1D Kinematics Review - with Answers #2

Answer: E. When a car skids to a stop, the work done by friction upon the car is equal to the change in kinetic energy of the car. Work is directly proportional to the displacement of the car (skidding distance) and the kinetic energy is directly related to the square of the speed ($KE=0.5*m*v^2$). For this reason, the skidding distance is directly proportional to the square of the speed.

W/ answers Website Upload Big Numbers and Chemistry At the most fundamental level, the chemist needs a unit that describes a very large quantity. One of the most well-known numbers in the study of chemistry is number of units in a mole. The number of
