About this book: A  
chainsaw is  
arguably the most  
effective tool a  
person can use to  
fell trees and clear  
brush. They're  
effective, efficient,  
portable, and can  
be used in all types  
of settings. In  
short, chainsaws  
are the best  
teammate a sawyer  
can have when  
tasked with felling,  
bucking, and  
limbing trees.  
However, keeping  
a chainsaw running  
at its fullest  
potential requires a  
lot of attention to

detail during routine  
maintenance. As  
Abraham Lincoln is  
quoted as saying,  
"give me six hours  
to chop down a tree  
and I will spend the  
first four  
sharpening the  
axe." Thankfully,  
we're now a far cry  
from resorting to  
axes to take down  
and process trees,  
but the principle  
still holds true. You  
have enough to  
worry about when  
operating your  
chainsaw. Your  
saw's maintenance  
shouldn't be one of  
them. The  
Comprehensive  
Chainsaw  
Maintenance  
Guidebook is your  
one-stop source for

the guidance,  
tips, and tricks you  
will need to  
properly maintain  
your chainsaw and  
keep it running at  
peak performance  
for years to come.  
About the author:  
Steven first learned  
the basic principles  
of chainsaw safety,  
operation,  
troubleshooting,  
and maintenance  
while on an  
AmeriCorps  
conservation crew.  
He went on to  
sharpen his saw  
skills while fighting  
wildfires as a lead  
sawyer on a fuels  
crew with the  
Bureau of Land  
Management.  
While with the  
BLM, he also

---

gained valuable experience as a lead sawyer on a dedicated six-man saw team as part of a twenty-man hand crew. Steven is partial to the medium and larger displacement Stihl saws as those are what he used most during his work experience. His favorites are the full wrap MS 362, 044, and MS 461 models using 22-24" bars for their ability to cut through larger diameter fuels while still being relatively lightweight.

An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely

on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley

encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

own beer or wine at home. In recent years a number of hobbyists have become interested in making distilled spirits. However, distilled spirits are more complicated to produce, and the process presents unique safety issues. In addition, alcohol distillation without a license is illegal in most countries, including the United States and Canada. From mashing and fermenting to building a small column still, *Craft Distilling* is a complete guide to creating high-quality whiskey, rum and more at home. Experienced brewer, distiller, and self-reliance expert Victoria Redhed Miller shares a wealth of invaluable information including:

**Quality Spirits 101:** Step-by-step recipes and techniques  
**Legal Liquor:** An overview of the licensing process in the United States and Canada  
**Raising the Bar:** Advocacy for fair regulations for hobby distillers  
This unique resource will show you everything you need to know to get started crafting top-quality spirits on a small scale – and do it legally. Sure to appeal to hobbyists, homesteaders, self-sufficiency enthusiasts, and anyone who cares about fine food and drink, *Craft Distilling* is the ideal offering for independent spirits. Victoria Redhed Miller is a writer, photographer and homesteader who lives on a forty-acre off-grid farm in
