Now I Know 2 Student Book Plus PEP Pack Longman Publishing Group Offers complete course in writing in the rhetorical modes. Comprehensive coverage of writing process. Chapter on writing essay exams. Literary analysis chapter Alternate Table of Contents. ESL tips for non-native writers.

Ten chapters on rhetorical development. General Interest, Improving your writing. **Rhetoric, Readings, Handbook: Examination Copy** Cambridge University Press

A new edition of a successful undergraduate textbook on contemporary international Standard English grammar, based on Huddleston and Pullum's earlier award-winning work, *The Cambridge Grammar of the English Language* (2002). The analyses defended there are outlined here more briefly, in an engagingly accessible and informal style. Errors of the older tradition of English grammar are noted and corrected, and the excesses of prescriptive usage manuals are firmly rebutted in specially highlighted notes that explain what older authorities have called 'incorrect' and show why those authorities are

mistaken. Intended for students in colleges or universities who have little or no background in grammar or linguistics, this teaching resource contains numerous exercises and online resources suitable for any course on the structure of English in either linguistics or English departments. A thoroughly modern undergraduate textbook, rewritten in an easy-to-read conversational style with a minimum of technical and theoretical terminology.

In this book, the authors  
bring together in one  
place essential  
information about college  
students in the US in the  
21st century. Synthesizing  
existing research and  
theory, they present an  
introduction to studying  
student characteristics,  
college choice and  
enrollment patterns,  
institutional types and  
environments, student  
learning, persistence, and  
outcomes of college.  
Substantially revised and  
updated, this new edition  
addresses contemporary  
and anticipated student  
demographics and  
enrollment patterns, a  
wide variety of campus  
environments (such as  
residential, commuter,  
online, hybrid), and a  
range of outcomes  
including learning,  
development, and  
achievement. The book is  
organized around  
Alexander Astin's Inputs-  
Environment-Outputs (I-E-  
O) framework. Student  
demographics, college

preparation, and enrollment patterns are the "inputs." Transition to college and campus environments are the substance of the "environment." The "outputs" are student development, learning, and retention/persistence/completion. The authors build on this foundation by providing relevant contemporary information and analysis of students, environments, and outcomes. They also provide strategies for readers to project forward in anticipation of higher education trends in a world where understanding "college students in the United States" is an ongoing project. By consolidating foundational and new research and theory on college students, their experiences, and college outcomes in the US, the book provides knowledge to inform policies, programs, curriculum and practice. As a starting point for those who seek a foundational understanding of the diversity of students and institutions in the US, the book includes discussion points, learning activities,

and further resources for exploring the topics in each chapter.

Matt, a first year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward

strategies to use, they can significantly increase their learning and performance. For over a decade Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Sandra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion,

---

attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Sandra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.
