Stilwell and Mountbatten in Burma Harvard University Press

A riveting account of the watershed moment in America's dealings with China that forever altered the course of East-West relations As 1945 opened, America was on surprisingly congenial terms with China's Communist rebels—their soldiers treated their American counterparts as heroes, rescuing airmen shot down over enemy territory. Chinese leaders talked of a future in which American money and technology would help lift China out of poverty. Mao Zedong himself held friendly meetings with U.S. emissaries, vowing to them his intention of establishing an American-style democracy in China. By year's end, however, cordiality had been replaced by chilly hostility and distrust. Chinese Communist soldiers were setting ambushes for American marines in north China; Communist newspapers were portraying the United States as an implacable imperialist enemy; civil war in China was erupting. The pattern was set for a quarter century of almost total Sino-American mistrust, with the devastating wars in Korea and Vietnam among the consequences. Richard Bernstein here tells the incredible story of that year's sea change, brilliantly analyzing its many components, from ferocious infighting among U.S. diplomats, military leaders, and opinion makers to the complex relations between Mao and his patron, Stalin. On the American side, we meet experienced "China hands" John Paton Davies and John Stewart Service, whose efforts at negotiation made them prey to accusations of Communist sympathy; FDR's special ambassador Patrick J. Hurley, a

decorated general and self-proclaimed cowboy; and Time journalist, Henry Luce, whose editorials helped turn the tide of American public opinion. On the Chinese side, Bernstein reveals the ascendant Mao and his intractable counterpart, Nationalist leader Chiang Kai-shek; and the indispensable Zhou Enlai. A tour de force of narrative history, *China 1945* examines the first episode in which American power and good intentions came face-to-face with a powerful Asian revolutionary movement, and challenges familiar assumptions about the origins of modern Sino-American relations.

This textbook provides a unified and concise exploration of undergraduate mathematics by approaching the subject through its history. Readers will discover the rich tapestry of ideas behind familiar topics from the undergraduate curriculum, such as calculus, algebra, topology, and more. Featuring historical episodes ranging from the Ancient Greeks to Fermat and Descartes, this volume offers a glimpse into the broader context in which these ideas developed, revealing unexpected connections that make this ideal for a senior capstone course. The presentation of previous versions has been refined by omitting the less mainstream topics and inserting new connecting material, allowing instructors to cover the book in a one-semester course. This condensed edition prioritizes succinctness and cohesiveness, and there is a greater emphasis on visual clarity, featuring full color images and high quality 3D models. As in previous editions, a wide array of mathematical topics are covered, from geometry to computation; however, biographical sketches have been omitted. *Mathematics and Its History: A Concise Edition* is an essential resource for courses or reading programs on the history of mathematics. Knowledge of basic calculus, algebra, geometry, topology, and set theory is assumed. From reviews of previous editions: "Mathematics and Its History is a joy to read. The writing is clear, concise and inviting. The style is very different from a traditional text. I found myself picking it up to read at the expense of my usual late evening thriller or detective novel.... The author has done a wonderful job of tying together the dominant themes of undergraduate mathematics." Richard J. Wilders, MAA, on the Third Edition "The book...is presented in a lively style without unnecessary detail. It is very stimulating and will be appreciated not only by students. Much attention is paid to problems and to the development of mathematics before the end of the nineteenth century.... This book brings to the non-specialist interested in mathematics many interesting results. It can be recommended for seminars and will be enjoyed by the broad mathematical community."

In early 1942, as America rose in arms against Japan, Major General Joseph W. Stilwell, nicknamed "Vinegar Joe," was sent to China to shore up the U.S. ally, Chian Kai-shek. Among the men he took with him was his aide, Lt. Colonel Frank Dorn. At Stilwell's request, Dorn kept a record of the daily events of this time and this record initially served as the basis for Stilwell's official report to Washington D.C. after the collapse of the Burma front. This account gives a portrait of Stilwell and his mission. **The Best and the Brightest** CreateSpace
Tuchman turns to America with a fresh new view of the events that led from the first foreign salute to the American Nationhood in 1776 to the last campaign of the Revolution five years later--the moment that inaugurated the existence of a new nation, and announced the coming of a democratic age to the Old World. 8 pages of color, 8 pages of photos, 7 maps.

