"Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--

This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the *European Journal of Social Work*.

Giving organizations the ability to track, secure, and manage items from the time they are raw materials through the life-cycle of the product, radio frequency identification (RFID) makes internal processes more efficient and improves overall supply chain responsiveness. Helping you bring your organization into the future, *RFID in the Supply Chain: A Guide to Selection and Implementation* explains RFID technology, its applications in SCM, data storage and retrieval, business processes, operational and implementation problems, risks, security and privacy, facility layout, handling systems and methods, and transportation costs. In short, with its soup-to-nuts coverage, the book ensures that your RFID implementation is successful and that you get the most from your investment. The book discusses the major paradigm shift in product traceability that began with transitioning to RFID technology from bar code technology. It examines the economic feasibility of rolling out RFID and the challenges in supply chain synchronization, customer privacy, security, operations and IT, logistics, program management, education and training, and implementation, as well as what lessons have been learned. The author addresses the RFID business processes needed to analyze and resolve problems the suppliers face when they deal with multiple customers, each with a different mandate, and with their own set of suppliers. Going beyond the technology and how it has changed supply chain processes, the book includes selection guidelines and implementation examples, such as speed of tag reads versus quality of computer inputs and optimal tag location. The author discusses the implementation of a business process model and the separate but equal concerns that business and IT executives have about the implementation of RFID applications. The book also covers security, integrated control management linked to the corporate strategy, and laws and regulations.

This atlas presents normal and pathologic findings observed on CT angiography with 3D reconstruction in a diverse range of clinical applications, including the imaging of cerebral, carotid, thoracic, coronary, abdominal and peripheral vessels. The superb illustrations display the excellent anatomic detail obtained with CT angiography and depict the precise location of affected structures and lesion severity. Careful comparisons between normal imaging features and pathologic appearances will assist the reader in image interpretation and treatment planning and the described cases include some very rare pathologies. In addition, the technical principles of the modality are clearly explained and guidance provided on imaging protocols. This atlas will be of value both to those in training and to more experienced practitioners within not only radiology but also cardiovascular surgery, neurosurgery, cardiology and neurology.

There were 480 companies in the World Trade Center in NYC. Only 230 companies had a disaster recovery plan in place. 100 companies probably did not need one due to their small size. Which leaves 160 companies that did not have a plan in place and as a result they will not be around a year from now! This book explains to system administrators and architects what they need to know to plan for and get through disaster recovery. It incorporates the latest technologies in data storage, networks, server systems, and the Internet (Web-based recovery planning and crisis management) and shows how they can become components of a corporate survival strategy for future disasters. This third edition is completely revised and updated to reflect new information on data storage topologies, challenges for recovery, problem of data re-hosting as well as coverage of latest technologies and trends. The book also covers the lessons learned from WTC disaster and includes references to the California power outages, new mailroom procedures--due to anthrax scares--and new physical access controls that enable you to know where everyone is in a building by tagging them with an electronic badge.

Augustine, the man with upturned eye, with pen in the left hand, and a burning heart in the right (as he is usually represented), is a philosophical and theological genius of the first order, towering like a pyramid above his age, and looking down commandingly upon succeeding centuries. He had a mind uncommonly fertile and deep, bold and soaring; and with it, what is better, a heart full of Christian love and humility. He stands of right by the side of the greatest philosophers of antiquity and of modern times. We meet him alike on the broad highways and the narrow footpaths, on the giddy Alpine heights and in the awful depths of speculation, wherever philosophical thinkers before him or after him have trod. As a theologian he is facile princeps, at least surpassed by no church father, schoolman, or reformer. With royal munificence he scattered ideas in passing, which have set in mighty motion other lands and later times. He combined the creative power of Tertullian with the churchly spirit of Cyprian, the speculative intellect of the Greek church with the practical tact of the Latin. He was a Christian philosopher and a philosophical theologian to the full.

When a bad day at work culminates in losing out on a promotion, Jim Sanders shifts into his animal form to let off steam. Then his bad day turns into a bad night while prowling his Atlantic City neighborhood as a large gray house cat, he's caught in a torrential downpour. What little luck he has washes down the gutter when his new boss, Andrew Wright, catches him taking shelter on his porch, brings him inside, and starts calling him Mr. Frosty. As a feline, Jim becomes the inadvertent confessor for his boss's lonely son, Tony, a victim of schoolyard bullying. As a human, he feels drawn to Andrew, a man he wanted to resent. Finding love was never part of Jim's plan for the future—not with his bizarre secret—yet suddenly he finds himself navigating that minefield anyway. But not everything is easy, especially for an interracial gay couple dealing with prejudice in the workplace, at Tony's school, and even within their own families.

The world-renowned economist offers "dourly irreverent analyses of financial debacle from the tulip craze of the seventeenth century to the recent plague of junk bonds." —The Atlantic. With incomparable wisdom, skill, and wit, world-renowned economist John Kenneth Galbraith traces the history of the major speculative episodes in our economy over the last three centuries. Exposing the ways in which normally sane people display reckless behavior in pursuit of profit, Galbraith asserts that our "notoriously short" financial memory is what creates the conditions for market collapse. By recognizing these signs and understanding what causes them we can guard against future recessions and have a better hold on our country's (and our own) financial destiny.
