STORIES FROM THE FOSSIL RECORD Flashcards | Quizlet

Fossils represent the only evidence we have of life in the past. Fossils can provide clues that will help us answer questions. Let's look at some fossils that provide such clues.

Past Lives - Page 2b

fossil - remains of an organism; phylogenetic tree - evolutionary history; 6. Examine the fossil that was unearthed in a museum, apparently the labels and other information were lost. Using your fossil record, determine the time period this fossil is likely from. Montanian or californian . 7.

Past Lives - Page 2a

The oldest known fossil hominins—i.e., primates belonging to the human lineage after it separated from lineages going to the apes—are 6 million to 7 million years old, come from Africa, and are known as Sahelanthropus and Orrorin (or Praeanthropus), which were predominantly bipedal when on the ground but which had very small brains.

Fossil Record - Wiley Online Library

Paleoecology is the study of ancient organisms and how they interact with the environment and with one another.. We can use evidence from fossils to understand the ecology of ancient organisms. Let's look at some fossils that provide such clues.

Paleoecology - Page 1

Stories From The Fossil Record provides students with a basic understanding of how fossils can be used to interpret the past. There are four different pathways to explore: biodiversity, geologic time, paleoecology and past lives. Designed for grades 5-9.

STORIES FROM THE FOSSIL RECORD study guide by caroline0525 includes 12 questions covering vocabulary, terms and more. Quizlet flashcards, activities and games help you improve your grades.

Fossils Tell A Story - Reading Comprehension Worksheet ...

This educational module is sponsored by the National Science Foundation.

Stories from the fossil record Flashcards | Quizlet

Fossil record, history of life as documented by fossils, the remains or imprints of organisms from earlier geological periods preserved in sedimentary rock. In a few cases the original substance of the hard parts of the organism is preserved, but more often the original components have been replaced by minerals deposited from water seeping through the rock .
