Doing What Works in Brief Therapy: A Strategic Solution Focused Approach is both a set of procedures for the therapist and a philosophy – one that is shared with clients and one that guides the work of the therapist. This second edition continues its excellence in offering clinicians a guide to doing what works in brief therapy- for whom, and when and how to use it. Psychotherapy that follows these guidelines validates the client's most important concerns – and it often turns out to be surprisingly brief. Author, Ellen Quick integrates strategic and solution focused therapy and includes guidelines for tailoring technique and interventions to client characteristics and preferences. With clinically rich examples throughout, this book offers applications for couples, including indications for individual or conjoint sessions. - Chapter summaries highlighting key points - Presents ways of eliciting what clients most want to remember - Describes the "Doing What Works Group," including outcome research findings and all materials needed to run the group - Addresses the relationship among the positive psychology movement and this approach and the potential for collaboration - Emphasizes an acceptance-based stance and how acceptance commonly leads to change - Proposes that "doing what works and changing what doesn't" can provide a transtheoretical perspective for therapists of any orientation

Mastering the Way You See the World Inspired by Edward de Bono's Six Thinking Hats method, Jim Gilmore has created a unique and useful tool to help our ability to perceive. In his latest book, Look: A Practical Guide for Improving Your Observational Skills, Gilmore introduces the metaphor of "six looking glasses." Each looking glass represents a particular skill to master in order to enhance the way we look at the world. The six skills include binoculars, bifocals, magnifying glass, microscope, rose-colored glasses, and blindfold looking. Each looking glass provides an observational lens through which to see the world differently. This framework will help its users to: • See the big picture • Overcome personal bias • Pinpoint significance • Better scrutinize numerous details • Uncover potential opportunities • See what's in the mind's eye These varying perspectives offer myriad practical applications: They can help any executive, manager, or designer more richly observe customer behavior, philanthropists and policy makers more keenly identify human needs, and anyone else interested in innovative thinking to first ground their ideation in practical observation. ?Gilmore helps readers grasp the Six Looking Glasses by including helpful everyday examples and practice exercises throughout. Put into practice, this method of looking will help you see the world with new eyes.

Building a Global Learning Organization: Using TWI to Succeed with Strategic Workforce Expansion in the LEGO Group describes how a multinational company developed a global structure for learning based on the TWI (Training Within Industry) program to create and sustain standardized work across multiple language and cultural platforms. In this book, Shingo Prize-winning author Patrick Graupp collaborates with two practitioners who performed the planning and implementation of the LEGO Group's worldwide Learning Organization. The book outlines the organizational and planning models used by the LEGO Group to create the internal ability to give and receive tacit skills and knowledge. Describing how and why TWI is used as the foundation for success in knowledge transfer across diverse languages and cultures, it provides step-by-step guidance on how to establish a solid organizational foundation for your own Learning Organization. Providing expert insight into the work of culture change, the book explains how to work with people to create motivation for moving to a new system of learning. It details the critical elements that made the implementation at the LEGO Group a success, identifies the stumbling blocks they encountered along the way, and explains how they were overcome. Case studies describe in detail what these efforts looked and felt like in actual application. The TWI program has long been recognized for its ability to generate results. After reading this book, you will gain valuable insight into how your organization whether large or small, national or international can integrate this timeless tool into your operating structure and your daily culture.

More than ever, the world needs strong, effective and ethical leadership. Asia is the world's fastest growing region. Its success in the 21st century will depend largely on the quality of its leaders. Learning from Leaders in Asia captures the rich experiences of leaders operating in the region, identifies the key elements of leadership and

