Comprehensive and detailed, this is the first ever study of ancient beer and its distilling, consumption and characteristics Examining evidence from Greek and Latin authors from 700 BC to AD 900, the book demonstrates the important technological as well as ideological contributions the Europeans made to beer throughout the ages. The study is supported by textual and archaeological evidence and gives a fresh and fascinating insight into an aspect of ancient life that has fed through to modern society and which stands today as one of the world ' s most popular beverages. Students of ancient history, classical studies and the history of food and drink will find this an useful and enjoyable read.

Various uses of knowledge in the Spanish world from the Archpriest of Hita to Mateo Alemán Walter de Gruyter

Transhumance is a form of pastoralism that has been practised around the world since animals were first domesticated. Such seasonal movements have formed an important aspect of many European farming systems for several thousand years, although they have declined markedly since the nineteenth century. Ethnographers and geographers have long been involved in recording transhumant practices, and in the last two decades archaeologists have started to add a new material dimension to the subject. This volume brings together recent advances in the study of European transhumance during historical times, from Sweden to Spain, Romania to Ireland, and beyond that even Newfoundland. While the focus is on the archaeology of seasonal sites used by shepherds and cowherds, the contributions exhibit a high degree of interdisciplinarity. Documentary, cartographic, ethnographic and palaeoecological evidence all play a part in the examination of seasonal movement and settlement in medieval and post-medieval landscapes. Notwithstanding the obvious diversity across Europe in terms of livestock, distances travelled and socio-economic context, an extended introduction to the volume shows that cross-cutting themes are now emerging, including mobility, gendered herding, collective land-use, the agency of non-elite people and competition for grazing and markets. The book will appeal not only to archaeologists, but to historians, geographers, ethnographers, palaeoecologists and anyone interested in rural lifeways across Europe.

The aim of this book is to bring together multidisciplinary research in the field of green infrastructure design, construction and ecology. The main core of the volume is constituted by contributions dealing with green infrastructure, vegetation science, nature-based solutions and sustainable urban development. The green infrastructure and its ecosystem services, indeed, are gaining space in both political agendas and academic research. However, the attention is focused on the services that nature is giving for free to and for human health and survival. What if we start to see things from another perspective? Our actions shall converge for instance to turn man-made environment like cities from heterotrophic to autotrophic ecosystems. From landscape ecology to urban and building design, like bricks of a wall, from the small scale to the bigger landscape scale via ecological networks and corridors, we should start answering these questions: what are the services that are we offering to Nature? What are we improving? How to implement our actions? This book contains three Open Access chapters, which are licensed under the terms of the Creative Commons Attribution 4.0 International License (CC BY 4.0).

This volume of collected essays explores the premise that Plutarch ' s work, notwithstanding its amazing thematic multifariousness, constantly pivots on certain ideological pillars which secure its unity and coherence. So, unlike other similar books which, more or less, concentrate on either the Lives or the Moralia or on some particular aspect(s) of Plutarch ' s oeuvre, the articles of the present volume observe Plutarch at work in both Lives and Moralia, thus bringing forward and illustrating the inner unity of his varied literary production. The subject-matter of the volume is uncommonly wide-ranging and the studies collected here inquire into many important issues of Plutarchean scholarship: the conditions under which Plutarch ' s writings were separated into two distinct corpora, his methods of work and the various authorial techniques employed, the interplay between Lives and Moralia, Plutarch and politics, Plutarch and philosophy, literary aspects of Plutarch ' s oeuvre, Plutarch on women, Plutarch in his epistemological and socio-historical context. In sum, this book brings Plutarchean scholarship to date by revisiting and discussing older and recent problematization concerning Plutarch, in an attempt to further illuminate his personality and work.

The information overload produced by the printing press and the new forms of the structuring of knowledge are echoed in fictional works. The essays assembled in this book study the textualization of problematic forms of knowledge in medieval and early modern Spanish literature. Literary Works like the Libro buen amor, La Lozana Andaluza, or the Guzmán de Alfarache are read against the backdrop of scientific developments of their times.

The Making of Medieval Sardinia Walter de Gruyter GmbH & Co KG

This volume examines the painting, sculpture, decorative arts, and architecture produced in nine important court cities of Italy during the course of the fourteenth, fifteenth, and sixteenth centuries. Although each chapter represents a separate study of a particular geographical

locale, many common themes emerge. This volume gives a multifaceted consideration of the art created for princes, prelates, confraternities, and civic authorities – works displayed in public squares, private palaces, churches, and town halls. Including six essays specially commissioned that explore the interaction of artists and their civic and/or courtly patrons within the context of prevailing cultural, political, and religious circumstances, *The Court Cities of Northern Italy* provides a rich supplement to traditional accounts of the artistic heritage of the Italian Renaissance, which has traditionally focused on the Florentine, Venetian, and Roman traditions. The book includes 35 color plates and 221 black and white illustrations.

