?Die Entscheidung zur Funktionsverlagerung im internationalen Konzern wird durch die Preisgrenzen der beteiligten Unternehmen im Fremdvergleich und die betriebswirtschaftliche Preisgrenze aus Konzernsicht bestimmt. Deshalb wirken die einzelnen wirtschaftlichen und steuerlichen Einflussfaktoren unterschiedlich auf die Verlagerung, je nachdem, welche Preisgrenze sie beeinflussen. Anhand einer Analyse dieser Faktoren lassen sich die Stärken und Schwächen der deutschen Regelung zur steuerlichen Behandlung von

Funktionsverlagerungen angesichts des Leitbildes einer möglichst entscheidungsneutralen Besteuerung ermitteln. Dies führt zu einer differenzierten Kritik der bestehenden steuerlichen Behandlung von Funktionsverlagerungen, die zwischen wirtschaftlich begründeten Barrieren und (unerwünschten) steuerlichen Hindernissen unterscheidet. Vor dem Hintergrund einer optimalen Ressourcenallokation im Konzern sind gerade die letzteren Anknüpfungspunkt für Korrekturen und Verbesserungsvorschläge.

Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist

Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

Drying Hardwood Lumber focuses on common methods for drying lumber of different thickness, with minimal drying defects, for high quality applications. This manual also includes predrying treatments that, when part of an overall quality-oriented drying system, reduce defects and improve drying quality, especially of oak lumber. Special attention is given to drying white wood, such as hard maple and ash, without sticker shadow or other discoloration. Several special drying methods, such as solar drying, are described, and proper techniques for storing dried lumber are discussed. Suggestions are provided for ways to economize on drying costs by reducing drying time and energy demands when feasible. Each chapter is accompanied by a list of references. Some references are cited in the chapter; others are listed as additional sources of information.

The North-West Semitic epigraphic contributes considerably to our understanding of the Old Testament and of the Ugaritic texts and to our knowledge of the North-West Semitic languages as such. This

dictionary is concerned with the North-West Semitic material found in inscriptions, papyri and ostraca in Phoenician, Punic, Hebrew, various forms of Aramaic, Ammonite, Edomite, the language of Deir Alla et cetera. The material covers the period from ca. 1000 B.C. to ca. 300 A.D. Besides translations, the entries include discussions and full references to scholarly literature. The book is a translated, updated and considerably augmented edition of Jean & Hoftijzer, *Dictionnaire des inscriptions sémitiques de l'ouest*. The additions concern newly found texts as well as references to new scholarly literature. The book is an indispensable tool for research in North-West Semitic epigraphy, on the Old Testament and on Ugaritic texts, and for Semitic linguistics. Please note that this version is an unrevised reprint of the original version published in 1995.

Heavy metal phytotoxicity has been known for more than a century. However, research in the past years has confirmed the immense damage by metal pollution to plants, the soil and ultimately to humans. By reviewing both field and laboratory work, this book deals with the various functional and ecological aspects of heavy metal stress on plants and outlines the scope for future research and the possibilities for remediation.

Bobbie Scopa spent close to five decades working through nearly every challenge a firefighter can face. Scopa was a strike team leader for the Dude Fire in 1990, where six firefighters were tragically killed, and she served at Ground Zero immediately after 9/11. She's worked mountain rescues, city fires, mega-wildfires, and everything in between. While battling conditions and harsh flames on the outside, she also found herself waging a tougher battle on the inside. Scopa was torn between how to maintain the façade everyone expected of her and whether to live as her true self. "A hero firefighter can't possibly be transgender, right?" she thought. *Both Sides of the Fire Line* is Bobbie Scopa's uplifting memoir of bravely facing the heat of fierce challenges, professionally and personally.

Uno de los trabajos selvícolas más ampliamente utilizados para manejar la espesura de los montes españoles son las denominadas limpias, que hacen referencia al cuidado cultural o tratamiento parcial consistente en reducir la presencia de la vegetación accesoria. Cuando se actúa sobre el estrato arbustivo, la limpia se denomina desbroce. A lo largo del primer capítulo del libro se recoge una clasificación de los diferentes tipos de desbroces, así como de la variedad de máquinas que los operarios forestales pueden emplear para llevar a cabo esta labor, tratando especialmente las denominadas motodesbrozadoras. El estudio se centrará fundamentalmente