offers practical advice on how to make a lasting impact. An important and timely book for all who want to seize the moment. Anson Chan, Former Chief Secretary for Administration, Hong Kong Special Administrative Region Learning from Leaders in Asia provides a solid understanding of the challenges faced by leaders in Asia today and tomorrow. It provides real life insights by leaders across various disciplines in overcoming challenges such as talent acquisition and retention, China strategies and globalization to name but a few. An invaluable read. Chen Shaopeng, President, Lenovo Emerging Market Group, Senior Vice President, Lenovo Group Learning from Leaders in Asia is a must-read for any business person in the world who wants to gain perspectives from Asia-based multinationals. It offers valuable insights as Asia's importance rises. William Fung, Group Managing Director, Li & Fung Ltd. Learning from Leaders in Asia presents a unique opportunity for readers to learn from the insights of the business executives who are part of one of the leading EMBA programs in the world. Having interacted with these talented men and women I can say with full confidence that they truly understand the issues of building and running a global business. That makes this book well worth reading and I highly recommend it. Jim Thompson, Chairman, Crown Worldwide Holdings Ltd. Learning from Leaders in Asia cuts through the data and popular opinions to offer an on-the-ground view of the region's latest developments. Combining the acute perceptions and broad sweep of Leadership Experiences in Asia, this book examines the complex issues and offers fundamental insights into the business cultures of a host of countries. In lucid terms, it spells out the unprecedented opportunities and challenges facing companies wanting to devise a strategy that effectively adapts to the Asian reality. Marjorie Yang, Chair, Esquel Group This extraordinary book is the sequel to Leadership Experiences in Asia, Dr. DeKrey's first effort to describe the functioning of leadership in the Asian contexts. There is no-one with better credentials for doing this than DeKrey, an American who has lived and worked in Hong Kong for more than two decades and who has experienced the very best examples of leadership both in the West as well as in Asia. There is no one whose leadership skills cannot be enhanced by the principles and illustrations laid out in this book. David M. Messick, Morris and Alice Kaplan Professor Emeritus of Ethics and Decision in Management, Kellogg School of Management, Northwestern University This timely and highly relevant book tackles the critical issues that keep general managers awake at night as they strive to build a sustainable and profitable business in Asia and, in particular, China. The triple challenges of building talent, encouraging breakthrough innovation and ensuring strong governance may be global, but they face added urgency and complexity in Asia given the very high expectations for growth and unique cultural challenges. The blend of theory, strategy and highly practical experience in this book provides invaluable advice for leaders who are determined to build a legacy in Asia. Ron McEachern, President, PepsiCo Asia

Trustees are responsible for the stewardship of assets and for implementing the mission of their endowment or foundation. Almost invariably trustees delegate the management of those assets to agents who are investment professionals. In this increasingly sophisticated and litigious financial world there can be a growing gap of comprehension, exacerbated by mathematics and jargon, between trustees who are responsible and agents who are accountable. This book aims to fill that gap. The book draws on the author's own experience and research and that of generations of investment professionals and academics to explain the fundamentals of investment strategy. Key features are therefore: Foreword by George Keane (founder and former president of Commonfund, won the first ever Lifetime Achievement Award from Foundation & Endowment Money Management) one of the icons of endowment fund management in the US Aimed at professional trustees An holistic approach to strategy Avoidance of jargon and mathematics Focus on principles underlying asset strategy

The Agile Virtual Enterprise Academic Press

New ways to manage change and to compete in a rapidly changing business world are emerging under the concept of the agile enterprise. Agile organizations can be almost any size or type, but what distinguishes them from their lumbering traditional business counterparts is the ability to read and to react quickly. They can also be virtual, meaning they can reconfigure themselves quickly and temporarily in response to a challenge, which gives them agility, but then dissolve or transmute themselves into something else. Goranson explains how they do this and how your own organization can do it too. With fascinating case studies and a unique metric, Goranson provides answers. The result is essential reading for management at almost any level within every type of organization. Now that serious management tools are beginning to appear, the agile virtual enterprise is no longer just a theoretical possibility—it's real. In fact, although they were never actually described that way, virtual organizations can be found throughout history, from the whaling companies of the 19th century through the film studios of the 20th. Goranson describes many of these businesses and gives us an understanding of how they evolved and why they worked. Of special interest is his metric. It requires no technical background to be understood and applied, yet it digs deeply into the philosophy of strategic management as well as its practicalities. Goranson also reports for the first time on the large scale research sponsored by the U.S. military to advance the state of the art in management science and to create the tools that eventually made the agile virtual enterprise what it is today.

Ten Years to Midnight Xlibris Corporation

What is it about the top tech product companies such as Amazon, Apple, Google, Netflix and Tesla that enables their record of consistent innovation? Most people think it's because these companies are somehow able to find and attract a level of talent that makes this innovation possible. But the real advantage these companies have is not so much who they hire, but rather how they enable their people to work together to solve hard problems and create extraordinary products. As legendary Silicon Valley coach--and coach to the founders of several of today's leading tech companies--Bill Campbell said, "Leadership is about recognizing that there's a greatness in everyone, and your job is to create an environment where that greatness can emerge." The goal of EMPOWERED is to provide you, as a leader of product management, product design, or engineering, with everything you'll need to create just such an environment. As partners at The Silicon Valley Product Group, Marty Cagan and Chris Jones have long worked to reveal the best practices of the most consistently innovative companies in the world. A natural companion to the bestseller INSPIRED, EMPOWERED tackles head-on the reason why most companies fail to truly leverage the potential of their people to innovate: product leadership.

