The development of Africa's oil has greatly accelerated in recent years, with some countries looking at the prospect of almost unimaginable flows of money into their national budgets. But the story of African oil has usually been associated with conflict, corruption and disaster, with older producers such as Nigeria having little to show for the many billions of dollars they've earned. In this eye-opening book, former BBC correspondent Celeste Hicks questions the inevitability of the so-called resource curse, revealing what the discovery of oil means for ordinary Africans, and how China's involvement could mean a profound change in Africa's relationship with the West. A much-needed

account of an issue that will likely transform the fortunes of a number of African countries — for better or for worse.

Africa's New Oil Springer

Nearly five hundred years after her violent death, Anne Boleyn, second wife to Henry VIII, remains one of the world's most fascinating, controversial, and tragic heroines. Now acclaimed historian and bestselling author Alison Weir has drawn on myriad sources from the Tudor era to give us the first book that examines, in unprecedented depth, the gripping, dark, and chilling story of Anne Boleyn's final days. The tempestuous love affair between Henry VIII and Anne Boleyn scandalized Christendom and altered forever the religious landscape of England. Anne's ascent from private gentlewoman to queen was astonishing, but equally compelling was her shockingly swift downfall. Charged with high treason and imprisoned in the Tower of London in May 1536, Anne met her terrible end all the while

---

protesting her innocence. There remains, however, much mystery surrounding the queen's arrest and the events leading up to it: Were charges against her fabricated because she stood in the way of Henry VIII making a third marriage and siring an heir, or was she the victim of a more complex plot fueled by court politics and deadly rivalry? *The Lady in the Tower* examines in engrossing detail the motives and intrigues of those who helped to seal the queen's fate. Weir unravels the tragic tale of Anne's fall, from her miscarriage of the son who would have saved her to the horrors of her incarceration and that final, dramatic scene on the scaffold. What emerges is an extraordinary portrayal of a woman of great courage whose enemies were bent on utterly destroying her, and who was tested to the extreme by the terrible plight in which she found herself. Richly researched and utterly captivating, *The Lady in the Tower* presents the full array of evidence of Anne Boleyn's guilt—or innocence. Only in Alison Weir's capable hands can readers learn the truth about the

fate of one of the most influential and important women in English history. **BONUS:** This edition contains a *The Lady in the Tower* discussion guide and an excerpt from Alison Weir's *Mary Boleyn*. [Odd Child Out](#) Mulholland

This book explores how the Internet is connected to the global crisis of liberal democracy. Today, self-promotion is at the heart of many human relationships. The selfie is not just a social media gesture people love to hate. It is also a symbol of social reality in the age of the Internet. Through social

---

media people have new ways of rating and judging themselves and one another, via metrics such as likes, shares, followers and friends. There are new thirsts for authenticity, outlets for verbal aggression, and social problems. Social media culture and neoliberalism dovetail and amplify one another, feeding social estrangement. With neoliberalism, psychosocial wounds are agitated and authoritarianism is provoked. Yet this new sociality also inspires resistance and political mobilisation. Illustrating ideas and trends with examples from news and popular culture, the book outlines and applies theories from Debord, Foucault, Fromm, Goffman, and Giddens, among others. Topics covered include the global history of

communication technologies, personal branding, echo chamber effects, alienation and fear of abnormality. Information technologies provide channels for public engagement where extreme ideas reach farther and faster than ever before, and political differences are widened and inflamed. They also provide new opportunities for protest and resistance.
