Offers a practical guide for improving schools dramatically that will enable all students from all backgrounds to achieve at high levels.

Includes assessment forms, an index, and a DVD.

Everyday Editing Learning Matters

NEW STUDENT GETS OLD TEACHER The bad news is that Cara Landry is the new kid at Denton Elementary School. The worse news is that her teacher, Mr. Larson, would rather read the paper and drink coffee than teach his students anything. So Cara decides to give Mr. Larson something else to read—her own newspaper, *The Landry News*. Before she knows it, the whole fifth-grade class is in on the project. But then the principal finds a copy of *The Landry News*, with unexpected results. Tomorrow's headline: Will Cara's newspaper cost Mr. Larson his job?

Free Your Teaching and Revolutionize Your Classroom Laurel Leaf

Based on the premise that students can learn a great deal by reading and writing a newspaper, this book was created by preservice instructors to teach upper elementary students (grades 3-5) newspaper concepts, journalism, and how to write newspaper articles. It shows how to use newspaper concepts to help students integrate knowledge from multiple disciplines as they write about current events and the lives of others in an unbiased and accurate way. Based on the Newspaper in Education program--a cooperative venture between newspaper publishers and schools that offers newspaper activities to teach reading and content skills and strategies--the book takes the concept further and incorporates a focus on writing. The result of these lessons is an actual newspaper that students can publish for their classroom or school. Following an Introduction, the book's seven chapters are as follows: (1) Background Information for Teachers; (2) Teaching Journalism Basics; (3) Interviewing, Writing Quotes, and Using Figurative Language; (4) Elements and Organizational Structure of News Stories; (5) Writing Different Types of Newspaper Stories; (6) The Final Steps: Revision, Editing, Layout, and Publication; and (7) Student Evaluation of Concept Units. Contains 12 references. Appendixes provide student worksheets, two sample articles, a layout and design sheet, a glossary of newspaper terms, a stylebook, and a listing of additional resources. (SR)

Textbooks are symbols of centuries-old education.

They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance

and a lack of creativity. It's time to ditch those

textbooks--and those textbook assumptions about

learning In Ditch That Textbook, teacher and blogger

Matt Miller encourages educators to throw out

meaningless, pedestrian teaching and learning

practices. He empowers them to evolve and improve

on old, standard, teaching methods. Ditch That

Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Connecting Self-regulated Learning and Performance with Instruction Across High School Content Areas Corwin Press

This book shows how principles of self-regulated learning are being implemented in secondary classrooms. The 14 chapters are theoretically driven and supported by empirical research and address all common high school content areas. The book comprises 29 lesson plans in English language arts, natural and physical sciences, social studies, mathematics, foreign language, art, music, health, and physical education. Additionally, the chapters address students with special needs, technology, and homework. Each chapter begins with one or more lesson plans written by master teachers, followed by narratives explaining how the lesson plans were implemented. The chapters conclude with an analysis written by expert researchers of the self-regulated learning elements in the lessons. Each lesson and each analysis incorporate relevant educational standards for that area. Different types of high schools in several states serve as venues. This powerful new book edited by Maria K. DiBenedetto provides a unique and invaluable resource for both secondary teachers and researchers committed to supporting adolescents in the development of academic self-regulation. Each chapter is jointly written by teachers who provide a wealth of materials, including lesson plans, and researchers who situate these lesson plans and academic self-regulation goals within the larger work on self-regulation. The topics covered are far broader than any other book I have seen in terms of developing academic self-regulation, covering over a dozen content

areas, including literacy, mathematics, social studies, the sciences, and the arts. Teachers and scholars alike will find this book a must read. Karen Harris, EdD, Arizona State University A practical and magnificent blend of educational research and application. This book goes beyond presenting the findings of research on self regulation by connecting detailed strategies that align with the standards to the research. DiBenedetto et al. clearly illustrate how to develop self regulated learners in the classroom. A refreshing must read for all secondary educators and educational researchers seeking to be well grounded in education research and practical application techniques. Heather Brookman, PhD, Fusion Academy-Park Avenue Self-regulated learning is a research-based process by which teachers help students realize their own role in the learning process. Connecting Self-Regulated Learning and Performance with Instruction Across High School Content Areas consists of model teachers' lessons and analyses by prominent educational psychologists in the field of self-regulated learning. The book provides teachers with the tools needed to increase students' awareness of learning and inspires all educators to use self-regulated learning to promote engagement, motivation, and achievement in their students. The book also provides administrators with the principles needed to infuse evidenced based self-regulated learning into their curriculum and instruction. I highly recommend the book!

If Stanley's practical steps to the research process for middle and high schools are already a hit with your students, reach for this book next.

Engaging All Students in Daily Literacy Assessment & Instruction Stenhouse Publishers

Most guides to puppetry assume elaborate set-ups. With library staffing and budgets stretched thin and other curricular commitments for teachers, few have the time or resources to develop full-blown puppet performances. Frey provides a puppet alternative to enrich story times, book talks and other library events for children of all ages.

MLA Made Easy: Citation Basics for Beginners Stenhouse Publishers

Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the

handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

A Guide for Student Newspapers Simon and Schuster Involve and inspire students with these one-of-a-kind activities! Help your students reach their fullest potential. Create unique learning experiences adaptable to their needs and aspirations with this extraordinary activity book from internationally acclaimed education experts Dr. Russell Quaglia, Michael Corso and Julie Hellerstein.

Based on hundreds of teacher and student interviews, the authors implement 3 Guiding Principles and 8 Behaviors and Conditions that profoundly affect student success in grades K-8. Breathe new life into science learning with this powerful guidebook that shows how to create more thoughtful curriculum and differentiate lessons to benefit all students.

Student Voice Libraries Unlimited

When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. “ You know something! ” I would say if it could hear me. “ Now tell it to us in language we can understand! ” Since its publication in 2005, *From Dissertation to Book* has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, *From Dissertation to Book* reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “ author ” to their curriculum vitae.

Science Teaching Reconsidered Teacher Created Materials
Editing is often seen as one item on a list of steps in the writing process—usually put somewhere near the end, and often completely crowded out of writer's workshop. Too many times daily editing lessons happen in a vacuum, with no relationship to what students are writing. In *Everyday Editing*, Jeff Anderson asks teachers to reflect on what sort of message this approach sends to students. Does it tell them that editing and revision are meaningful parts of the writing process, or just a hunt for errors with a 50/50 chance of getting it right—comma or no comma? Instead of rehearsing errors and drilling students on what's wrong with a sentence, Jeff invites students to look carefully at their writing along with mentor texts, and to think about how punctuation, grammar, and style can be best used to hone and communicate meaning. Written in Jeff's characteristically witty style, this refreshing and practical guide offers an overview of his approach to editing within the writing workshop as well as ten detailed sets of lessons covering everything from apostrophes to serial commas. These lessons can be used throughout the year to replace Daily Oral Language or error-based editing strategies with a more effective method for improving student writing.

Authentic Assessment in Social Studies CRC Press

Argues that the decline in reading by children in the United States is furthered by schools by focusing on test-taking and focusing solely on academic texts with guidance for educators on how to counteract this trend.
