Intercourse is a book that moves through the sexed world of dominance and submission. It moves in descending circles, not in a straight line, and as in a vortex each spiral goes down deeper. Its formal model is Dante's Inferno; its lyrical debt is to Rimbaud; the equality it envisions is rooted in the dreams of women, silent generations, pioneer voices, lone rebels, and masses who agitated, demanded, cried out, broke laws, and even begged. The begging was a substitute for retaliatory violence: doing bodily harm back to those who use or injure you. I want women to be done with begging. The public censure of women as if we are rabid because we speak without apology about the world in which we live is a strategy of threat that usually works. Men often react to women's words - speaking and writing - as if they were acts of violence; sometimes men react to women's words with violence. So we lower our voices. Women whisper. Women apologize. Women shut up. Women trivialize what we know. Women shrink. Women pull back. Most women have experienced enough dominance from men - control, violence, insult, contempt - that no threat seems empty. Intercourse does not say, forgive me and love me. It does not say, I forgive you, I love you. For a woman writer to thrive (or, arguably, to survive) in these current hard times, forgiveness and love must be subtext. No. I say no. Intercourse is search and assertion, passion and fury; and its form - no less than its content - deserves critical scrutiny and respect.---- PREFACE

The Cambridge History of Judaism: Volume 2, The Hellenistic Age Montlake Romance

Armed conflict on the territory of the former Yugoslavia between 1991 and 2001 claimed over 200,000 lives, gave rise to atrocities unseen in Europe since the Second World War, and left behind a terrible legacy of physical ruin and psychological devastation.

Unfolding against the background of the end of cold war bipolarity, the new Balkan wars sounded a discordant counterpoint to efforts to construct a more harmonious European order, were a major embarrassment for the international institutions deemed responsible for conflict management, and became a preoccupation for the powers concerned with restoring regional stability. After more than a decade of intermittent hostilities the conflict has been contained, but only as a result of significant external interventions and the establishment of a series of de facto international protectorates, patrolled by UN, NATO, and EU sponsored peacekeepers with open-ended mandates.

Social policy in the European Union: state of play 2015 University Press of Colorado

The sixteenth edition of *Social policy in the European Union: state of play* has a triple ambition. First, it provides easily accessible information to a wide audience about recent developments in both EU and domestic social policymaking. Second, the volume provides a more analytical reading, embedding the key developments of the year 2014 in the most recent academic discourses. Third, the forward-looking perspective of the book aims to provide stakeholders and policymakers with specific tools that allow them to discern new opportunities to influence policymaking. In this 2015 edition of *Social policy in the European Union: state of play*, the authors tackle the topics of the state of EU politics after the parliamentary elections, the socialisation of the European Semester, methods of political protest, the Juncker investment plan, the EU's contradictory education investment, the EU's contested influence on national healthcare reforms, and the neoliberal Trojan Horse of the Transatlantic Trade and Investment Partnership (TTIP).

The twenty-seven original contributions to this volume investigate the ways in which the First World War has been commemorated and represented internationally in prose fiction, drama, film, docudrama and comics from the 1960s until the present. The volume thus provides a comprehensive survey of the cultural memory of the war as reflected in various media across national cultures, addressing the complex connections between the cultural post-memory of the war and its mediation. In four sections, the essays investigate (1) the cultural legacy of the Great War (including its mythology and iconography); (2) the implications of different forms and media for representing the war; (3) 'national' memories, foregrounding the differences in post-memory representations and interpretations of the Great War, and (4) representations of the Great War within larger temporal or spatial frameworks, focusing specifically on the ideological dimensions of its 'remembrance' in historical, socio-political, gender-oriented, and post-colonial contexts.

