### **Patient Safety and Quality** World Health Organization

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, <http://www.ahrq.gov/qual/nursesdbk>.

### **Preparing for Professional Practice** New York Review of Books

Nurses and midwives have a professional responsibility to keep up-to-date with current research impacting on their clinical practice. They require the skills and knowledge to read and understand research reports, evaluate the quality of the research, synthesise different research studies, apply the most appropriate findings to their clinical practice and be able to evaluate its effectiveness. This book presents a unique approach to teaching the principles of health research using practical case studies with which students can identify and engage. The book covers core concepts and principles including: - what evidence is and why understanding research is vital - finding reliable sources of evidence - the nature of the research process - understanding quantitative and qualitative research - ethical considerations - using research to guide clinical practice. Throughout the book, activities, summaries and review questions help ground theory in real life scenarios, highlighting how evidence-based practice can be applied in every aspect of nursing care. 'The text is highly readable while achieving the aim of familiarising the reader with the language of, and process for, doing research. It is logically organised and ... guides reader learning using a variety of techniques that reinforce [the] information presented and challenge thinking.' Karen Francis, Professor of Nursing and Head of Nursing, University of Tasmania

Events of the past twenty years, including the Cold War and the War on Terror, have meant that the environments of international development co-operation have changed extensively, with dramatic consequences for development policies and North-South relations in general. Perspectives on European Development Cooperation takes stock of such changes, describing and analyzing the new European development agenda, including the role of the European Union. Essays by prominent authorities in the field examine the development policies of individual donor countries and focus on the principles and objectives governing aid strategies and the performances of these policies. This book will be of interest to students of development studies and those involved in determining development policy.

Inequity of control over food systems is a particularly insidious form of injustice. Collectively, the contributors to this volume posit that this inequity is rooted in power asymmetries in the U.S. food system and codified through U.S. food policies. This process puts the public at risk in the U.S. and, via trade and foreign aid policies, in the Global South. Inequities are manifest in the allocation of food and food-producing resources in favor of the wealthy, exploitation of the natural environment for short-term gain of private interests over long-term public ones, the framing of public discussion on food and food deprivation, and finally, the deflection of moral challenges posed by human rights to food. The contributors draw on long-term anthropological field research to examine these tensions and their on-the-ground outcomes in diverse cultural and national contexts. The authors' insightful analyses span a wide variety of topics including dietary change, food insecurity, livestock production, and organic farming in the light of U.S. trade, food, labor, and agricultural policies and food assistance programs. The collection highlights the obstacles to, and the dilemmas and inconsistencies in, shaping policy in the public interest. This book was originally published as a special issue of Food & Foodways.

Thoroughly revised and updated, this new edition of Neonatal Intensive Care Nursing is a comprehensive, evidence-based text for nurses and allied health professionals caring for sick newborn infants. This user-friendly text focuses on the common problems and related care occurring within the neonatal specialty. All previous chapters have been thoroughly updated and new content includes chapters on, for example, organisation of neonatal care, assessment of the neonate, the premature and low birth weight neonate as well as palliative care. In addition, the book now includes a broad and in-depth web-based companion comprising online resources, case studies with answer guides and learning activities. This accessible and interactive approach enables nurses to recognise, rationalise and understand clinical problems using an evidence-based approach. Divided into four parts, the book provides an overview of neonatal care, and a detailed look at the physical and emotional wellbeing of neonate and family, a range of clinical aspects of neonatal care, and key practices and procedures. Neonatal Intensive Care Nursing will be essential reading for both new and experienced nurses, allied health professionals and students learning about neonatal care including those undertaking qualifications in the neonatal specialism and pre-registration students taking relevant modules or placements.

Global warming is the most severe environmental challenge faced by humanity today and the costs of responding effectively will be high. While Russia's ratification of the Kyoto Protocol ensures the treaty's entry into force, lack of capacity, or incentives to renege on their commitments, will impede mitigation efforts in many countries. An important prerequisite for the proper functioning of the Protocol is that its compliance system - which is spelled out by the Marrakesh Accords - proves effective. Implementing the Climate Regime describes and analyses Kyoto's compliance system. Organized into four parts, Part I describes the emergence and design of the compliance system, while Part II analyses various challenges to its effective operation - such as the development of norms, verification and the danger that the use of punitive 'consequences' may also hurt compliant countries. Part III discusses the potential role of external enforcement, with particular emphasis on trade sanctions. Part IV addresses the relationship between Kyoto compliance on one hand, and international governance, oil companies and green NGOs on the other.

Social science theory often builds on sets and their relations. Correlation-based methods of scientific enquiry, however, use linear algebra and are unsuited to analyzing set relations. The development of Qualitative Comparative Analysis (QCA) by Charles Ragin has given social scientists a formal tool for identifying set-theoretic connections based on Boolean algebra. As a result, interest in this method has markedly risen among social scientists in recent years. This book offers the first complete introduction on how to perform QCA in the R software environment for statistical computing and graphics with the QCA package. Developed as a comprehensive solution, QCA provides an unprecedented scope of functionality for analyzing crisp, multi-value and fuzzy sets. The reader is not required to have knowledge of R, but the book assumes an understanding of the fundamentals of QCA. Using examples from published work, the authors demonstrate how to make the most of QCA's wide-ranging capabilities for the reader's own purposes. Although mainly written for political scientists, this book is also of interest to scholars from other disciplines in the social sciences such as sociology, business, management, organization, anthropology, education and health.