The book covers: what it means to be an empowered product team, and how this is different from the “feature teams” used by most companies to build technology products recruiting and coaching the members of product teams, first to competence, and then to reach their potential creating an inspiring product vision along with an insights-driven product strategy translating that strategy into action by empowering teams with specific objectives—problems to solve—rather than features to build redefining the relationship of the product teams to the rest of the company detailing the changes necessary to effectively and successfully transform your organization to truly empowered product teams EMPOWERED puts decades of lessons learned from the best leaders of the top technology companies in your hand as a guide. It shows you how to become the leader your team and company needs to not only survive but thrive.

A More Valued Success Taylor & Francis

“Shows how humans have brought us to the brink and how humanity can find solutions. I urge people to read with humility and the daring to act.” —Harpal Singh, former Chair, Save the Children, India, and former Vice Chair, Save the Children International In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at PwC, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if we tackle them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness.

Populists on both sides of the political aisle routinely announce that the American Dream is dead. According to them, the game has been rigged by elites, workers can't get ahead, wages have been stagnant for decades, and the middle class is dying. Michael R. Strain, director of economic policy studies at the American Enterprise Institute, disputes this rhetoric as wrong and dangerous. In this succinctly argued volume, he shows that, on measures of economic opportunity and quality of life, there has never been a better time to be alive in America. He backs his argument with overwhelming—and underreported—data to show how the facts favor realistic optimism. He warns, however, that the false prophets of populism pose a serious danger to our current and future prosperity. Their policies would leave workers worse off. And their erroneous claim that the American Dream is dead could discourage people from taking advantage of real opportunities to better their lives. If enough people start to believe the Dream is dead, they could, in effect, kill it. To prevent this self-fulfilling prophecy, Strain's book is urgent reading for anyone feeling the pull of the populists. E. J. Dionne and Henry Olsen provide spirited responses to Strain's argument.

In Prometheus's Child, the first in an explosive series from New York Times bestseller Harold Coyle and noted military author Barrett Tillman, a new type of war is being fought by private paramilitary companies at the beck and call of the highest bidder. With the military and intelligence agencies spread thin, the United States is constantly calling upon the services of these organizations--and Strategic Solutions Inc. is among the best. What begins as a relatively simply military-training mission in Chad turns into a high-stakes game of nuclear brinkmanship as the men and women of Security Solutions, Inc. stumble across a plot to extract and ship yellowcake—the base fuel for a nuclear weapon—to any number of countries hostile to the US. The in-country force tracks the operation to a supposedly abandoned remote mine in the desert. They strike, but a convoy carrying the yellowcake shipment escapes their trap. With time running out, the SSI teams must pull together like they never have before to find a ship in international waters and recover its deadly cargo—by any means necessary. The success of any activity and process depends fundamentally on the possibility of balancing (symmetry) needs and their satisfaction. That is, the ability to properly define a set of success indicators. The application of the developed new multi-criteria decision-making (MCDM) methods can be eliminated or decreased by decision-makers' subjectivity, which leads to consistency or symmetry in the weight values of the criteria. In this Special Issue, 40 research papers and one review study co-authored by 137 researchers from 23 different countries explore aspects of multi-criteria modeling and optimization in crisp or uncertain environments. The papers propose new approaches and elaborate case studies in the following areas of application: MCDM optimization in sustainable engineering, environmental sustainability in engineering processes, sustainable multi-criteria production and logistics processes planning, integrated approaches for modeling processes in engineering, new trends in the multi-criteria evaluation of sustainable processes, and multi-criteria decision-making in strategic management based on sustainable criteria.

A guide for mining the imagination to find powerful new ways to succeed. We need imagination now more than ever—to find new opportunities, rethink our businesses, and discover paths to growth. Yet too many companies have lost their ability to imagine. What is this mysterious capacity? How does imagination work? And how can organizations keep it alive and harness it in a systematic way? The Imagination Machine answers these questions and more. Drawing on the experience and insights of CEOs across several industries, as well as lessons from neuroscience, computer science, psychology, and philosophy, Martin Reeves of Boston Consulting Group's Henderson Institute and Jack Fuller, an expert in neuroscience, provide a fascinating look into

the mechanics of imagination and lay out a process for creating ideas and bringing them to life: The Seduction: How to open yourself up to surprises The Idea: How to generate new ideas The Collision: How to rethink your idea based on real-world feedback The Epidemic: How to spread an evolving idea to others The New Ordinary: How to turn your novel idea into an accepted reality The Encore: How to repeat the process—again and again. Imagination is one of the least understood but most crucial ingredients of success. It's what makes the difference between an incremental change and the kinds of pivots and paradigm shifts that are essential to transformation—especially during a crisis. The Imagination Machine is the guide you need to demystify and operationalize this powerful human capacity, to inject new life into your company, and to head into unknown territory with the right tools at your disposal.
