Past Lives - Page 1  
The growth rings in these fossil oyster shells tell us how old the animals were when they died. As with the fossil tree, one ring equals one year of growth for these oysters. A lot of organisms have features that reveal details about their lifetime.

Paleoecology - Page 1  
The oldest known fossil hominins—i.e., primates belonging to the human lineage after it separated from lineages going to the apes—are 6 million to 7 million years old, come from Africa, and are known as Sahelanthropus and Orrorin (or Praeanthropus), which were predominantly bipedal when on the ground but which had very small brains.

Stories from the fossil record Flashcards | Quizlet  
Fossil record, history of life as documented by fossils, the remains or imprints of organisms from earlier geological periods preserved in sedimentary rock. In a few cases the original substance of the hard parts of the organism is preserved, but more often the original components have been replaced by minerals deposited from water seeping through the rock .
