For many children much of the time their experience in classrooms can be rather dull, and yet the world the school is supposed to initiate children into is full of wonder. This book offers a rich understanding of the nature and roles of wonder in general and provides multiple suggestions for to how to revive wonder in adults (teachers and curriculum makers) and how to keep it alive in children. Its aim is to show that adequate education needs to take seriously the task of evoking wonder about the content of the curriculum and to show how this can routinely be done in everyday classrooms. The authors do not wax flowery; they present strong arguments based on either research or precisely described experience, and demonstrate how this argument can be seen to work itself out in daily practice. The emphasis is not on ways of evoking wonder that might require virtuoso teaching, but rather on how wonder can be evoked about the everyday features of the math or science or social studies curriculum in regular classrooms.

Contributors discuss their motivation to attend an HBCU for graduate studies, their experiences, and how these helped prepare them for their career. To be prepared to serve the increasing number of Black students with access to graduate programs at HBCUs, university administrators, faculty, and staff require a better understanding of these students' needs and how to meet them. The history of Europe as a continent of refugees European history has been permeated with refugees. The Outsiders chronicles every major refugee movement since 1492, when the Catholic rulers of Spain set in motion the first mass flight and expulsion in modern European history. Philipp Ther provides needed perspective on today's "refugee crisis," demonstrating how Europe has taken in far greater numbers of refugees in earlier periods of its history, in wartime as well as peacetime. His sweeping narrative crosses the Mediterranean and the Atlantic, taking readers from the Middle East to the shores of America. In this compelling book, Ther examines the major causes of mass flight, from religious intolerance and ethnic cleansing to political persecution and war. He describes the perils and traumas

of flight and explains why refugees and asylum seekers have been welcomed in some periods—such as during the Cold War—and why they are rejected in times such as our own. He also examines the afterlives of the refugees in the receiving countries, which almost always benefited from admitting them. Tracing the lengthy routes of the refugees, he reconceptualizes Europe as a unit of geography and historiography. Turning to the history of refugees in the United States, Ther also discusses the anti-refugee politics of the Trump administration, explaining why they are un-American and bad for the country. By setting mass flight against fifteen biographical case studies, and drawing on his subjects' experiences, itineraries, and personal convictions, Ther puts a human face on a global phenomenon that concerns all of us.

Much has been written about how to engage students in their learning, but very little of it has issued from students themselves. Compiled by one of the leading scholars in the field of student voice, this sourcebook draws on the perspectives of secondary students in the United States, England, Canada, and Australia as well as on the work of teachers, researchers, and teacher educators who have collaborated with a wide variety of students. Highlighting student voices, it features five chapters focused on student perspectives, articulated in their own words, regarding specific approaches to creating and maintaining a positive classroom environment and designing engaging lessons and on more general issues of respect and responsibility in the classroom. To support educators in developing strategies for accessing and responding to student voices in their own classrooms, the book provides detailed guidelines created by educational researchers for gathering and acting upon student perspectives. To illustrate how these approaches work in practice, the book includes stories of how pre-service and in-service teachers, school leaders, and teacher educators have made student voices and participation central to their classroom and school practices. And finally, addressing both practical and theoretical questions, the book includes a chapter that outlines action steps for high school teachers, school leaders, and teacher educators and a chapter that offers a conceptual framework for thinking about and engaging in this work. Bringing together in a single text student perspectives, descriptions of successful efforts to access them in secondary education contexts, concrete advice for practitioners, and a theoretical framework for further exploration, this sourcebook can be used to guide practice and support re-imagining education in secondary schools of all kinds, and the principles can be adapted for other educational contexts.

This accessible book will help elementary school teachers improve literacy instruction inside or outside the Common Core environment. The authors address teachers' instructional needs by introducing key concepts from current trends in literacy education—from high-level standards to the use of 21st-century literacies. Readers then follow teachers as they successfully implement the curriculum they developed to promote high-level thinking and engagement with disciplinary content. The text focuses on three disciplinary literacy units of instruction: a science unit in a 2nd-grade classroom, a social studies (history) unit in a 4th-grade classroom, and a mathematics unit in a 6th-grade classroom. Each unit revolves around a central inquiry question and includes research-based strategies for using reading, writing, and classroom talk as tools to foster disciplinary understandings. This unique, insider's look at how real teachers build and implement a Common Core-aligned curriculum will be an invaluable resource for teachers, schools, and districts as they move forward to align their own curricula. "I can't imagine a more timely book . . . a set of elegant principles and some stunning examples of how teachers can use reading, writing, and talk to enhance learning in the science, social studies, and mathematics classroom." —P. David Pearson, professor of language and literacy and human development, Graduate School of Education, University of California, Berkeley "If you're wondering how to integrate literacy across the content disciplines, this is the text you will want to keep and return to often." —Diane Lapp, distinguished professor of education, San Diego State University "Inspiring, and better still, infectious!" —Donald R. Bear, Iowa State University "Provides concrete ideas for teaching students to use literacy to think like scientists, historians, and mathematicians." —Douglas Fisher, professor of educational leadership, San Diego State University, and teacher leader, Health Sciences High and Middle College
