A rich history of the unique relationship between life and work in an American factory town from 1840 to 1984, A Place to Live and Work tells the remarkable story of Henry Disston's saw manufacturing company and the factory town he built. The book provides a rare view of the rise of one of America's largest and most powerful family-owned businesses, from its modest beginnings in 1840 to the 1940s, when Disston products were known worldwide, to the sale and demise of the company in the postwar years. Henry Disston, however, not only built a factory; he also shaped Tacony, the town in northeastern Philadelphia where the workers lived. The book describes the company's interdependence with the community and profiles the lifestyle that grew out of Disston's paternalistic blueprint for Tacony. Using original letter books, shop committee meeting notes, photographs, and a wealth of other documents, Harry Silcox reveals Disston's highly sophisticated distribution and marketing system as well as a management system that, unlike the one advocated by Frederick Winslow Taylor, responded to the concerns of workers and foremen. Through two world wars, the Depression, and the rise of unions, Disston's innovative business practices enabled the company to remain active and strong even when factories across the nation were failing. This study raises important questions about the demise of the factory system and its impact on urban communities and family life. The Disston company provides one example of how people could work and live together successfully within the larger framework of the factory system.

About this book: A chainsaw is arguably the most effective tool a person can use to fell trees and clear brush. They're effective, efficient, portable, and can be used in all types of settings. In short, chainsaws are the best teammate a sawyer can have when tasked with felling, bucking, and limbing trees. However, keeping a chainsaw running at its fullest potential requires a lot of attention to detail during routine maintenance. As Abraham Lincoln is quoted as saying, "give me six hours to chop down a tree and I will spend the first four sharpening the axe." Thankfully, we're now a far cry from resorting to axes to take down and process trees, but the principle still holds true. You have enough to worry about when operating your chainsaw. Your saw's maintenance shouldn't be one of them. The Comprehensive Chainsaw Maintenance Guidebook is your one-stop source for all the guidance, tips, and tricks you will need to properly maintain your chainsaw and keep it running at peak performance for years to come. About the author: Steven first learned the basic principles of chainsaw safety, operation, troubleshooting, and maintenance while on an AmeriCorps conservation crew. He went on to sharpen his saw skills while fighting wildfires as a lead sawyer on a fuels crew with the Bureau of Land Management. While with the BLM, he also gained valuable experience as a lead sawyer on a dedicated six-man saw team as part of a twenty-man hand crew. Steven is partial to the medium and larger displacement Stihl saws as those are what he used most during his work experience. His favorites are the full wrap MS 362, 044, and MS 461 models using 22-24" bars for their ability to cut through larger diameter fuels while still being relatively lightweight.

Legacies are not easily built. They take dedicated individuals who are willing to risk everything, work hard, and be examples of excellence. The eclectic group of pioneers who laid the foundation for Stihl's success in America could not have been more different from each other. But they shared the common drive and character that has proven the test of time. Stihl American features the amazing stories of these pioneers, including:

- A descendant of Daniel Boone’s sister who first sold Stihl saws in America during the 1930s.
- A Jersey boy who, after fighting his way across France and Germany, found himself near the spot where the chainsaw was invented. Twenty years later he secured a one-page contract to sell Stihl in North America.
- A young Native American boy, orphaned during the Osage Reign of Terror, who grew to be an Osage Indian Chief and introduced Stihl to loggers in the Rockies.
- A rambunctious Missourian, who, after a stint with the OSS flying B17 bombers during WWII, assisted her husband to establish Stihl in the high plains.
- An Arkansas lawyer, who, after losing an eye during the apprehension of a mass murderer, partnered with a timber buyer and introduced Stihl to America's Southwest.
- A lefty from Ohio, scouted by baseball’s legendary Eddy Stanky, who chose to introduce Stihl to New England rather than play professional baseball.
- The husband of a former Miss New Hampshire who had the entire United States as his sales territory and became the first Man of Stihl in America.
- A piano player from a tiny town in Missouri who became Stihl's largest independent distributor.
- A Canadian born Scotsman who started as a low-level Stihl employee and eventually rose to the position of president, leading the company to decades of record-setting sales.

This is the exemplary heritage of STIHL in America!
