Digital transformation is no longer news--it's a necessity. Despite the widespread threat of disruption, many large companies in traditional industries have succeeded at digitizing their businesses in truly transformative ways. The New York Times, formerly a bastion of traditional media, has created a thriving digital product behind a carefully designed paywall. Best Buy has transformed its business in the face of Amazon's threat. John Deere has formed a data-analysis arm to complement its farm-equipment business. And Goldman Sachs and many others are using digital technologies to reimagine their businesses. In *Driving Digital Strategy*, Harvard Business School professor Sunil Gupta provides an actionable framework for following their lead. For

over a decade, Gupta has studied digital transformation at Fortune 500 companies. He knows what works and what doesn't. Merely dabbling in digital or launching a small independent unit, which many companies do, will not bring success. Instead you need to fundamentally change the core of your business and ensure that your digital strategy touches all aspects of your organization: your business model, value chain, customer relationships, and company culture. Gupta covers each aspect in vivid detail while providing navigation tips and best practices along the way. Filled with rich and illuminating case studies of companies at the forefront of digital transformation, *Driving Digital Strategy* is the comprehensive guide you need to take full advantage of the limitless opportunities the digital age provides. *Optimizing Human Capital with a Strategic Project Office* John Wiley & Sons A comprehensive guide to using strategic HR methods to increase company performance. When it came to attracting and managing new talent, the recruiting and staffing team within a corporation's human resources department was once regarded as transactional, administrative, and not as effective as third party staffing companies because it was usually a fairly new introduction, and the staff often consisted of junior-level personnel. Over the last 15-20 years though, thanks to the professionalization of the "corporate talent acquisition" function, there have been dramatic changes in the way top employees are found through the use of technology, tools, sophisticated recruiting techniques, and the Internet media.

Unfortunately, however, the leader's role within this function has failed to evolve at the same speed, which is why Jeremy Eskenazi wrote *RecruitCONSULT! Leadership-The Corporate Talent Acquisition Leader's Field*

Book, to help improve and optimize the way corporate talent acquisition professionals lead. In this frank, realistic, and forward-thinking field guide, readers will learn: Corporate Staffing leadership does not happen in a vacuum and relationships are key; regardless of budget, resources, or industry, there are always effective Corporate Staffing strategy solutions available; Corporate Staffing/ Talent Acquisition leadership is an active process that must be focused; leading and managing Corporate Staffing is a distinct profession. Today, the position of recruiting leader has become significantly more complicated due to company globalization, and rather than administrators, corporations now look to employ true talent acquisition strategists who can drive competitive value for their organization and "win" through quality employees. While laying out strategic workforce plans for future development of staffing strategies, Eskenazi's unique business approach introduces the benefits of transitioning to this new-age form of recruiting, and he hopes his readers will be relieved to discover that what could be very stressful has been diffused, broken down into solutions, and presented with humor. **RecruitCONSULT! Leadership-- The Corporate Talent Acquisition Leader's Field Book**, is the definitive guidebook for anyone who is leading (or wants to lead) a corporate recruiting and staffing function. Corporate recruiting and staffing expert, Jeremy Eskenazi, details many of the issues, concepts, and solutions to challenges a corporate recruiting and staffing leader may face including: Workforce Planning, Metrics & Economics, Building a Consultative Staffing Team, Leading a Proactive Staffing Function, Organizational Politics, The Power of Relationships, Change Management, and the Globalization of Recruiting. **Common Sense Talent Management** John Wiley & Sons
In the twentieth century, large companies

employing many workers formed the bedrock of the U.S. economy. Today, on the list of big business's priorities, sustaining the employer-worker relationship ranks far below building a devoted customer base and delivering value to investors. As David Weil's groundbreaking analysis shows, large corporations have shed their role as direct employers of the people responsible for their products, in favor of outsourcing work to small companies that compete fiercely with one another. The result has been declining wages, eroding benefits, inadequate health and safety protections, and ever-widening income inequality. From the perspectives of CEOs and investors, fissioning--splitting off functions that were once managed internally--has been phenomenally successful. Despite giving up direct control to subcontractors and franchises, these large companies have figured out how to maintain the quality of brand-name products and services, without the cost of maintaining an expensive workforce. But from the perspective of workers, this strategy has meant stagnation in wages and benefits and a lower standard of living. Weil proposes ways to modernize regulatory policies so that employers can meet their obligations to workers while allowing companies to keep the beneficial aspects of this business strategy.

The DoD's intelligence, surveillance, and reconnaissance (ISR) capabilities -- such as satellites and unmanned aircraft systems -- are crucial to military operations, and demand for ISR capabilities has increased. Congress directed DoD to fully integrate its ISR capabilities, also known as the ISR enterprise, as it works to meet current and future ISR needs. This report: (1) describes the challenges that DoD faces in integrating its ISR enterprise; (2) assesses DoD's mgmt. approach for improving integration of its future ISR investments; and (3) evaluates the extent to which DoD has implemented key activities to ensure proposed new ISR capabilities fill gaps, are not duplicative, and use a joint approach to meeting war-fighters' needs. Today, most large port hubs include the circular economy transformation challenge, together with smart digitalization and Internet of Things (IoT), in their strategic priorities. However, many ports do not seem to have progressed beyond incremental,

small-scale sustainable innovations or the support of rather fragmented sustainability initiatives. The challenges are complex, since ports do not only have to reconsider their own core activities but also their role in the supply chain of shippers, to lift themselves out of the linear lock-in. Opportunities are also created, and port authorities and businesses need to embrace circular learning and turn these projects into sustainable business models. This strategic change or refocus requires new insights into innovative governance and business frameworks, the link between strategy and commercially viable business models, systems innovation, intensified stakeholder collaboration and co-creation, altered traffic segments and hinterland focus, amongst others. These Special Issue articles address current CE transition concerns salient to port strategists and managers, such as first strategic changes towards circular ports, building awareness on the importance of sustainability data and available space, and how port authorities can develop circular business models.

Do employees expect life insurance and disability? From EAP to concierge services, what else do employees want? How does COBRA work and what else do I need to do?
