealth of invaluable information including: Quality Spirits 101: Step-by-step recipes and techniques Legal Liquor: An overview of the licensing process in the United States and Canada Raising the Bar: Advocacy for fair regulations for hobby distillers This unique resource will show you everything you need to know to get started crafting top-quality spirits on a small scale — and do it legally. Sure to appeal to hobbyists, homesteaders, self-sufficiency enthusiasts, and anyone who cares about fine food and drink, *Craft Distilling* is the ideal offering for independent spirits. Victoria Redhed Miller is a writer, photographer and homesteader who lives on a forty-acre off-grid farm in northwest Washington State with her husband David. She strives to enhance her family's self-reliance through solar energy, gardening, food preservation, raising heritage poultry, blacksmithing, and other traditional skills Victoria is the author of *Pure Poultry: Living Well with Heritage Chickens, Turkeys and Ducks*.

American business is dysfunctional. Companies of all sizes follow the mistaken belief that their products and services are best sold through mega-customers with pervasive market reach, such as Amazon and Walmart. Far too many business leaders fail to realize—until it is too late—that the

relentless pursuit of volume at all cost is not the key to long-term profits and success. The Customer Trap: How to Avoid the Biggest Mistake in Business is Thomas and Wilkinson ' s sequel to *The Distribution Trap: Keeping Your Innovations from Becoming Commodities*, which won the Berry-American Marketing Association Prize for the best marketing book of 2010. The *Distribution Trap* contended that cracking the big-box channel is not necessarily the Holy Grail that many marketers assume it is. The *Customer Trap* takes this thesis to the next level by arguing that all companies, regardless of the industry there are in, should maintain control over their sales and distribution channels. Volume forgone by avoiding the mass market is more than offset by higher margins and stronger brand equity. The *Customer Trap* shows that giving power to a customer who violates "the ten percent rule" sets a company up for ruin. Yet, when presented with the opportunity to push more sales through large customers, most decision-makers jump at the chance. As a result, marketing has come to resemble a relentless quest for efficiency and scale. Demands from mega-customers in the form of discounts, deals, and incentives erode the integrity of the brand and what it originally stood for. Lower margins become the norm and cost-saving compromises on quality take over. In time, the brand suffers and, in some cases, fails outright. Stark examples from Oreck Vacuum Cleaners, Rubbermaid, Goodyear, Levi ' s, and others illustrate the perils of falling into the "customer trap." This book demonstrates in vivid detail how to thrive by controlling your sales and distribution. The authors show how many firms, such as STIHL Inc., etailz, Apple, Red Ant Pants, and Columbia Paints & Coatings, have prospered by avoiding the "customer trap"—and how your company can have similar success.

in the woods Grind a smooth-cutting ripping chain Build your own mill from a 2 x 4 and scraps of plywood Cut burls, shape ovals and mill natural knees for boatbuilding Malloff's method is the fruit of over 30 years' experience of felling trees and making lumber. He's logged everything from giant redwoods to desert mesquite and fulfilled his youthful ambition to fell timber in every major forest of North America. Drawing on this experience, he has invented several chainsaw mills, and perfected the easy, efficient method of chainsaw lumbermaking that he describes in this book. If you've ever had trouble finding the lumber you need, or wanted to build something with your own trees, "Chainsaw Lumbermaking" is the book you've been waiting for. Will Malloff has built a variety of mills and is the designer of what many consider the most effective chainsaw lumbermaking system available. Malloff has spent nearly half a century researching and developing tools and wood technology that minimize ecological impact. In an endeavor to build his own blacksmith shop on a Canadian Pacific island, he invented a state-of-the-art ripping chain, which made chainsaw lumbermaking more feasible and economical than ever before.
