The Ceramic Engineering and Science Proceeding has been published by The American Ceramic Society since 1980. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.

Computerworld Springer Nature

This book report the advances in the synthesis of new nanomaterials for the remediation of natural waters, groundwaters, and wastewaters. The authors describe synthetic routes for the assembly of different nanomaterials for the removal of contaminants by adsorption, catalytic degradation, and antibacterial activity. The hazardous effects of nanomaterials in aquatic ecosystems are discussed. This book presents the trends in the development of advanced technologies available in the market based on nanomaterials for more efficient water remediation. The authors also discuss sustainable management of water resources according to the new technologies developed and the improved efficiency of remediation processes.

Communities in Action Springer

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Metalle stehen bei Anlegern nach wie vor hoch im Kurs. Egal ob Gold oder Silber, ob als Barren oder Münzen. Aber auch die sogenannten strategischen Metalle wie Wismut, Tellur oder Indium sind für Markus Miller die Grundlage einer effizienten Realwert-Strategie. Hier eröffnen sich hochinteressante Anlageperspektiven und exzellente Alternativen, die der breiten Öffentlichkeit oftmals vollkommen unbekannt sind. Und für eben diese breite Öffentlichkeit ist dieses Buch geschrieben. Der erfahrene Vermögensberater Markus Miller stellt darin verschiedene Investitionsmodelle und Testvergleiche von unterschiedlichen Anlagemethoden vor. Sein Wissen basiert auf Praxisrecherchen, die hier übersichtlich zusammengefasst sind. Das größte Potenzial sieht er im Segment der strategischen Metalle. Millers Top-Empfehlung »Geheimtipp Alpenfestung« ist auch ein Kapitel seines Buches. Dieses Modell ist in seiner intelligenten und breit diversifizierten Ausgestaltung absolut einzigartig. Von detaillierten Handlungsalternativen über Modelle, Strategien und Anbieterchecks bis hin zu Praxisrecherchen enthält dieses Buch alles, was für ein erfolgreiches Investment in Edelmetalle nötig ist.

[Plunkett's Automobile Industry Almanac 2008](#) John Wiley & Sons

This book is essential in understanding, investing and risk managing the holy grail of investments - structured products. The book begins by introducing structured products by way of a basic guide so that readers will be able to understand a payoff graphic, read a termsheet or assess a payoff formula, before moving on to the key asset classes and their peculiarities. Readers will then move on to the more advanced subjects such as structured products construction and behaviour during their lifetime. It also explains how to avoid important pitfalls in products across all asset classes, pitfalls that have led to huge losses over recent years, including detailed coverage of counterparty risk, the fall of Lehman Brothers and other key aspects of the financial crisis related to structured products. The second part of the book presents an original approach to implementing structured products in a portfolio. Key features include: A comprehensive list of factors an investor needs to take into consideration before investing. This makes it a great help to any buyer of structured products; Unbiased advice on product investments across several asset classes: equities, fixed income, foreign exchange and commodities; Guidance on how to implement structured products in a portfolio context; A comprehensive questionnaire that will help investors to define their own investment preferences, allowing for a greater precision when facing investment decisions; An original approach determining the typical distribution of returns for major product types, essential for product classification and optimal portfolio implementation purposes; Written in a fresh, clear and understandable style, with many figures illustrating the products and very little mathematics. This book will enable you to better comprehend the use of structured products in everyday banking, quickly analyzing a product, assessing which of your clients it suits, and recognizing its major pitfalls. You will be able to see the added value versus the cost of a product and if the payoff is compatible with the market expectations.

[Plunkett's Investment & Securities Industry Almanac 2008](#) FX Options and Structured Products Advanced Guidance to Excelling in the FX Market Once you have a textbook understanding of money market and foreign exchange products, turn to FX Options and Structured Products, Second Edition, for the beyond-vanilla options strategies and traded deals proven superior in today's post-credit crisis trading environment. With the thoroughness and balance of theory and practice only Uwe Wystup can deliver, this fully revised edition offers authoritative solutions for the real world in an easy-to-access format. See how specific products actually work through detailed case studies featuring clear examples of FX options, common structures and custom solutions. This complete resource is both a wellspring of ideas and a hands-on guide to structuring and executing your own strategies. Distinguish yourself with a valued skillset by: Working through practical and thought-provoking challenges in more than six dozen exercises, all with complete solutions in a companion volume Gaining a working knowledge of the latest, most popular products, including accumulators, kikos, target forwards and more Getting close to the everyday realities of the FX derivatives market through new, illuminating case studies for corporates, municipalities and private banking FX Options and Structured Products, Second Edition is your go-to road map to the exotic options in FX derivatives.