A "marvelous history" of medieval Europe, from the bubonic plague and the Papal Schism to the Hundred Years' War, by the Pulitzer Prize-winning author of *The Guns of August*

*Lawrence Wright, author of *The End of October*, in *The Wall Street Journal* The fourteenth century reflects two contradictory images: on the one hand, a glittering age of crusades, cathedrals, and chivalry; on the other, a world plunged into chaos and spiritual agony. In this revelatory work, Barbara W. Tuchman examines not only the great rhythms of history but the grain and texture of domestic life: what childhood was like; what marriage meant; how money, taxes, and war dominated the lives of serf, noble, and clergy alike. Granting her subjects their loyalties, treacheries, and guilty passions, Tuchman re-creates the lives of proud cardinals, university scholars, grocers and clerks, saints and mystics, lawyers and mercenaries, and dominating all, the knight—in all his valor and "furious follies," a "terrible worm in an iron cocoon." Praise for *A Distant Mirror* "Beautifully written, careful and thorough in its scholarship . . . What Ms. Tuchman does superbly is to tell how it was. . . . No one has ever done this better."—*The New York Review of Books* "A beautiful, extraordinary book . . . Tuchman at the top of her powers . . . She has done nothing finer."—*The Wall Street Journal* "Wise, witty, and wonderful . . . a great book, in a great historical tradition."—*Commentary*

Stilwell and the American Experience in China, 1911-45 Da Capo Press

A history of the Chinese experience in WWII, named a Book of the Year by both the Economist and the Financial Times:

"Superb" (*The New York Times Book Review*). In 1937, two

years before Hitler invaded Poland, Chinese troops clashed with Japanese occupiers in the first battle of World War II. Joining with the United States, the Soviet Union, and Great Britain, China became the fourth great ally in a devastating struggle for its very survival. In this book, prize-winning historian Rana Mitter unfurls China's drama of invasion, resistance, slaughter, and political intrigue as never before. Based on groundbreaking research, this gripping narrative focuses on a handful of unforgettable characters, including Chiang Kai-shek, Mao Zedong, and Chiang's American chief of staff, "Vinegar Joe" Stilwell—and also recounts the sacrifice and resilience of everyday Chinese people through the horrors of bombings, famines, and the infamous Rape of Nanking. More than any other twentieth-century event, World War II was crucial in shaping China's worldview, making *Forgotten Ally* both a definitive work of history and an indispensable guide to today's China and its relationship with the West.

The Proud Tower, the Pulitzer Prize-winning *The Guns of August*, and *The Zimmerman Telegram* comprise Barbara W. Tuchman's classic histories of the First World War era During the fateful quarter century leading up to World War I, the climax of a century of rapid, unprecedented change, a privileged few enjoyed Olympian luxury as the underclass was "heaving in its pain, its power, and its hate." In *The Proud Tower*, Barbara W. Tuchman brings the era to vivid life: the decline of the Edwardian aristocracy; the Anarchists of Europe and America; Germany and its self-depicted hero, Richard Strauss; Diaghilev's Russian ballet and Stravinsky's music; the Dreyfus Affair; the Peace Conferences in The Hague; and the enthusiasm and tragedy of Socialism, epitomized by the assassination of Jean Jaurès on the night the Great War began and an epoch came to a close. Praise for *The Proud Tower* "[Barbara W. Tuchman's] Pulitzer Prize-winning *The Guns of August* was an expert evocation of the first spasm of the 1914–1918 war. She brings the same narrative gifts and panoramic camera eye to her portrait of the antebellum world."—*Newsweek* "A rare combination of impeccable scholarship and literary polish . . . It would be impossible to read *The Proud Tower* without pleasure and admiration."—*The New York Times* "An exquisitely written and thoroughly engrossing work . . . The author's knowledge and skill are so impressive that they whet the appetite for more."—*Chicago Tribune* "[Tuchman] tells her story with cool wit and warm understanding."—*Time*

This book is a comprehensive history of slavery in Africa from the earliest times to the end of the twentieth century, when slavery in most parts of the continent ceased to exist. It connects the emergence and consolidation of slavery to specific historical forces both internal and external to the African continent. Sean Stilwell pays special attention to the development of settled agriculture, the invention of kinship, "big men" and centralized states, the role of African economic production and exchange, the interaction of local structures of dependence with the external slave trades (transatlantic, trans-Saharan, Indian Ocean), and the impact of colonialism on slavery in the

twentieth century. He also provides an introduction to the central debates that have shaped current understanding of slavery in Africa. The book examines different forms of slavery that developed over time in Africa and introduces readers to the lives, work, and struggles of slaves themselves.

