time it took to travel that distance ($S = D / T$).
In this portion of the lab you will travel certain
distances at different speeds and make
several calculations with this data. Also
remember that the average speed is not
necessarily the actual speed an object is
traveling, it is merely the average speed.

Has anybody trained their dog like this?
Whistle cues, stopping on a dime? Do you have
any tips? In my particular case the dog will be
Simba, our 9 month lab. Right now, he'll sit
right away if I'm near by. If he's far away from

me when I give him the command to sit, he'll look around a bit like he's unsure and take a few steps towards me.

Reports from the lab: Physics: Stopping on a dime
STOP ON A DIME LAB PGS. 326-327 Be sure and read the entire lab. Understand that the purpose behind the lab is to determine the distance needed between the out of bounds line and the wall. The list of people's reaction time, running time, and stopping distance is a sample of people who ran down the hall as fast as they can (distance of 25

Lab Investigation Stopping on a Dime

Reviewing Content An object in motion has

three properties. Distance refers to how far

the object has moved from its starting

point. Time refers to how long the object

has been in motion. The speed of an object

is equal to the distance the object moves

per unit of time. To determine average

speed,

Motion, Forces, and Energy Worksheets

EDIT: Re-reading the questions, it seems like

the question is about a car model in physics

class that can't use brakes. First of all, the

English idiom stop on a dime simply means to

stop as quickly as possible. Unless your

teacher is making some ...