[Secrets of Swiss Banking](#) John Wiley & Sons

This classroom-tested textbook presents an active-learning approach to the foundational concepts of software design. These concepts are then applied to a case study, and reinforced through practice exercises, with the option to follow either a structured design or object-oriented design paradigm. The text applies an incremental and iterative software development approach, emphasizing the use of design characteristics and modeling techniques

as a way to represent higher levels of design abstraction, and promoting the model-view-controller (MVC) architecture. Topics and features: provides a case study to illustrate the various concepts discussed throughout the book, offering an in-depth look at the pros and cons of different software designs; includes discussion questions and hands-on exercises that extend the case study and apply the concepts to other problem domains; presents a review of program design fundamentals to reinforce understanding of the basic concepts; focuses on a bottom-up approach to describing software design concepts; introduces the characteristics of a good software design, emphasizing the model-view-controller as an underlying architectural principle; describes software design from both object-oriented and structured perspectives; examines additional topics on human-computer interaction design, quality assurance, secure design, design patterns, and persistent data storage design; discusses design concepts that may be applied to many types of software development projects; suggests a template for a software design document, and offers ideas for further learning. Students of computer science and software engineering will find this textbook to be indispensable for advanced undergraduate courses on programming and software design. Prior background knowledge and experience of programming is required, but familiarity in software design is not assumed.

[Der große Strategie- und Edelmetall-Guide](#) Springer

One of the best known fast computational algorithms is the fast Fourier transform method. Its efficiency is based mainly on the special structure of the discrete Fourier transform matrix. Recently, many other algorithms of this type were discovered, and the theory of structured matrices emerged. This volume contains 22 survey and research papers devoted to a variety of theoretical and practical aspects of the design of fast algorithms for structured matrices and related issues. Included are several papers containing various affirmative and negative results in this direction. The theory of rational interpolation is one of the excellent sources providing intuition and methods to design fast algorithms. The volume contains several computational and theoretical papers on the topic. There are several papers on new applications of structured matrices, e.g., to the design of fast decoding algorithms, computing state-space realizations, relations to Lie algebras, unconstrained optimization, solving matrix equations, etc. The book is suitable for mathematicians, engineers, and numerical analysts who design, study, and use fast computational algorithms based on the theory of structured matrices.

[Research Issues in Structured and Semistructured Database Programming](#) American Mathematical Soc.

This only and up-to-date monograph on this versatile method covers its use in a range of applications spanning the fields of physics, materials science, electrical engineering, medicine, and research and industry. Following an introduction, the highly experienced author goes on to investigate acoustic field structure, output signal formation in transmission raster acoustic microscopes and non-linear acoustic effects. Further chapters deal with the visco-elastic properties and microstructure of the model systems and composites used, as well as polymer composite materials and the microstructure and physical-mechanical properties of biological tissues. A handy reference for materials scientists, electrical engineers, radiologists, laboratory medics, test engineers, physicists, and graduate students.

The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets of the automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM.

[Risk Management, Strategic Thinking and Leadership in the Financial Services Industry](#) Springer

Since the development of the Black-Scholes model, research on equity derivatives has evolved rapidly to the point where it is now difficult to cut through the myriad of literature to find relevant material. Written by a quant with many years of experience in the field this book provides an up-to-date account of equity and equity-hybrid (equity-rates, equity-credit, equity-foreign exchange) derivatives modeling from a practitioner's perspective. The content reflects the requirements of practitioners in financial institutions: Quants will find a survey of state-of-the-art models and guidance on how to efficiently implement them with regards to market data representation, calibration, and sensitivity computation. Traders and structurers will learn about structured products, selection of the most appropriate models, as well as efficient hedging methods while risk managers will better understand market, credit, and model risk and find valuable information on advanced correlation concepts. Equity Derivatives and Hybrids provides exhaustive coverage of both market standard and new approaches, including: -Empirical properties of stock returns including autocorrelation and jumps -Dividend discount models -Non-Markovian and discrete-time volatility processes -Correlation skew modeling via copula as well

as local and stochastic correlation factors -Hybrid modeling covering local and stochastic processes for interest rate, hazard rate, and volatility as well as closed form solutions -Credit, debt, and funding valuation adjustment (CVA, DVA, FVA) -Monte Carlo techniques for sensitivities including algorithmic differentiation, path recycling, as well as multilevel. Written in a highly accessible manner with examples, applications, research, and ideas throughout, this book provides a valuable resource for quantitative-minded practitioners and researchers.