Critical Perspectives on J. M. Coetzee Montlake Romance

This edited collection explores the ways in which our understanding of the past in Dutch history and culture can be rethought to consider not only how it forms part of the present but how it can relate also to the future. Divided into three parts - The Uses of Myth and History, The Past as Illumination of Cultural Context, and Historiography in Focus - this book seeks to demonstrate the importance of the past by investigating the transmission of culture and its transformations. It reflects on the history of historiography and looks critically at the products of the historiographic process, such as Dutch and Afrikaans literary history. The chapters cover a range of disciplines and approaches: some authors offer a broad view of a particular period, such as Jonathan Israel's contribution on myth and history in the ideological politics of the Dutch Golden Age, while others zoom in on specific genres, texts or historical moments, such as Benjamin Schmidt's study of the doolhof, a word that today means 'labyrinth' but once described a 17th-century educational amusement park. This volume, enlightening and home to multiple paths of enquiry leading in different directions, is an excellent example of what a past-present doolhof might look like.

This book is open access under a CC BY-NC 2.5 license. On April 22, 1915, the German military released 150 tons of chlorine gas at Ypres, Belgium. Carried by a long-awaited wind, the chlorine cloud passed within a few minutes through the British and French trenches, leaving behind at least 1,000 dead and 4,000 injured. This chemical attack, which amounted to the first use of a weapon of mass destruction, marks a turning point in world history. The preparation as well as the execution of the gas attack was orchestrated by Fritz Haber, the director of the Kaiser Wilhelm Institute for Physical Chemistry and Electrochemistry in Berlin-Dahlem. During World War I, Haber transformed his research institute into a center for the

development of chemical weapons (and of the means of protection against them). Bretislav Friedrich and Martin Wolf (Fritz Haber Institute of the Max Planck Society, the successor institution of Haber's institute) together with Dieter Hoffmann, Jürgen Renn, and Florian Schmaltz (Max Planck Institute for the History of Science) organized an international symposium to commemorate the centenary of the infamous chemical attack. The symposium examined crucial facets of chemical warfare from the first research on and deployment of chemical weapons in WWI to the development and use of chemical warfare during the century hence. The focus was on scientific, ethical, legal, and political issues of chemical weapons research and deployment - including the issue of dual use - as well as the ongoing effort to control the possession of chemical weapons and to ultimately achieve their elimination. The volume consists of papers presented at the symposium and supplemented by additional articles that together cover key aspects of chemical warfare from 22 April 1915 until the summer of 2015.

Building the American Republic, Volume 2 Graywolf Press

This original study examines women's activism against war in areas as far apart as Sierra Leone, India, Colombia and Palestine. It shows women on different sides of conflicts in the former Yugoslavia and Israel addressing racism and refusing enmity and describes international networks of women opposing US and Western European militarism and the so-called 'war on terror'. These movements, though diverse, are generating an antimilitarist feminism that challenges how war and militarism are understood, both in academic studies and the mainstream anti-war movement. Gender, particularly the form taken by masculinity in a violent sex/gender system, is inseparably linked to economic and ethno-national factors in the perpetuation of war.

Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. Testimonios seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.

Gambling Debt is a game-changing contribution to the discussion of economic crises and neoliberal financial systems and strategies. Iceland's 2008 financial collapse was the first case in a series of meltdowns, a warning of danger in the global order. This full-scale anthropology of financialization and the economic crisis broadly discusses this momentous bubble and burst and places it in theoretical, anthropological, and global historical context through descriptions of the complex developments leading to it and the larger social and cultural implications and consequences. Chapters from anthropologists, sociologists, historians, economists, and key local

participants focus on the neoliberal policies—mainly the privatization of banks and fishery resources—that concentrated wealth among a select few, skewed the distribution of capital in a way that Iceland had never experienced before, and plunged the country into a full-scale economic crisis. *Gambling Debt* significantly raises the level of understanding and debate on the issues relevant to financial crises, painting a portrait of the meltdown from many points of view—from bankers to schoolchildren, from fishers in coastal villages to the urban poor and immigrants, and from artists to philosophers and other intellectuals. This book is for anyone interested in financial troubles and neoliberal politics as well as students and scholars of anthropology, sociology, economics, philosophy, political science, business, and ethics. Publication supported in part by the National Science Foundation.
