Stilwell and the American Experience in China, 1911-1945 Presidio Press

This volume is centered on the performance of Lt. Gen. Joseph W. Stilwell. Stilwell was chief of staff to Chiang Kai-shek, in Chiang's capacity of commander in chief of China considered as an Allied theater; he administered U.S. lend-lease aid to China; and he commanded the CBI Theater. Chiang put him in charge of his force (three Chinese armies) in Burma during the ill-fated campaign of 1942, and this campaign, insofar as it

involved his authority, is therefore described.

Reading the history of the China-Burma-India Theater will be an eye opener and a lesson to those who, in the future, have to deal with allies in far distant lands about whom so much should be known and so little is. Contemporary history is limited in its vision, as indeed is all history, insofar as the records are limited. This history is no exception; the records used are mainly of U.S. Army origin. However, time flies and experience of the past is essential to wisdom in the future. To wait for additional evidence might deny pertinent information to those who need it now. Moreover, the records turned up by the authors of this book are exceptionally rich. A careful reading of this volume will emphasize the necessity on the part of the leading participants in a combined venture to understand the characteristics and over-all objectives of the nations as well as the individuals concerned in the endeavor. If such an understanding is present, and if due weight is given

it by those involved in negotiations as well as in the execution of the plans, the better will be the result. The degree to which this understanding was achieved by the leading participants is left for the reader to decide. Decisions, to be sound, must perforce be based on up-to-date facts. The danger of making them from information supplied from not too well informed sources, and without information that could readily have been brought to bear, is self-evident.

1917, the war in Europe was, at best, a tragic standoff. Britain knew that all was lost unless the United States joined the war, but President Wilson was unshakable in his neutrality. At just this moment, a crack team of British decoders in a quiet office known as Room 40 intercepted a document that would change history. The Zimmermann telegram was a top-secret message to the president of Mexico, inviting him to join Germany and Japan in an invasion of the United States. How Britain managed to inform the American government without revealing that the German codes had been broken makes for an incredible story of espionage and intrigue as only Barbara W. Tuchman could tell it. *The Proud Tower*, *The Guns of August*, and *The Zimmermann Telegram* comprise Barbara W. Tuchman's classic histories of the First World War era.

A remarkable history of the two-centuries-old relationship between the United States and China, from the Revolutionary War to the present day From the clipper ships that ventured to Canton hauling cargos of American ginseng to swap Chinese tea, to the US warships facing off against China's growing navy in the South China Sea, from the Yankee missionaries who brought Christianity and education to China, to the Chinese who built the American West, the United States and China have always been dramatically intertwined. For more than two centuries, American and Chinese statesmen, merchants,

missionaries, and adventurers, men and women, have profoundly influenced the fate of these nations. While we tend to think of America's ties with China as starting in 1972 with the visit of President Richard Nixon to China, the patterns—rapturous enchantment followed by angry disillusionment—were set in motion hundreds of years earlier. Drawing on personal letters, diaries, memoirs, government documents, and contemporary news reports, John Pomfret reconstructs the surprising, tragic, and marvelous ways Americans and Chinese have engaged with one another through the centuries. A fascinating and thrilling account, *The Beautiful Country and the Middle Kingdom* is also an indispensable book for understanding the most important—and often the most

perplexing–relationship between any two countries in the world.

Pulitzer Prize–winning historian Barbara W. Tuchman, author of the World War I masterpiece *The Guns of August*, grapples with her boldest subject: the pervasive presence, through the ages, of failure, mismanagement, and delusion in government. Drawing on a comprehensive array of examples, from Montezuma’s senseless surrender of his empire in 1520 to Japan’s attack on Pearl Harbor, Barbara W. Tuchman defines folly as the pursuit by government of policies contrary to their own interests, despite the availability of feasible alternatives. In brilliant detail, Tuchman illuminates four decisive turning points in history that illustrate the very heights of folly: the Trojan War, the breakup of the Holy See provoked by the Renaissance popes, the loss of the American colonies by Britain’s George III, and the United States’ own persistent mistakes in Vietnam. Throughout *The March of Folly*, Tuchman’s incomparable talent for animating the people, places, and events of history is on spectacular display. Praise

for *The March of Folly* “A glittering narrative . . . a moral [book] on the crimes and follies of governments and the misfortunes the governed suffer in consequence.”—*The New York Times Book Review* “An admirable survey . . . I haven’t read a more relevant book in years.”—John Kenneth Galbraith, *The Boston Sunday Globe* “A superb chronicle . . . a masterly examination.”—*Chicago Sun-Times*