en la amplia variedad de útiles de corte que estas máquinas pueden portar. En el segundo se describen todas aquellas labores y tareas que el operario debe realizar para el cuidado, mantenimiento y puesta a punto de la motodesbrozadora. De igual forma se explica cómo llevar a cabo el montaje de ciertos componentes de la máquina y se ofrecen a modo orientativo algunos consejos acerca del control del desgaste y daños de la máquina. Las técnicas de manejo de la motodesbrozadora, de acuerdo al tipo de vegetación a eliminar se exponen en el capítulo tercero. En esta misma sección del libro se muestran las limitaciones que presentan los distintos útiles de corte que puede portar esta máquina. El último capítulo se ha dedicado a la reflexión de los riesgos y peligros que aparecen cuando se maneja una motodesbrozadora, y a las medidas que se deben adoptar para prevenirlos. También se aborda la normativa medioambiental que regula la gestión del principal residuo que generan estas máquinas esto es, el aceite de motor usado. Finalmente se expone cómo llevar a cabo el tratamiento adecuado de los restos forestales en aras de cumplir con una buena conducta medioambiental. Esta Unidad Formativa UF1043: Operaciones de desbroce, es TRANSVERSAL y está incluida en el Módulo Formativo MF1293_1: Operaciones auxiliares de repoblación, corrección hidrológica, y de construcción y mantenimiento de infraestructuras forestales y MF1294_1: Operaciones auxiliares en tratamientos silvícolas, correspondiente al Certificado de profesionalidad: Actividades auxiliares en conservación y mejora de Montes (AGAR0309), regulado por el RD 682/2011, de 13 de mayo, de la familia profesional Agraria. Según este Real Decreto los contenidos que en esta obra se recogen se corresponden con una duración de 40 horas. Tanto la estructura como el desarrollo del libro se ajustan al citado Real Decreto y más concretamente a los contenidos de la Unidad Formativa Operaciones de desbroce. Javier Gutiérrez Velayos es Dr. Ingeniero de Montes por la Universidad de Valladolid. Ha sido profesor de la Universidad Católica de Ávila donde ha impartido, entre otras, la asignatura de Aprovechamientos y Certificación Forestal. Ha compaginado dicha labor docente con la actividad investigadora, especialmente en el área de la Xilotecnología y en el campo de la Planificación del paisaje y la conservación de la biodiversidad.

The Forests are playing a significant role in the economic prosperity and ecological stability of the country. The Indian Forests faces severe biotic and abiotic pressure leads to shrinking of its geographical distribution and the forest based industries are at the cross roads. This book incorporated the India's Forest and Agroforestry situation and the need for industrial wood plantations. It also comprises the status of various wood based industries like pulp and paper, plywood, matchwood, dendro power, biofuel and the requirement for different raw materials and the associated supply chain management.

This open access book focuses on Switzerland-based medium-sized companies with a longstanding export tradition and a proven dominance in global niche markets. Based upon in-depth documentation and analysis of 36 Swiss companies over their entire history, an expert team of authors presents several parallels in the pathways and success factors which allowed these firms to become dominant and operate from a high-cost location such as Switzerland. The book enhances these insights by providing detailed company profiles documenting the company history, development, and how their relevant global niche positions were reached. Readers will benefit from these profiles as they compile a diverse selection of industries, mainly active within the B2B sector, with mostly mature companies (60 years to older than 100 years since founding) and different types of ownership structures including family firms. 'Masterpieces of Swiss Entrepreneurship' brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere. Findings are based on detailed bottom-up research of 36 companies -- without any preconceived notions. The book is both conceptual and practical. It fosters understanding for different choices in development pathways and management practices. Matti Alahuhta, Chairman DevCo Partners, ex-CEO Kone, Board member of several global listed companies, Helsinki, Finland Start-up entrepreneurs need proven models from industry which demonstrate the various paths to success. "Masterpieces of Swiss Entrepreneurship" provides deep insights highlighting these models and the important trade-offs entrepreneurial teams must consider when choosing the path of high growth or of maximum control, as they are often mutually exclusive. As climate change continues to wreak havoc on the environment, devastating wildfires, both natural and manmade, are increasing. The figure for average acres burned has increased from almost 2 million acres in 1992 to nearly 7 million in 2012, which set a new record with an average of 165 acres burned per fire. Things are heating up, but global warming isn't the only problem. Budgets for fire suppression have been slashed severely. The number of air tankers has decreased from 44 in 2002 to just 9 in 2012, which means fast attacks on fledgling fires will grow more difficult in the future. If you live in a wildland-urban interface, the zone between unoccupied and developed land, sooner or later fire will happen. Fortunately you can prepare for the worst, and it doesn't have to cost a fortune. This highly detailed and practical reference guide will help you live more safely in the red zone and save you time and money along the way, providing multiple methods of risk mitigation along with the financial level of each action. Effectively prepping your land can even enhance the scenery and increase the value of your home. Learn how wildfires begin and behave, how to evaluate your property, what essential tools you'll need and what they will cost, how to prepare your land and home—including tips on how to avoid insurance nightmares—when to stay and fight, when it's time to evacuate, how to clean up after a fire event, and more. Even if you live in the middle of a suburb, the information on how fires start and spread and how to deal with insurance claims will prove enlightening and helpful. No one can guarantee that your house or land will survive if a major conflagration erupts, but you can greatly improve your odds with this book and a little preparation.