Visible Light Active Structured Photocatalysts for the Removal of Emerging Contaminants
Springer Nature

The investment and securities industry is rebounding from the dismal markets of the early 2000s. Improved corporate profits, low interest rates and efforts to improve corporate governance have led the way, despite recent scandals in the mutual funds industry. Meanwhile, the investment industry is increasingly a global business. This is partly due to the needs of multinational corporations to list their stocks or issue debt in more than one nation. For example, ADRs (American Depositary Receipts) are increasingly popular instruments. Cross-border investments and acquisitions continue at a rapid pace. Discount brokerages are enjoying improved levels of trading, while investment banks are developing new ways to create lucrative fees. This carefully-researched book (which includes a database of leading companies on CD-ROM) is a complete investments, securities and asset management market research and business intelligence tool -- everything you need to know about the business of investments, including: 1) Investment banking, 2) Stock brokers, 3) Discount brokers, 4) Online brokers, 5) Significant trends in financial information technologies, 6) Asset management, 7) Stock ownership by individuals and households, 8) 401(k)s and pension plans, 9) Mutual funds, 10) ETFs (Exchange traded funds), 11) ECNs (Electronic Communication Networks), 12) Developments at the NYSE and other exchanges. The book includes a complete chapter of vital industry statistics, an industry glossary, a complete list of industry contacts such as industry associations and government agencies, and our in-depth profiles of more than 300 leading firms in the investment and asset management business. A CD-ROM database of these firms is included with the book.

Fundamentals of Transfer Pricing ABC-CLIO

Nicht nur die Finanzkrise, sondern auch die Beschlüsse rund um Basel III haben die Rahmenbedingungen mit Blick auf die Unternehmensfinanzierung fundamental verändert. Daher gilt es neue Wege der Unternehmensfinanzierung zu bestreiten, um die Vorgaben aus Basel III gar nicht erst zur Bedrohung werden zu lassen. Unternehmen und Investoren erhalten in diesem Buch einen leicht verständlichen Überblick über moderne und zeitgemäße Formen der Finanzierung neben der klassischen Kreditversorgung durch Banken. Der thematische Schwerpunkt wird hierbei auf die Bereiche Börsengang und Unternehmensanleihe gesetzt, wobei diese Formen keinesfalls nur großen und börsennotierten Unternehmen offenstehen. Aber auch Themen wie Crowdfunding und die Wichtigkeit von Investor Relations werden ausführlich beleuchtet. Auch für Anleger ist die Lektüre empfehlenswert, denn sie erfahren mehr über ihre Rechte sowie über potenzielle Risikoszenarien und Erfolgsaussichten.

Analyzing the Strategic Role of Social Networking in Firm Growth and Productivity IGI Global

New financial instruments—such as structured financial products and exchange-traded funds—and new financial institutions—including hedge funds and private-equity funds—present opportunities as well as policy and regulatory challenges in U.S. and Japanese financial markets. This book presents cutting-edge research from experts in academia and the financial industry on new instruments and new institutions while contrasting their developments in the different countries. The contributors highlight the innovative way in which Japanese financiers and government officials have learned from the U.S. regarding the introduction of new instruments into their market. *New Financial Instruments and Institutions* continues the productive collaboration between the Brookings Institution and the Nomura Institute of Capital Markets Research in examining current issues in capital and financial markets. Contributors include Jennifer Bethel (Babson College), Todd Broms (Managed ETFs, LLC), Frank Edwards (Columbia Business School), Allen Ferrell (Harvard Law School), Yasuyuki Fuchita (Nomura Institute of Capital Markets Research), Gary Gastineau (Managed ETFs, LLC), Ken Lehn (University of Pittsburgh), Josh Lerner (Harvard Business School), Frank Partnoy (University of San Diego Law School), Adam Posen (Institute for International Economics), Ken Scott (Stanford Law School), Steve G. Segal (Boston University, J.W. Childs Associates), Yuta Seki (Nomura Institute of Capital Markets Research, New York), Erik Sirri (Babson College), and Randall Thomas (Vanderbilt Law School).

Acoustic Microscopy Elsevier

Provides information on the truck and specialty vehicles business, including: automotive industry trends and market research; mergers, acquisitions, globalization; automobile manufacturers; truck makers; makers of specialty vehicles such as RVs; automobile loans, insurance and other financial services; dealerships; and, components manufacturers.

Energy Speculation FinanzBuch Verlag

Covers ETFs - the hottest investment product of the new century. Explains the nature of this new investment class and all advantages of these instruments. Provides a deep insight into the market and the development of that asset class during the past ten years. Some of the information in this book is usually limited to institutional investors with access to research data bases. All of the contributions have been made by professional investment consultants to give a first hand insight into the matter.

T-Byte Platforms & Applications National Academies Press

This book presents a broad overview of risk management in the banking industry, with a special focus on strategic thinking and decision-making. It reveals the broader context behind decision models and approaches to risk management in the financial industry, linking the regulatory landscape for capital management and risk to strategic thinking, together with behavioral and cultural assessments.

Advanced Processing and Manufacturing Technologies for Nanostructured and Multifunctional Materials II, Volume 36, Issue 6 John Wiley & Sons

This intriguing book shows how to successfully expatriate one's funds, assets, and even oneself and one's family, for safety, profit, privacy, and an inexpensive, better life. • Profiles of over two dozen popular and potential expat havens • An expat haven tax guide • Sources for medical and travel insurance • A list of important contacts • An appendix of statistics, charts, and tables • Suggested reading