This textbook provides a unified and concise exploration of undergraduate mathematics by approaching the subject through its history. Readers will discover the rich tapestry of ideas behind familiar topics from the undergraduate curriculum, such as calculus, algebra, topology, and more. Featuring historical episodes ranging from the Ancient Greeks to Fermat and Descartes, this volume offers a glimpse into the broader context in which these ideas developed, revealing unexpected connections that make this ideal for a senior capstone course. The presentation of previous versions has

been refined by omitting the less mainstream topics and inserting new connecting material, allowing instructors to cover the book in a one-semester course. This condensed edition prioritizes succinctness and cohesiveness, and there is a greater emphasis on visual clarity, featuring full color images and high quality 3D models. As in previous editions, a wide array of mathematical topics are covered, from geometry to computation; however, biographical sketches have been omitted. *Mathematics and Its History: A Concise Edition* is an essential resource for courses or reading programs on the history of mathematics. Knowledge of basic calculus, algebra, geometry, topology, and set theory is assumed. From reviews of previous editions: “*Mathematics and Its History* is a joy to read. The writing is clear, concise and inviting. The style is very different from a traditional text. I found myself picking it up to read at the expense of my usual late evening thriller or detective novel.... The author has done a wonderful job of

tying together the dominant themes of undergraduate mathematics.” Richard J. Wilders, MAA, on the Third Edition "The book...is presented in a lively style without unnecessary detail. It is very stimulating and will be appreciated not only by students. Much attention is paid to problems and to the development of mathematics before the end of the nineteenth century.... This book brings to the non-specialist interested in mathematics many interesting results. It can be recommended for seminars and will be enjoyed by the broad mathematical community." This book is a comprehensive history of

slavery in Africa from the earliest times to the end of the twentieth century, when slavery in most parts of the continent ceased to exist. It connects the emergence and consolidation of slavery to specific historical forces both internal and external to the African continent. Sean Stilwell pays special attention to the development of settled agriculture, the invention of kinship, "big men" and centralized states, the role of African economic production and exchange, the interaction of local structures of dependence with the external slave trades (transatlantic, trans-Saharan, Indian Ocean), and the impact of colonialism on slavery in the twentieth century. He also provides an introduction to the central debates that have shaped current understanding of slavery in Africa. The book examines different forms of slavery that developed over time in Africa and introduces readers to the lives, work, and struggles of slaves themselves.

*The Proud Tower* Springer Nature

From the 9/11 attacks to waterboarding to drone strikes, relations between the United States and the Middle East seem caught in a downward spiral. And all too often, the Central Intelligence Agency has made the situation worse. But this crisis was not a historical inevitability—far from it. Indeed, the earliest

generation of CIA operatives was actually the region's staunchest western ally. In America's Great Game, celebrated intelligence historian Hugh Wilford reveals the surprising history of the CIA's pro-Arab operations in the 1940s and 50s by tracing the work of the agency's three most influential—and colorful—officers in the Middle East. Kermit "Kim" Roosevelt was the grandson of Theodore Roosevelt and the first head of CIA covert action in the region; his cousin, Archie Roosevelt, was a Middle East scholar and chief of the Beirut station. The two Roosevelts joined combined forces with Miles Copeland, a maverick covert operations specialist who had joined the American intelligence establishment during World War II. With their deep knowledge of Middle Eastern affairs, the three men were heirs to an American missionary tradition that engaged Arabs and Muslims with respect and empathy. Yet they were also fascinated by imperial intrigue, and were eager to play a modern rematch of the "Great Game," the nineteenth-century struggle between Britain and Russia for control over central Asia. Despite their good intentions, these "Arabists" propped up authoritarian regimes, attempted secretly to sway public opinion in America against support for the new state of Israel, and staged coups that irrevocably destabilized the nations with which they empathized. Their efforts, and ultimate failure, would shape the course of

U.S.–Middle Eastern relations for decades to come. Based on a vast array of declassified government records, private papers, and personal interviews, America's Great Game tells the riveting story of the merry band of CIA officers whose spy games forever changed U.S. foreign policy.

A history of the Chinese experience in WWII, named a Book of the Year by both the Economist and the Financial Times: "Superb" (The New York Times Book Review). In 1937, two years before Hitler invaded Poland, Chinese troops clashed with Japanese occupiers in the first battle of World War II. Joining with the United States, the Soviet Union, and Great Britain, China became the fourth great ally in a devastating struggle for its very survival. In this book, prize-winning historian Rana Mitter unfurls China's drama

of invasion, resistance, slaughter, and political intrigue as never before. Based on groundbreaking research, this gripping narrative focuses on a handful of unforgettable characters, including Chiang Kai-shek, Mao Zedong, and Chiang's American chief of staff, "Vinegar Joe" Stilwell—and also recounts the sacrifice and resilience of everyday Chinese people through the horrors of bombings, famines, and the infamous Rape of Nanking. More than any other twentieth-century event, World War II was crucial in shaping China's worldview, making Forgotten Ally both a definitive work of history and an indispensable guide to today's China and its relationship with the West.

