This unnerving work is a contemplation of the middle-class existence in a changing world, narrated by an unstable man held hostage by his deteriorating mental state. The story begins with the unhappy marriage of junior clerk Earl Summerfield to the much older Bianca. Feeling victimized by his cold wife and mocking superiors at work, Earl decides to keep a diary, a chronicle of his apparently crumbling marital relations, the paranoia and abuses he is seemingly forced to tolerate at work, and the world around him going to pieces in 1960's San Francisco. What he sees, what he says, what he wants to say -- everything swarms his head and consciousness, inciting and fueling fantasies of love, ambition, and avenging the violent crimes with which he was become obsessed. His angry and unstable mind alternates between feelings of apprehension and disgust, and exploring his own violent, sexual fantasies, and Earl takes action first by breaking into other peoples' houses and then fixating on various

women, before settling with utmost and troubling certainty on the local beauty queen, Mara St. John's.

Now a major motion picture starring Nicolas Cage and directed by Gabe Polsky. In his National Book Award-winning novel *Augustus*, John Williams uncovered the secrets of ancient Rome. With *Butcher's Crossing*, his fiercely intelligent, beautifully written western, Williams dismantles the myths of modern America. It is the 1870s, and Will Andrews, red up by Emerson to seek "an original relation to nature," drops out of Harvard and heads west. He washes up in *Butcher's Crossing*, a small Kansas town on the outskirts of nowhere. *Butcher's Crossing* is full of restless men looking for ways to make money and ways to waste it. Before long Andrews strikes up a friendship with one of them, a man who regales Andrews with tales of immense herds of buffalo, ready for the taking, hidden away in a beautiful valley deep in the Colorado Rockies. He convinces Andrews to join in an expedition to track the animals down. The journey out is grueling, but at the end is a place of paradisaical richness. Once there, however, the three men abandon themselves to an orgy of slaughter, so caught up in killing buffalo that they lose all sense of time. Winter soon overtakes them: they are snowed in. Next spring, half-insane with cabin fever, cold, and hunger, they stagger back to *Butcher's Crossing* to find a world as irremediably changed as they have been.

First published in 1948, *Nothing but the Night* marked the auspicious beginning of John Williams' career as a novelist--a career that would go on to include the classics *Stoner* and the National Book Award winning *Augustus*. In the person of Arthur Maxley, Williams investigates the terror and the waywardness of a man who has suffered an early traumatic experience. As a child, Maxley witnessed a scene of such violence and of such a nature that the evocation of Greek tragedy is inescapable. now,

years later, we move through a single significant day in the grown Arthur Maxley's life, the day when he is to meet his father, who has been absent for many years. With rare economy and clarity, the story moves at an ever-increasing pace to its unforgettable end.

The New York Times bestselling author of *The Origins of Political Order* offers a provocative examination of modern identity politics: its origins, its effects, and what it means for domestic and international

affairs of state. In 2014, Francis Fukuyama wrote that American institutions were in decay, as the state was progressively captured by powerful interest groups. Two years later, his predictions were borne out by the rise to power of a series of political outsiders whose economic nationalism and authoritarian tendencies threatened to destabilize the entire international order. These populist nationalists seek direct charismatic connection to "the people," who are usually defined in narrow identity terms that offer an irresistible call to an in-group and exclude large parts of the population as a whole. Demand for recognition of one's identity is a master concept that unifies much of what is going on in world politics today. The universal recognition on which liberal democracy is based has been increasingly challenged by narrower forms of recognition based on nation, religion, sect, race, ethnicity, or gender, which have resulted in anti-immigrant populism, the upsurge of politicized Islam, the fractious "identity liberalism" of college campuses, and the emergence of white nationalism. Populist nationalism, said to be rooted in economic motivation, actually springs from the demand for recognition and therefore cannot simply be satisfied by economic means. The demand for identity cannot be transcended; we must begin to shape identity in a way that supports rather than undermines democracy. Identity is an urgent and necessary book—a sharp warning that unless we forge a universal understanding of human dignity, we will doom ourselves to continuing conflict.