Piero Sraffa's work has had a lasting impact on economic theory and yet we know surprisingly little about the man behind it. This is the first intellectual biography of Sraffa and it details his working relationship with thinkers as diverse as Gramsci, Keynes, Wittgenstein as well as discussing the genesis of his major works.

Benvenuto Olivieri and Paul III, 1534 – 1549 Springer Nature

The last several decades have seen a dramatic increase in interest in the Roman period on the island of Crete. Ongoing and some long-standing excavations and investigations of Roman sites and buildings, intensive archaeological survey of Roman areas, and intensive research on artifacts, history, and inscriptions of the island now provide abundant data for assessing Crete alongside other Roman provinces. New research has also meant a reevaluation of old data in light of new discoveries, and the history and archaeology of Crete is now being rewritten. The breadth of topics addressed by the papers in this volume is an indication of Crete ' s vast archaeological potential for contributing to current academic issues such as Romanization/accluturation, climate and landscape studies, regional production and distribution, iconographic trends, domestic housing, economy and trade, and the transition to the late-Antique era. These papers confirm Crete ' s place as a fully realized participant in the Roman world over the course of many centuries but also position it as a newly discovered source of academic inquiry.

Benvenuto Olivieri was a Florentine banker active in Rome during the first half of the sixteenth century. A self made man without any great family patrimony, he rose to prominence during the pontificate of Pope Paul III, becoming involved with a variety of papal enterprises which allowed him to get to the heart of the mechanisms governing the papal finances. Amassing a considerable fortune along the way, Olivieri soon built himself a role as co-ordinator of the appalti (revenue farms) and became one of the most powerful players in the complex network that connected bankers and the papal revenue. This book explores the indissoluble link that had developed between the papacy and bankers, illuminating how the Apostolic Chamber, increasingly in need of money, could not meet its debts, without farming out the rights to future income. Utilising documents from a rich corpus of unpublished sources in Florence and Rome, Guidi Bruscoli unravels the web of financial connections that bound together Florentine and Genoese bankers with the papacy, and looks at how money was raised and the appalti managed.

Civilian Targeting in the Shadow of International Law BRILL

Histories of the Napoleonic period are almost exclusively biographies of the man, or political-military accounts of his wars. But such wars were only the first stage in a far more ambitious programme; the establishment of a rational state which would force the pace of modernising society. Through an examination of the experiences of French domination, *Napoleon's Integration of Europe* explores the implications of such a project for France and its relationship with the rest of Europe. It examines the problems of ruling a progressively expanding empire, as seen through the eyes of a trained corps of bureaucrats who were convinced that their scientific methods would enable them to understand and govern the mechanisms of society. However it also looks at the populations subjected to French rule, at the nature of their resistance and adaptation to the principles of the Napoleonic project. This book is the first overall comparative study of Europe in the Napoleonic years. It is a study not only of an early exercise in imperialism, but of the conflict that is aroused between the rationalising tendencies of the modern state and the spatial and cultural heterogeneity of individual societies. As well as a history of France, it is also a history of Italy, Germany, Belgium, Holland, Switzerland, Poland and Spain at a crucial moment in the history of each nation state.

This biography illuminates the life of Ennio De Giorgi, a mathematical genius in parallel with John Nash, the Nobel Prize Winner and protagonist of *A Beautiful Mind*. Beginning with his childhood and early years of research, into his solution of the 19th problem of Hilbert and his professorship, this book pushes beyond De Giorgi ' s rich contributions to the mathematics community, to present his work in human rights, including involvement in the fight for Leonid Plyushch ' s freedom and the defense of dissident Uruguayan mathematician José Luis Massera. Considered by many to be the greatest Italian analyst of the twentieth century, De Giorgi is described in this volume in full through documents and direct interviews with friends, family, colleagues, and former students.

Historical Archaeologies of Transhumance across Europe Routledge

This is the fourth in a continuing series of collected essays by the former editors of *Monthly Review* on the state of the U.S. economy and its relation to the global system. Like its predecessors, this volume focuses on the most recent phase of the development of U.S. capitalism, stressing the profound contradictions of the underlying processes of capital accumulation and pointing the way to the fundamental reforms that are the essential precondition for a real economic revival.

'Moralia' Themes in the 'Lives', Features of the 'Lives' in the 'Moralia' BRILL

Long neglected by scholars, medieval and Renaissance Bologna is now recognized as a center of economic, political-constitutional, legal, and intellectual innovation, as the city that served as the cultural crossroads of Italy. The city ' s distinctive achievements and its transition from medieval commune to second largest city of the Renaissance Papal State is illuminated by essays that present the work of current historians, many made available in English for the first time, from the broadest possible perspective: from the material city with its porticoes, the conflicts that brought bloodshed and turmoil to its streets, the disputations of masters and students, and to the masterpieces of artists who laid the foundations for Baroque art.--