His American men worshipped him. The Chinese armies he trained and led would have gone through hell for him.

But the politicians, both in Chungking and Washington, hated his guts. And after two and a half years of bitter struggle in the China-Burma-India theater during the dog days of World War II, General Joseph W. Stilwell was abruptly relieved of his command and brought back to the U.S. in an "atmosphere of crime." From the time he flew to the Far East to assume command of the handful of American forces in the C.B.I. theater until his recall in 1944, General Stilwell was engaged in one of the most complex, difficult, and confidential operations in American military history. The Stilwell Papers—brilliantly edited and arranged by Theodore H. White, who knew the General in the C.B.I. theater—record Stilwell's on-the-spot account of the people and events of the moment with the salty directness of a man obligated to please no one but himself. But this book is not only an account of the various glories and frustrations of war; it is also the autobiography of one of America's greatest World War II commanders. General Stilwell was a

strong, courageous man, deeply devoted to his country and charged with crucial responsibilities; and *The Stilwell Papers* is the deeply moving and striking self-portrait of that man and his struggle.

'War pressed against every frontier. Suddenly dismayed, governments struggled and twisted to fend it off. It was no use . . .' Barbara Tuchman's universally acclaimed, Pulitzer prize-winning account of how the first thirty days of battle determined the course of the First World War is to this day revered as the classic account of the conflict's opening. From the precipitous plunge into war and the brutal and bloody battles of August 1914, Tuchman shows how events were propelled by a horrific logic which swept all sides up in its unstoppable

momentum. 'Fascinating, splendid, glittering. One of the finest works of history.' *New York Times* 'Excellent.' *Wall Street Journal* 'Brilliant, exciting.' *Washington Post* 'Brilliant . . . grips the mind.' *New Yorker* 'A brilliant achievement.' *Sunday Telegraph*

Tuchman turns to America with a fresh new view of the events that led from the first foreign salute to the American Nationhood in 1776 to the last campaign of the Revolution five years later--the moment that inaugurated the existence of a new nation, and announced the coming of a democratic age to the Old World. 8 pages of color, 8 pages of photos, 7 maps.

*Stilwell and Mountbatten in Burma* explores the relationship between American General Joseph "Vinegar Joe" Stilwell and British Admiral Lord Louis Mountbatten in the China-Burma-India Theater (CBI) and the South East Asia Command (SEAC) between October 1943 and October 1944, within the wider context of Anglo-American

relations during World War II. Using original material from both British and American archives, Jonathan Templin Ritter discusses the military, political, and diplomatic aspects of Anglo-American cooperation, the personalities involved, and where British and American policies both converged and diverged over Southeast Asia. Although much has been written about CBI, *Stilwell and China*, and *Mountbatten*, no published comparison study has focused on the relationship between the two men during the twelve-month period in which their careers overlapped. This book bridges the gap in the literature between Mountbatten's earlier naval career and his later role as the last Viceroy of British India. It also presents original archival material that explains why Stilwell was so anti-British, including his 1935 memorandum titled "The British," and his original margin notes to Mountbatten's farewell letter to him in 1944. Finally, it presents other original archival material that refutes previous books that have accused Stilwell of needlessly sacrificing the

lives of his men during the 1944 North Burma Campaign, merely out of hatred for the British.

The Proud Tower, the Pulitzer Prize-winning *The Guns of August*, and *The Zimmerman Telegram* comprise Barbara W. Tuchman's classic histories of the First World War era. During the fateful quarter century leading up to World War I, the climax of a century of rapid, unprecedented change, a privileged few enjoyed Olympian luxury as the underclass was "heaving in its pain, its power, and its hate." In *The Proud Tower*, Barbara W. Tuchman brings the era to vivid life: the decline of the Edwardian aristocracy; the Anarchists of Europe and America; Germany and its self-depicted hero, Richard Strauss; Diaghilev's Russian ballet and Stravinsky's music; the Dreyfus Affair; the Peace Conferences in The Hague; and the enthusiasm and tragedy of Socialism, epitomized by the assassination of Jean Jaurès on the night the Great War began and an epoch came to a close. Praise for *The Proud Tower* "[Barbara W. Tuchman's] Pulitzer Prize-winning *The Guns of August* was an
