The act defines structural pest
control: “ Structural pest control
means and includes the use of any
device or the application of any
substance to prevent, repel,
mitigate, curb, control, or eradicate
any structural pest in, on, under, or
around a structure, or within a part
of, or materials used in building, a
structure;

Structural pest control is the
management of structural pests,
that is, pests associated with
structures. It includes indoor as
well as some outdoor applications
of pesticides or devices intended to
control structural pests (insects,
spiders, rats, mice, birds, etc.).
