The Water Cycle Capstone

A water ride like you've never experienced before, featuring the cutest drop of water in all of precipitation. Meet Drop. She's water! And she's seen a thing or two. Yep, even dinosaurs; she's four and a half billion years old, after all. Everywhere Drop flows--and she flows everywhere--she keeps things

moving, making life on earth possible, and having a great time doing it. (Have you ever plummeted from a rain cloud? Or took a thousand-year nap in a glacier? Drop knows how to live right.) With delightful panache and a steady stream of funny one-liners, Drop takes readers on an adventure through the water cycle and beyond. Filled with irresistible artwork, funny asides, and a steady sprinkle of kid-enticing facts, Drop is the story about water you never knew you were thirsting for. The Water Cycle Britannica Digital Learning

What will happen to a snowman when the sun starts to shine and the temperature rises? Why do puddles disappear? How does water get into the sky to fall as rain? Young readers are already familiar with many stages of the water cycle—they just don't know it yet! By using engaging examples of water in everyday life, this book takes students step-by-step through the processes involved in the water cycle. Filled with information perfectly suited to the abilities and interests of an early elementary audience, this colorful, fact-filled volume gives readers a

chance not only to learn about the water cycle, but also to develop their powers of observation and critical thinking. From fascinating facts about how long the water we drink has been around, to the description of the "life" of a snowman to demonstrate the ways in which water moves around, above, and beneath the surface of our planet, this book makes learning about the dynamic nature of water a lively, fulfilling experience. Fun activities and experiments bring the science concepts in this title to life. The Water Cycle Cavendish Square Publishing, LLC Your child will be learning about the water systems and the water cycle at third grade. This book is

merely a visual resource that expertly combines textual and visual layouts. At the end of this book, your child should demonstrate understanding of how 75% of the Earth 's surface is covered in water. He/she would also be able to describe the stages of the water cycle.