Stilwell's Mission to China Random House

From the 9/11 attacks to waterboarding to drone strikes, relations between the United States and the Middle East seem caught in a downward spiral. And all too often, the Central Intelligence Agency has made the situation worse. But this crisis was not a historical inevitability—far from it. Indeed, the earliest generation of CIA operatives was actually the region's staunchest western ally. In America's Great Game, celebrated intelligence historian Hugh Wilford reveals the surprising history of the CIA's pro-Arab operations in the 1940s and 50s by tracing the work of the agency's three most influential—and colorful—officers in the Middle East. Kermit "Kim" Roosevelt was the grandson of Theodore Roosevelt and the first head of CIA covert action in the region; his cousin, Archie Roosevelt, was a Middle East scholar and chief of the Beirut station. The two Roosevelts joined combined forces with Miles Copeland, a maverick covert operations specialist who had joined the American intelligence establishment during World War II. With their deep knowledge of Middle Eastern affairs, the three men were heirs to an American missionary tradition that engaged Arabs and Muslims with respect and empathy. Yet they were also fascinated by imperial intrigue, and were eager to play a modern rematch of the "Great Game," the nineteenth-century struggle between Britain and Russia for control over central Asia. Despite their good intentions, these "Arabists" propped up authoritarian regimes, attempted secretly to sway public opinion in America against support for the new state of Israel, and staged coups that irrevocably destabilized the nations with which they empathized. Their efforts, and ultimate failure, would shape the course of U.S.–Middle Eastern relations for decades to come. Based on a vast array of declassified government records, private papers, and personal interviews, America's Great Game tells the riveting story of the merry band of CIA officers whose spy games forever changed U.S. foreign policy.

Historian Barbara Tuchman follows the career of Vinegar Joe Stilwell whose involvement in China spanned the years of revolution, civil war and invasion by the Japanese. It is both a biography of Stilwell and a historical work on Sino-American relations.

Vinegar Joe's War New York, Crowell

A remarkable history of the two-centuries-old relationship between the United States and China, from the Revolutionary War to the present day From the clipper ships that ventured to Canton hauling cargoes of American ginseng to swap Chinese tea, to the US warships facing off against China's growing navy in the South China Sea, from the Yankee missionaries who brought Christianity and education to China, to the Chinese who built the American West, the United States and China have always been dramatically intertwined. For more than two centuries, American and Chinese statesmen, merchants, missionaries, and adventurers, men and women, have profoundly influenced the fate of these nations. While we tend to think of America's ties with China as starting in 1972 with the visit of President Richard Nixon to China, the patterns—rapturous enchantment followed by angry disillusionment—were set in motion hundreds of years earlier. Drawing on personal letters, diaries, memoirs, government documents, and contemporary news reports, John Pomfret reconstructs the surprising, tragic, and marvelous ways Americans and Chinese have engaged with one another through the centuries. A fascinating and thrilling account, *The Beautiful Country and the Middle Kingdom* is also an indispensable book for understanding the most important—and often the most perplexing—relationship between any two countries in the world.

Lost Chance in China Random House

This volume is centered on the performance of Lt. Gen. Joseph W. Stilwell. Stilwell was chief of staff to Chiang Kai-shek, in Chiang's capacity of commander in chief of China considered as an Allied theater; he administered U.S. lend-lease aid to China; and he commanded the CBI Theater. Chiang put him in charge of his force (three Chinese armies) in Burma during the ill-fated campaign of 1942, and this campaign, insofar as it involved his authority, is therefore described. Reading the history of the China-Burma-India Theater will be an eye opener and a lesson to those who, in the future, have to deal with allies in far distant lands about whom so much should be known and so little is. Contemporary history is limited in its vision, as indeed is all history, insofar as the records are limited. This history is no exception; the records used are mainly of U.S. Army origin. However, time flies and experience of the past is essential to wisdom in the future. To wait for additional evidence might deny pertinent information to those who need it now. Moreover, the records turned up by the authors of this book are exceptionally rich. A careful reading of this volume will emphasize the necessity on the part of the leading participants in a combined venture to understand the characteristics and over-all objectives of the nations as well as the individuals concerned in the endeavor. If such an understanding is present, and if due weight is given it by those involved in negotiations as well as in the execution of the plans, the better will be the result. The degree to which this understanding was achieved by the leading participants is left for the reader to decide. Decisions, to be sound, must perforce be based on up-to-date facts. The danger of making them from information supplied from not too well informed sources, and without information that could readily have been brought to bear, is self-evident.
