Building the Knowledge Economy IGI Global  
This title was first published in 2002: The history of management consulting in Britain is a subject that has received little attention in the past in terms of research or publication. This work redresses the gap in the knowledge base of business and management history, presenting the historical situation in the context of management consulting. Identifying the beginnings of consultancy services

in the mid-nineteenth century, Ferguson charts its progression through a series of time frames that span the twentieth century. Utilizing a series of consistent themes, such as service delivery forms and training, which can be compared and contrasted across time, the book provides not only a history of management consultancy services, but also shows how the take-up and form of services was heavily dependent upon the prevailing attitudes within business to the role of management. The thoroughly researched and well-presented arguments in this book will greatly add to our knowledge of British management during the twentieth century.

'e-Business Strategies for Virtual Organizations' enables IT managers and directors to develop and implement IT strategies and infrastructures for new models of doing business based on the Internet. The authors provide a brief introduction to the concepts and strategic issues surrounding information warfare, managing organizational knowledge, and the information economy. The virtual organization is now an important business model for contemporary business organizations and the flexibility and adaptability of the virtual organization

make it ideal for survival in today's highly competitive and dynamically changing markets. Modern corporations may utilize some of the features of the virtual organization to develop the ideal organization to a greater or lesser extent depending on individual business circumstances. This book covers the issues involved in planning, realizing and managing such a virtual organization, and the role of information and communication technologies in supporting virtual organizations and virtual organizing is addressed throughout.
